

Arbeitstechniken 2

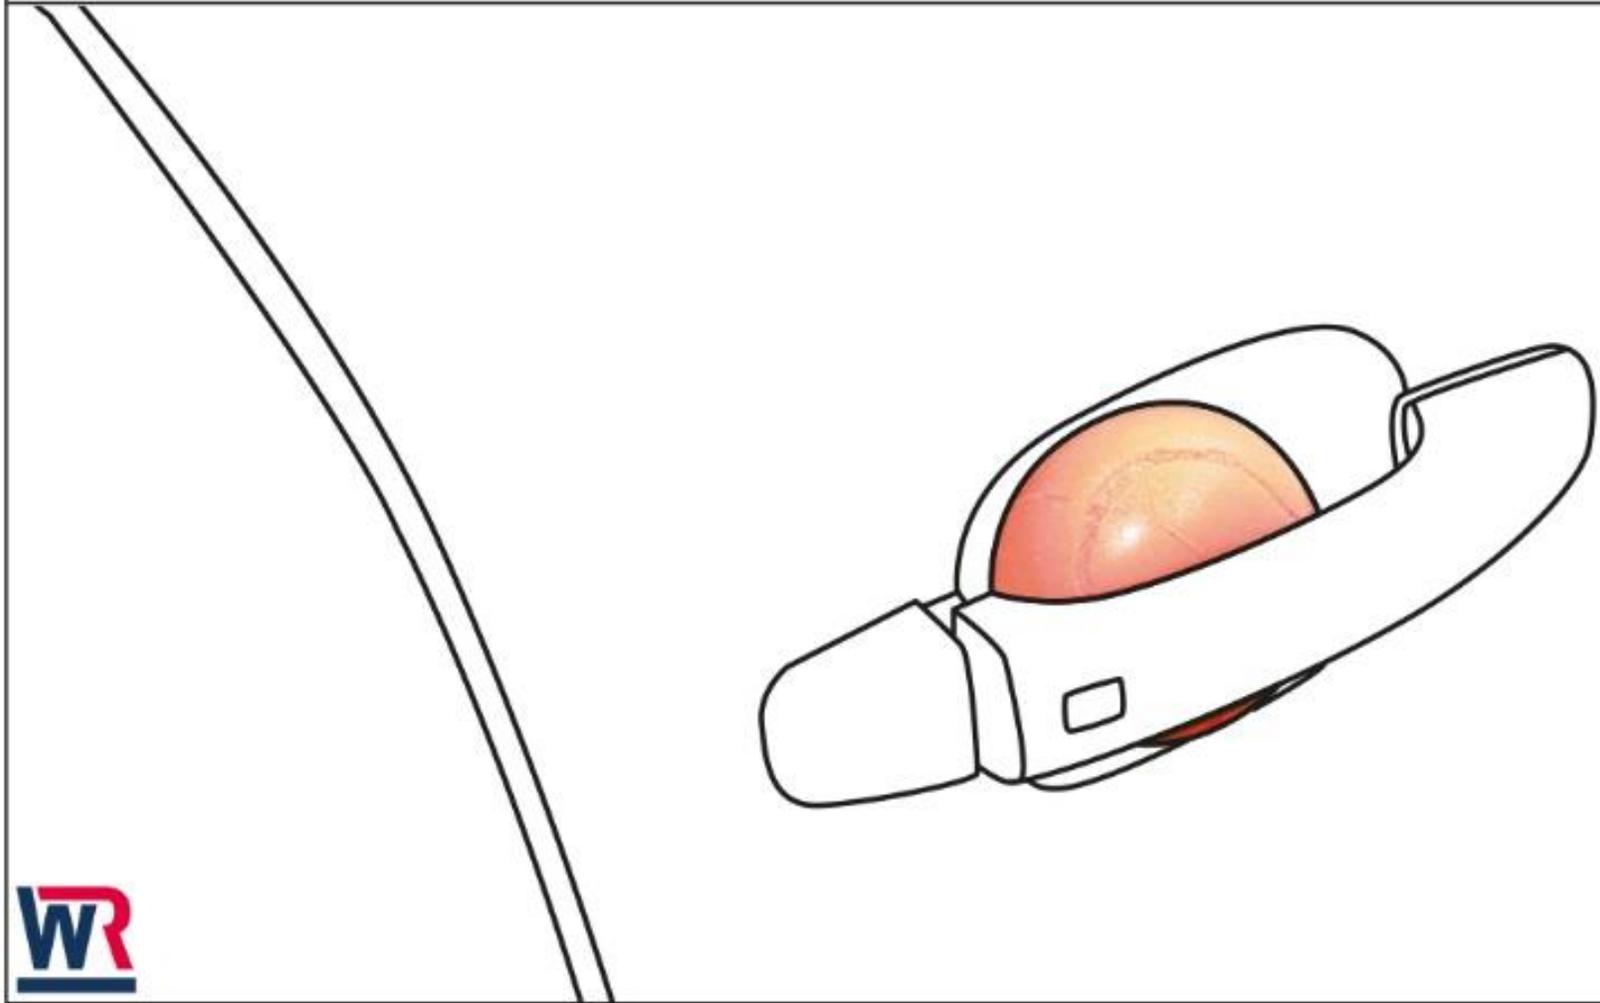

VU eingeklemmte Person

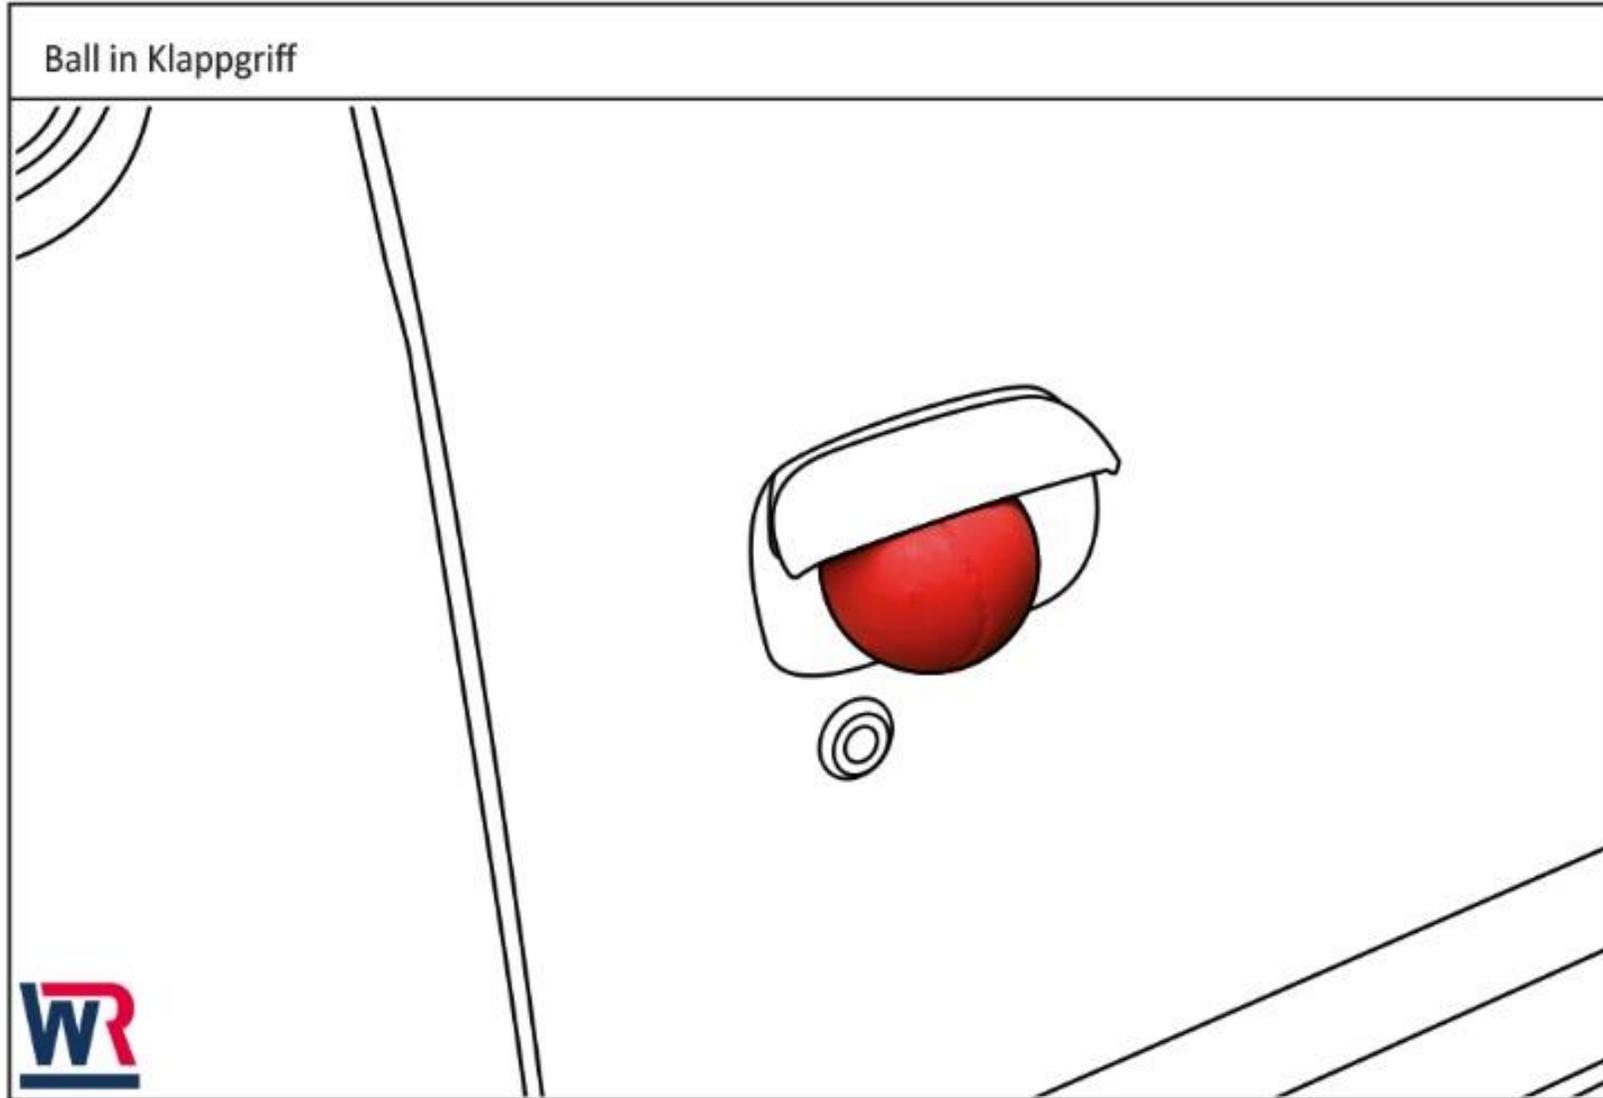

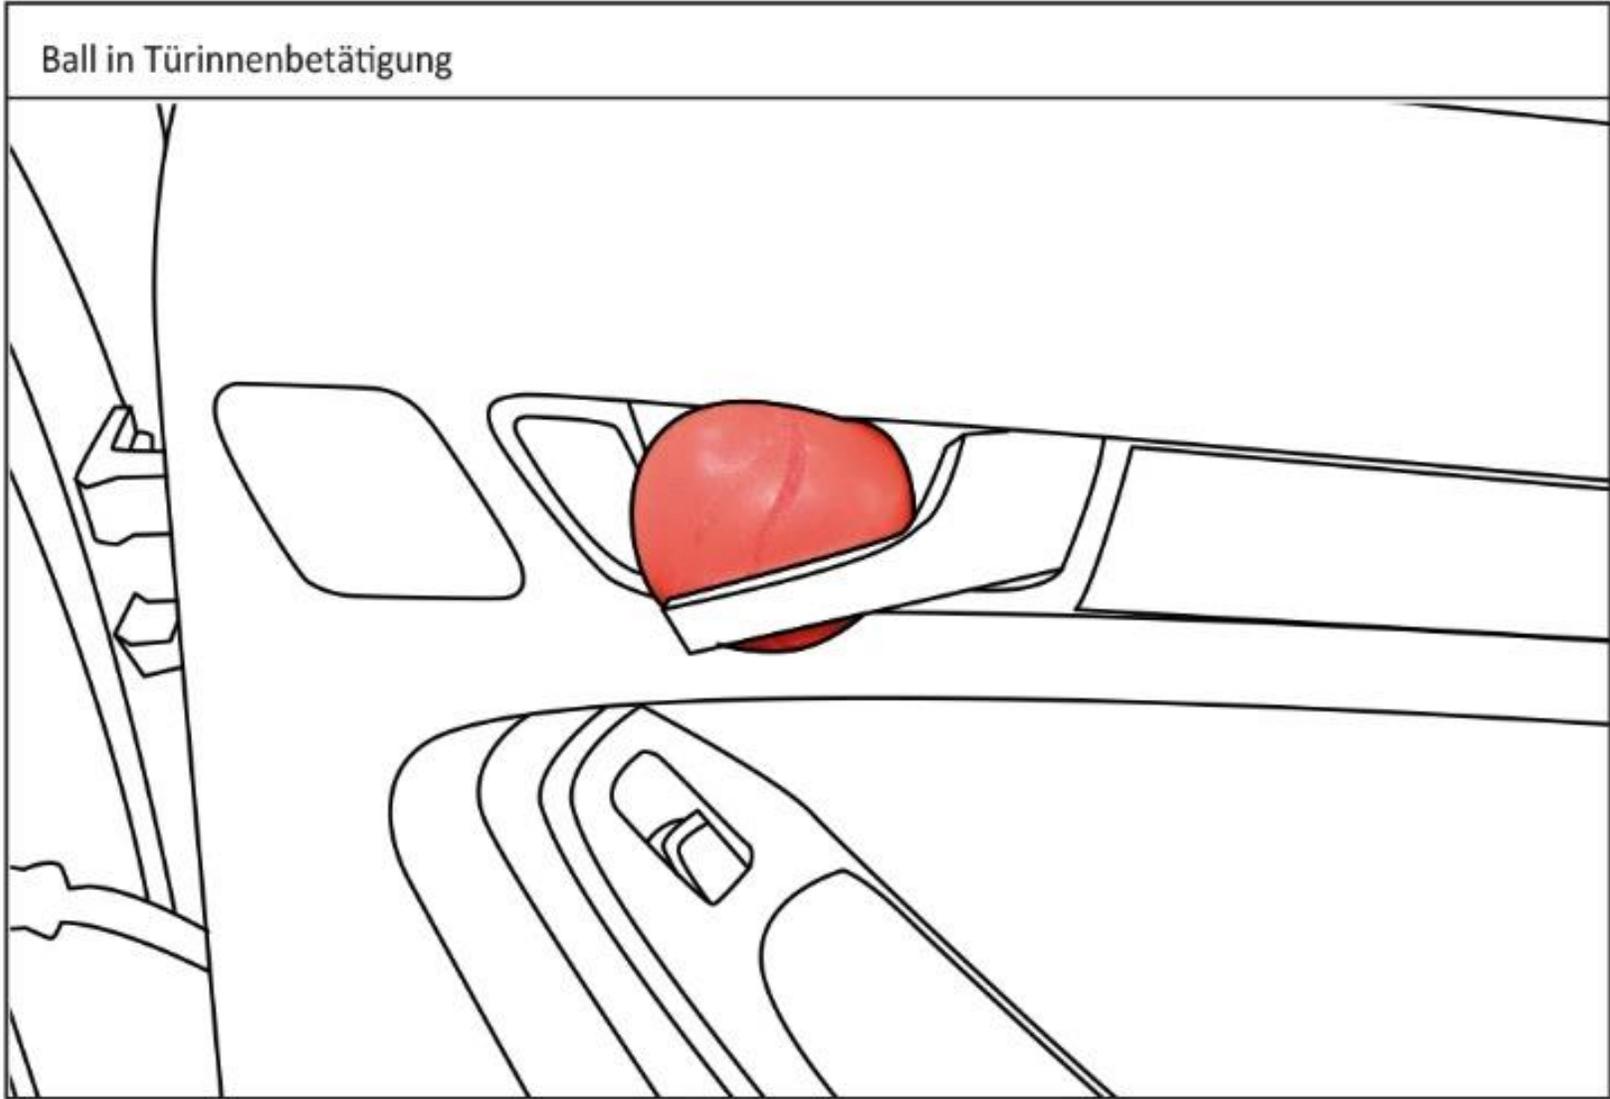

Leichtes Türöffnen durch Offenhalten des Schlosses

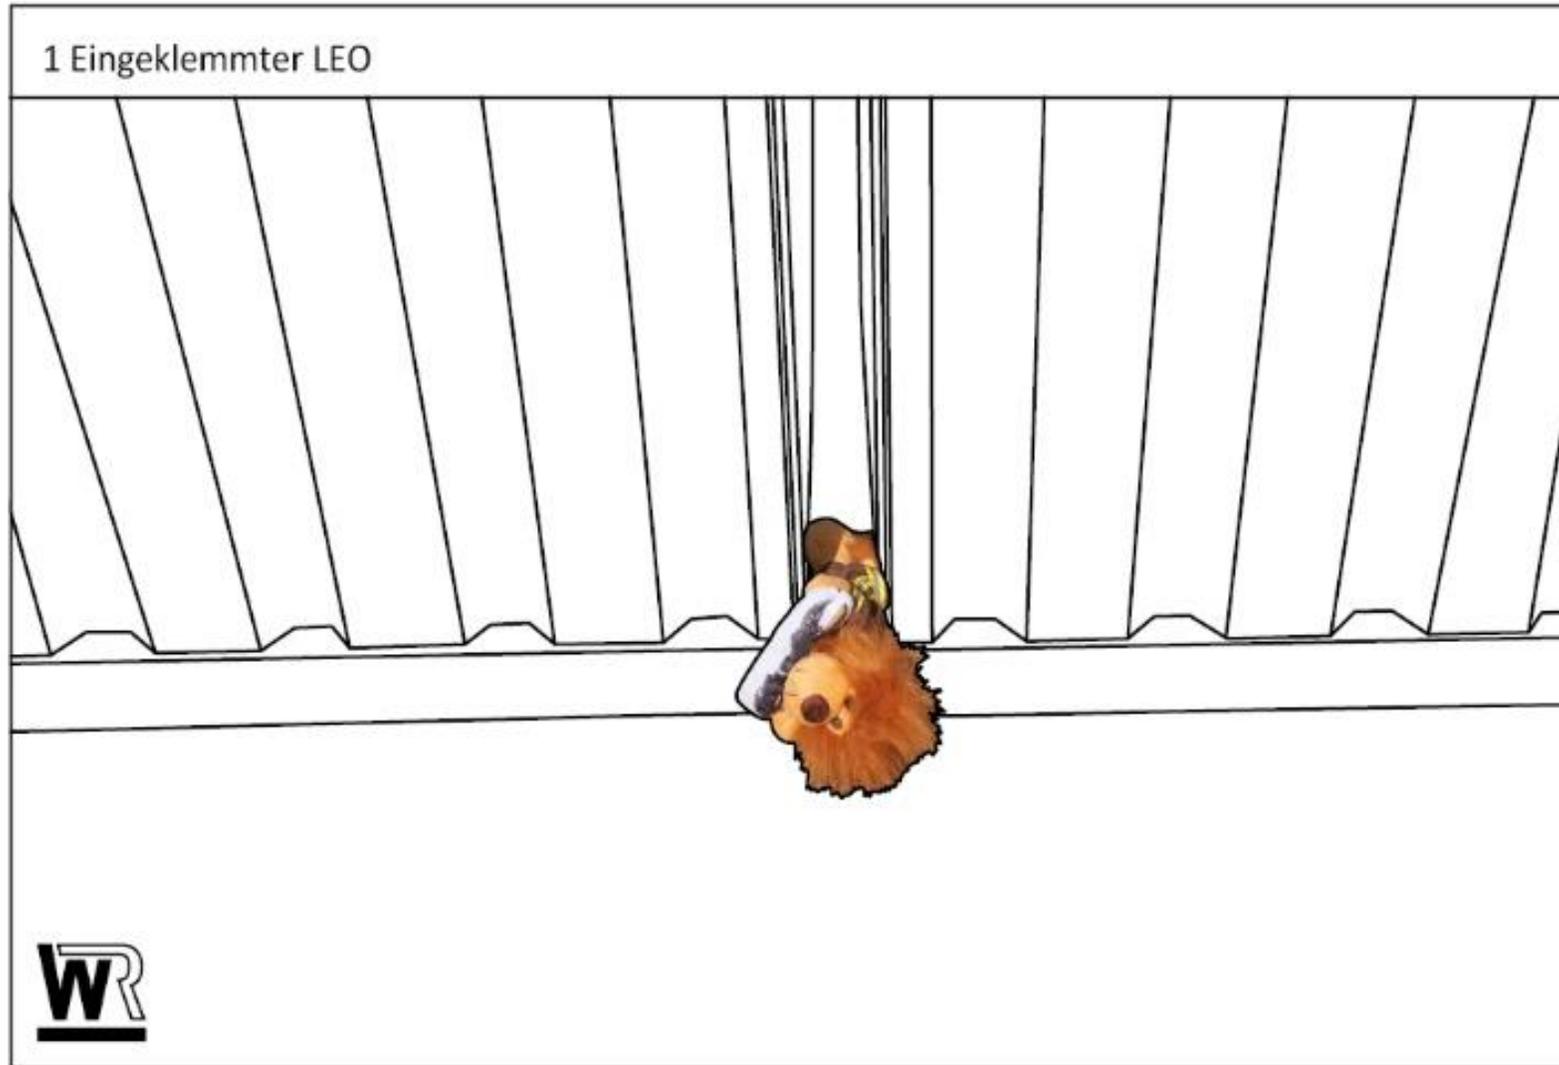

Ball in Ziehgriff

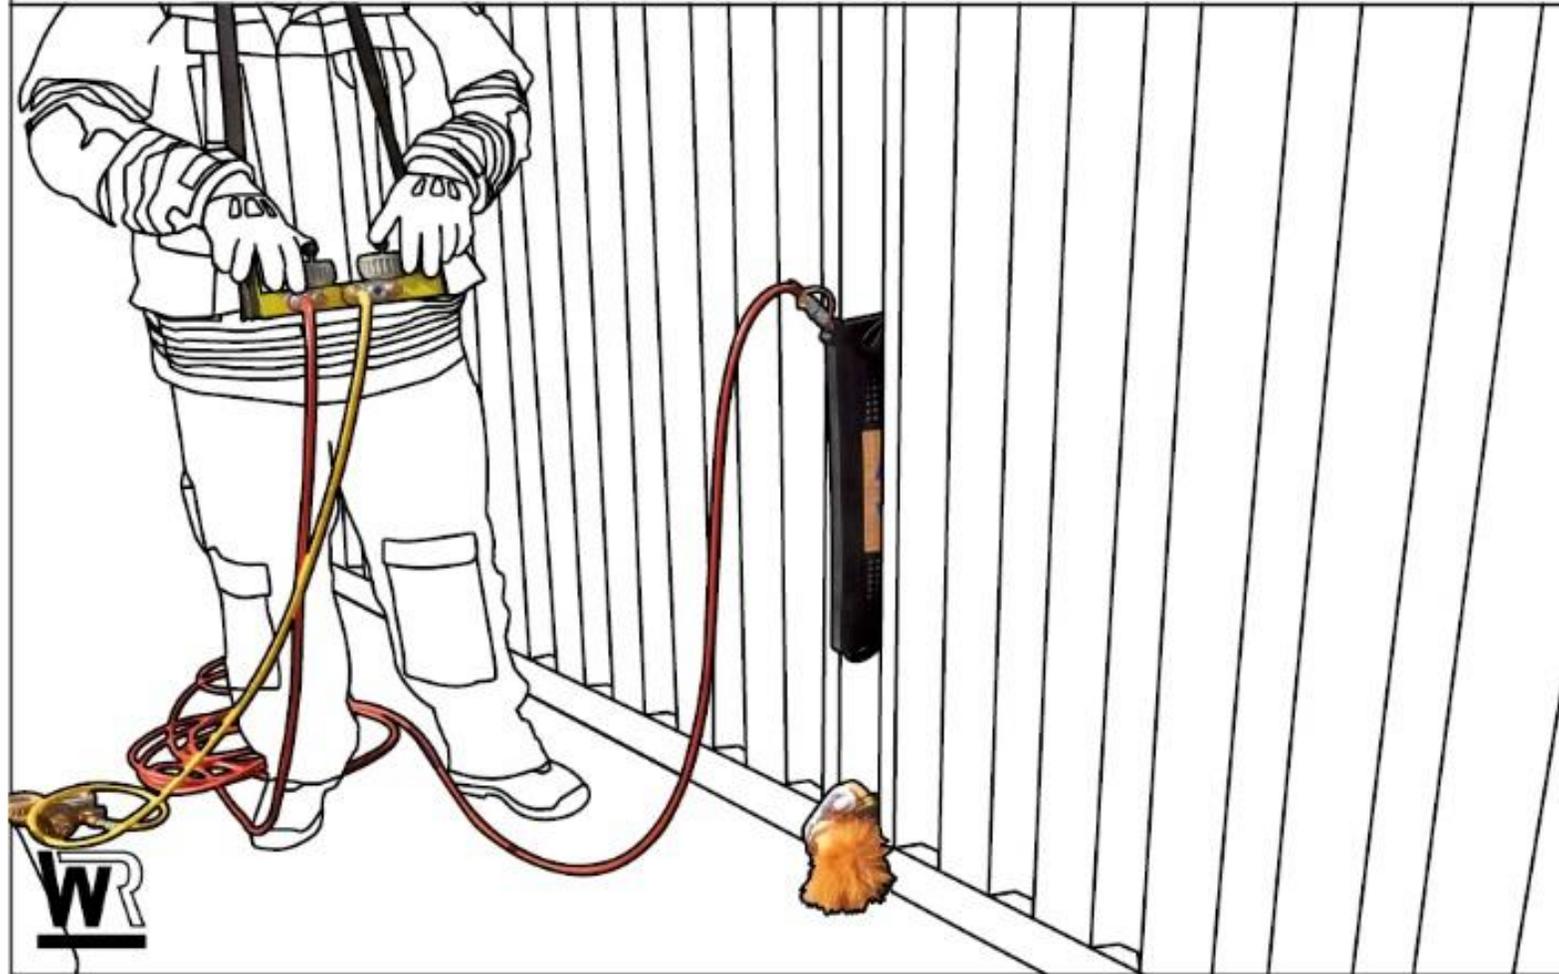

2 Equipment: Hebekissen, Steuergerät, Schläuche, Luftflasche

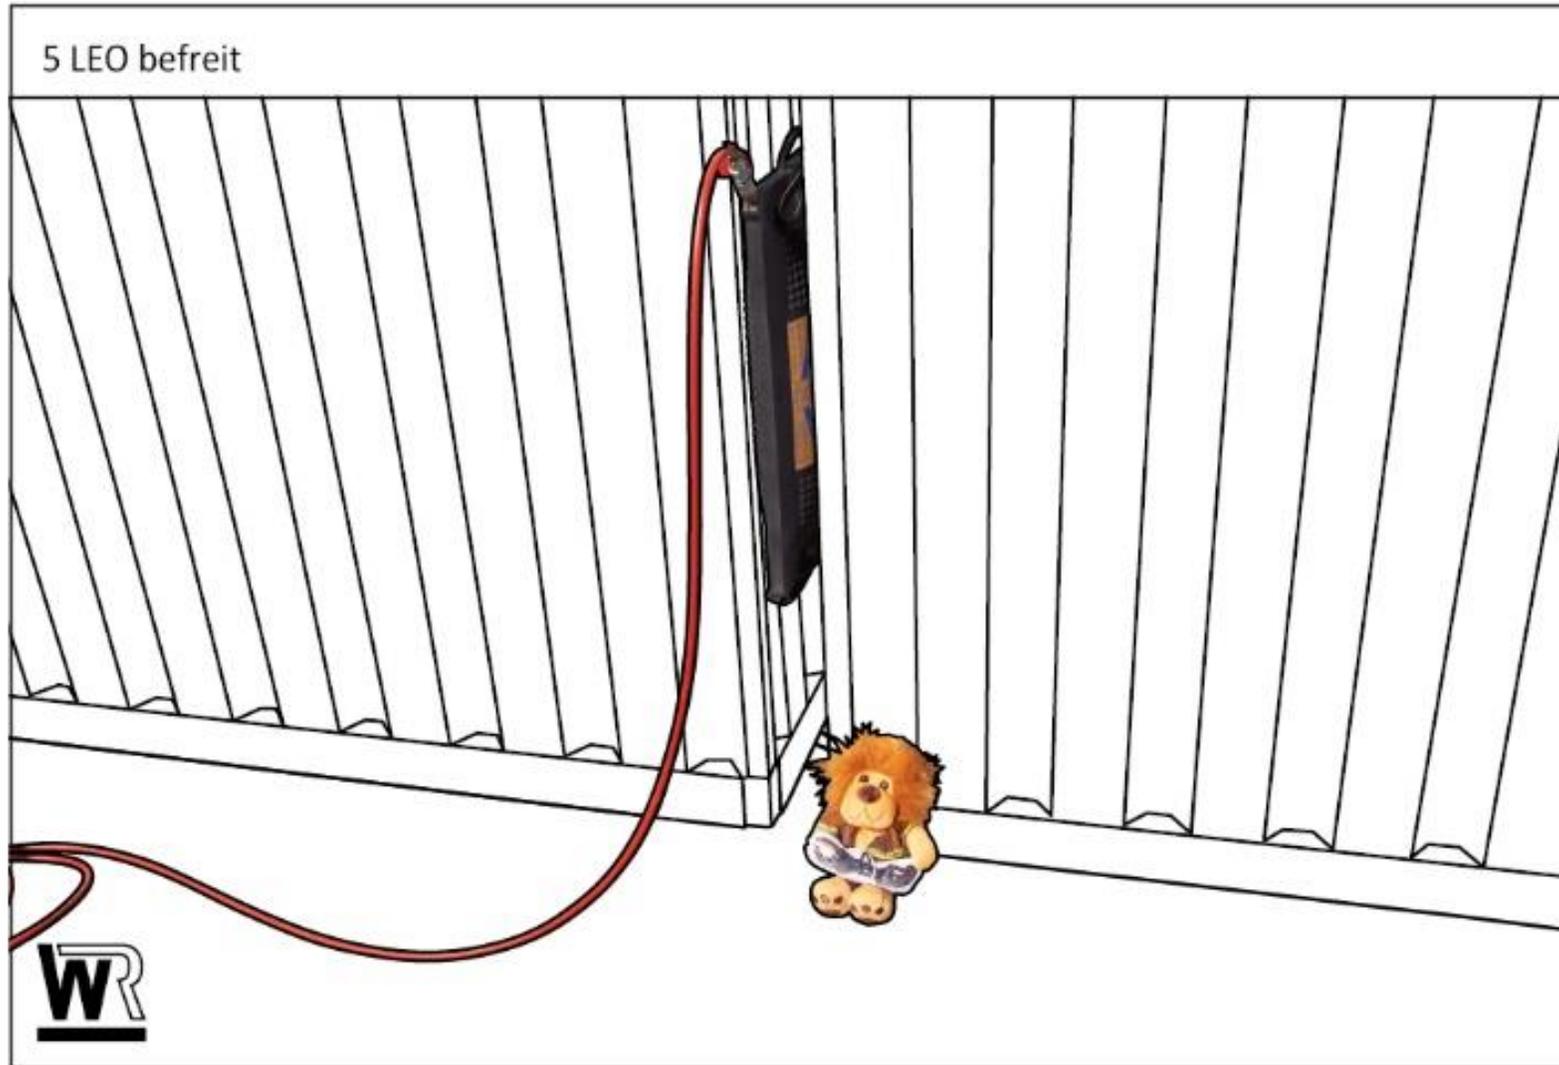

3 Hebekissen in Spalt einsetzen

4 Hebekissen befüllen, um Spalt zu vergrößern

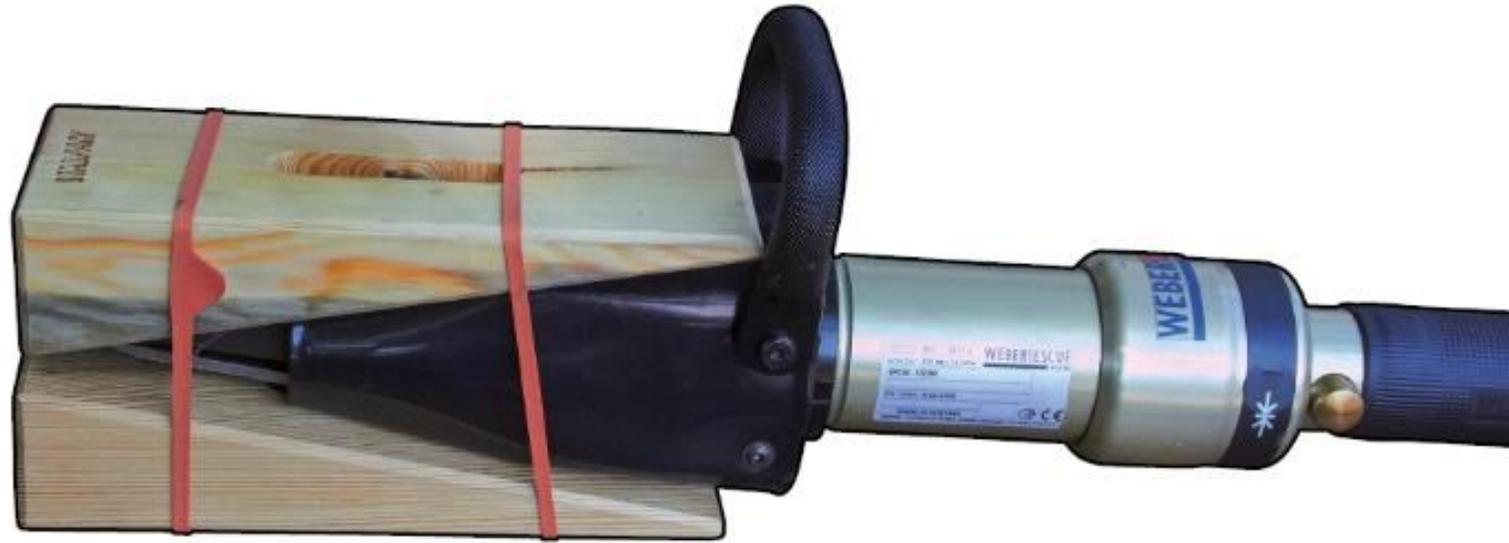

1 Equipment: Spreizkeil, B-Compact, Schläuche, Keile

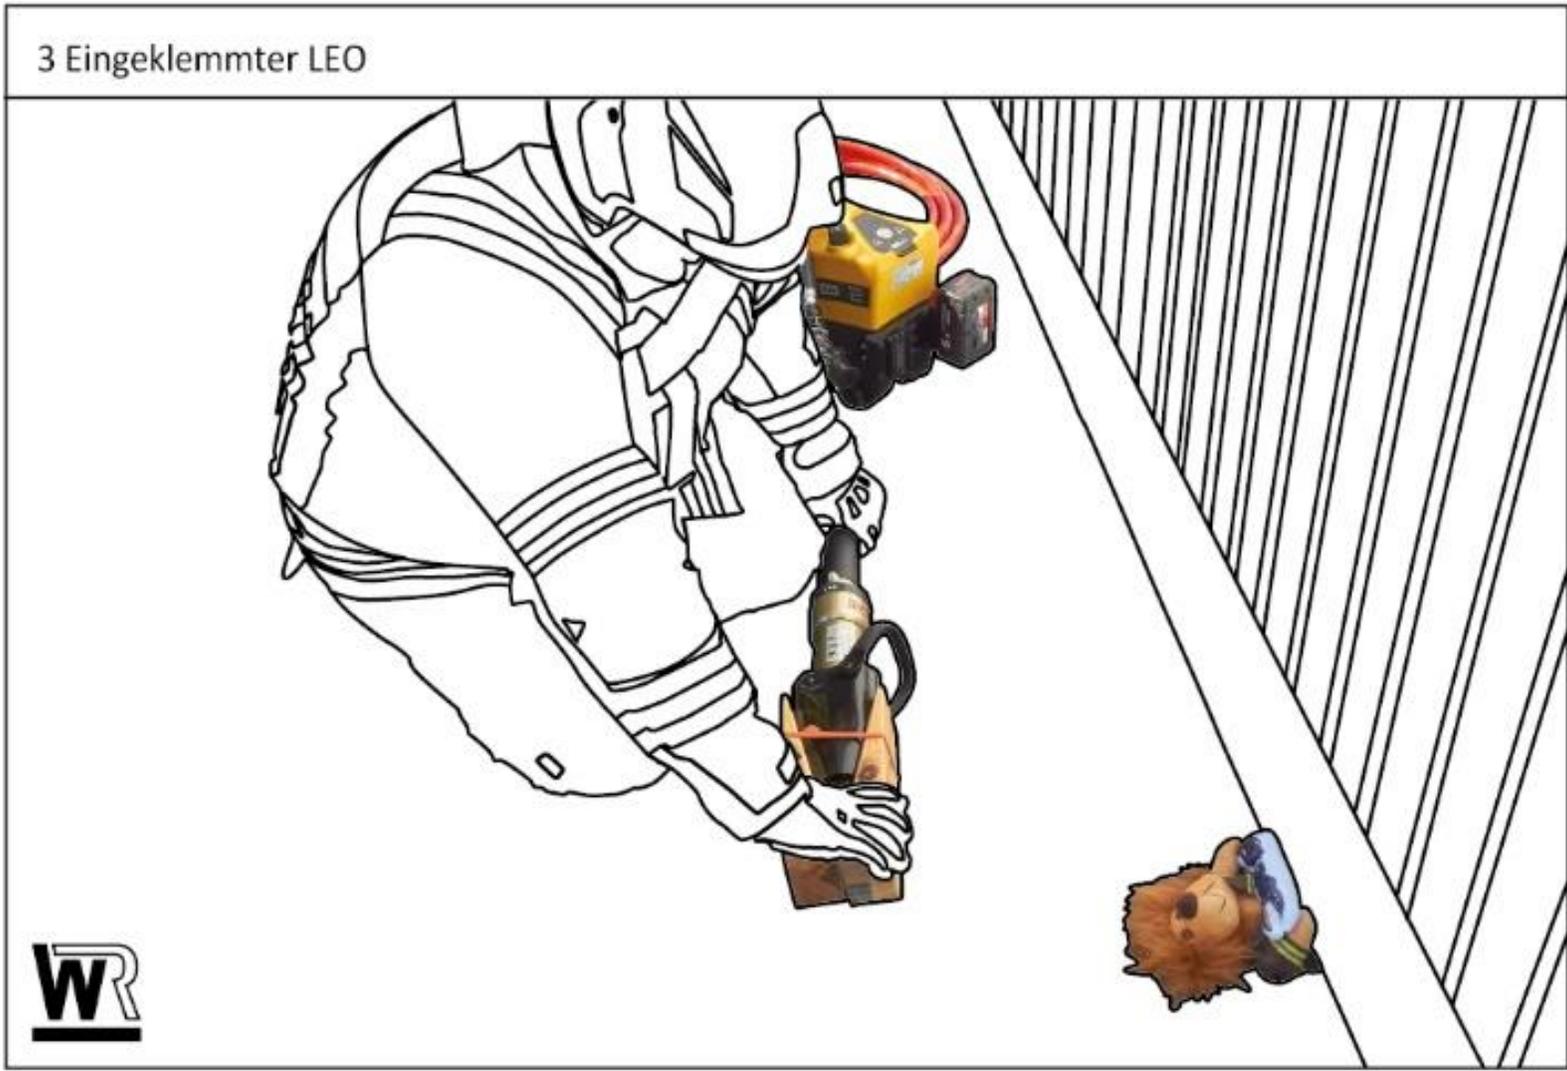

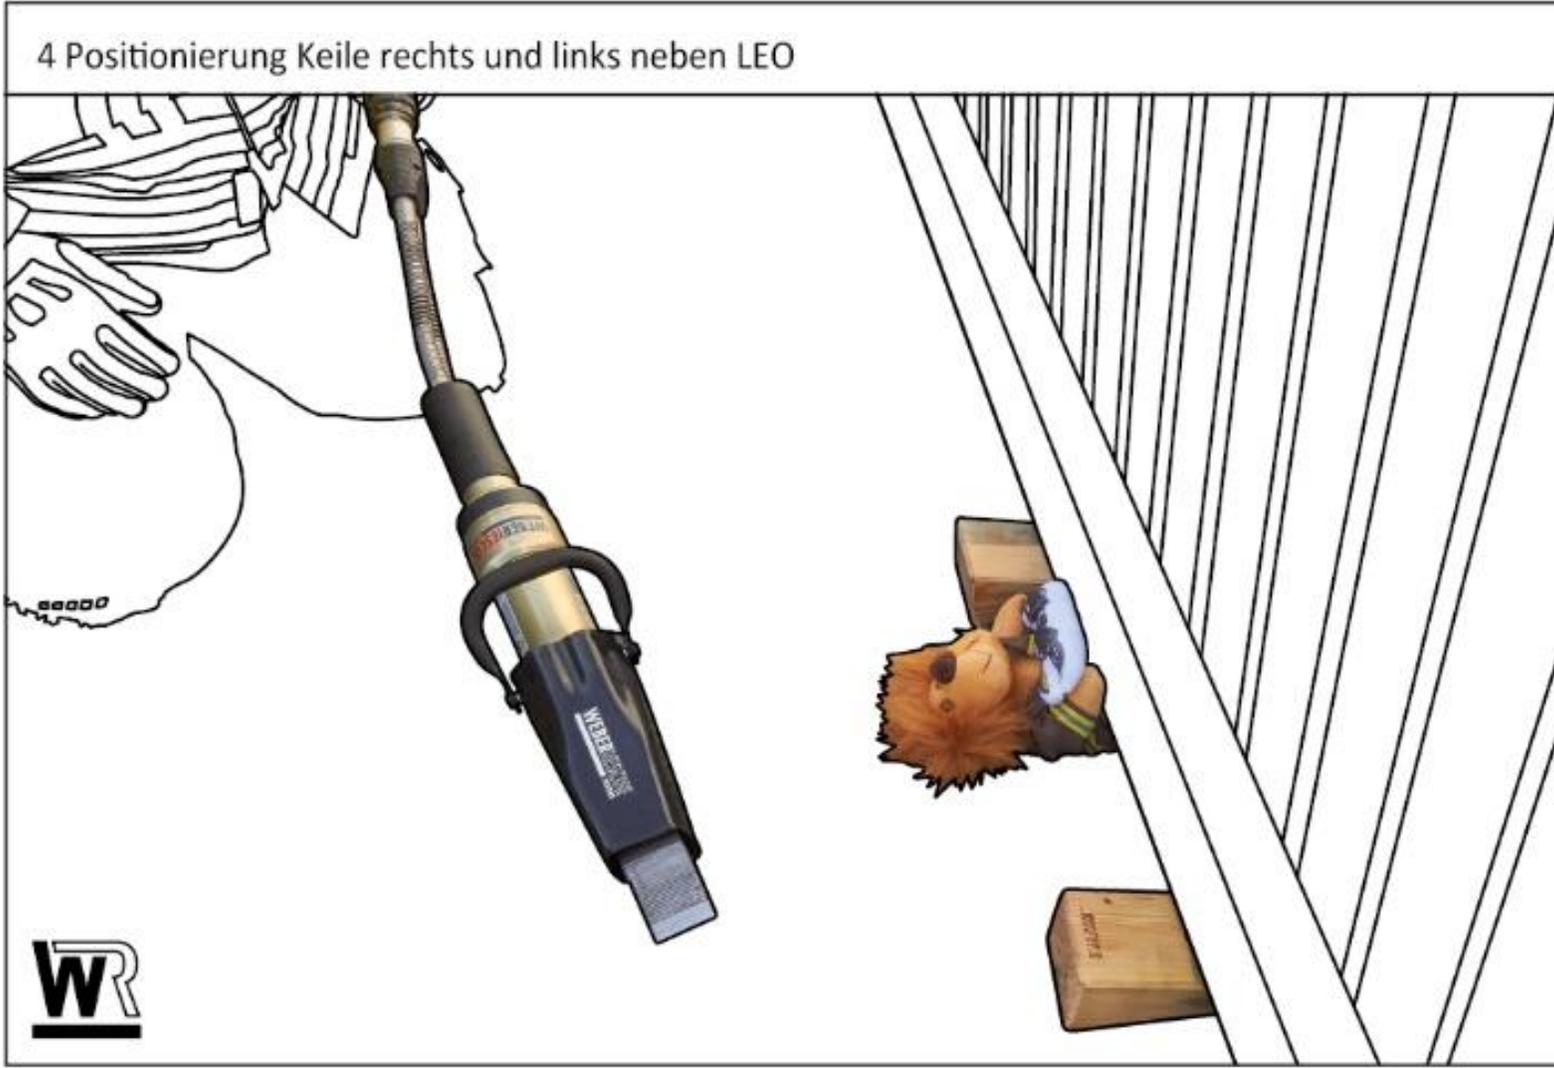

2 Extra-Tipp: Keile mit Gummis auf Spreizkeil befestigen für schnelle Einsatzbereitschaft

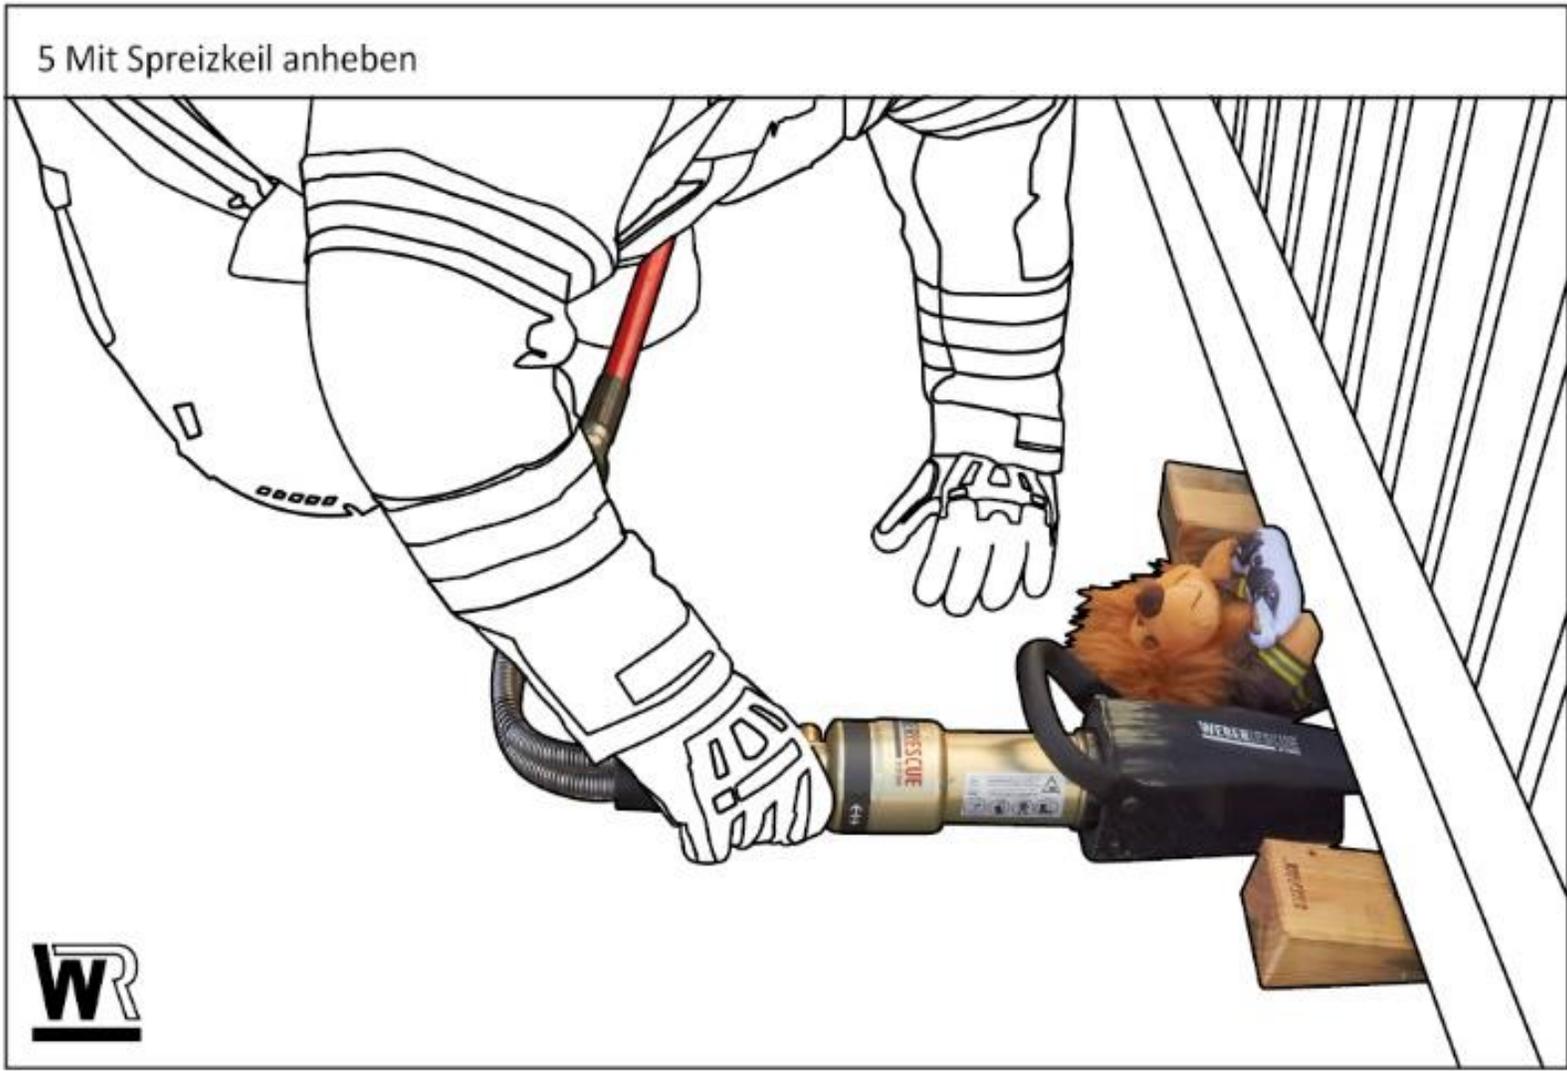

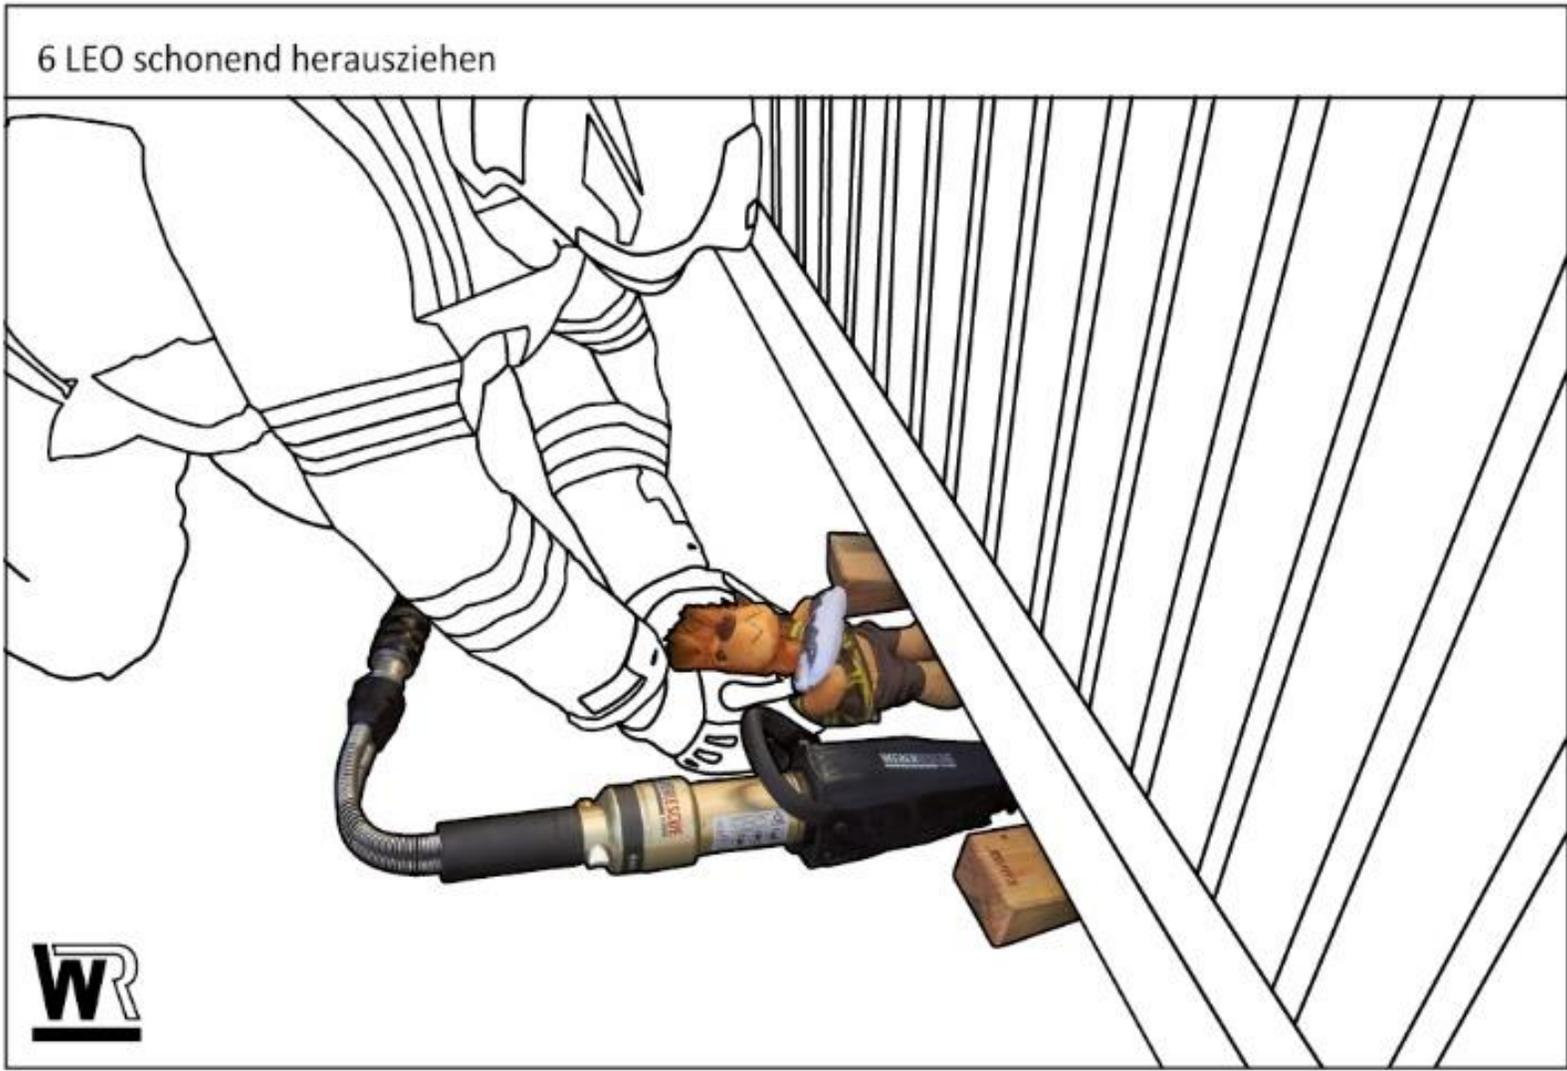

3 Einklemmter LEO

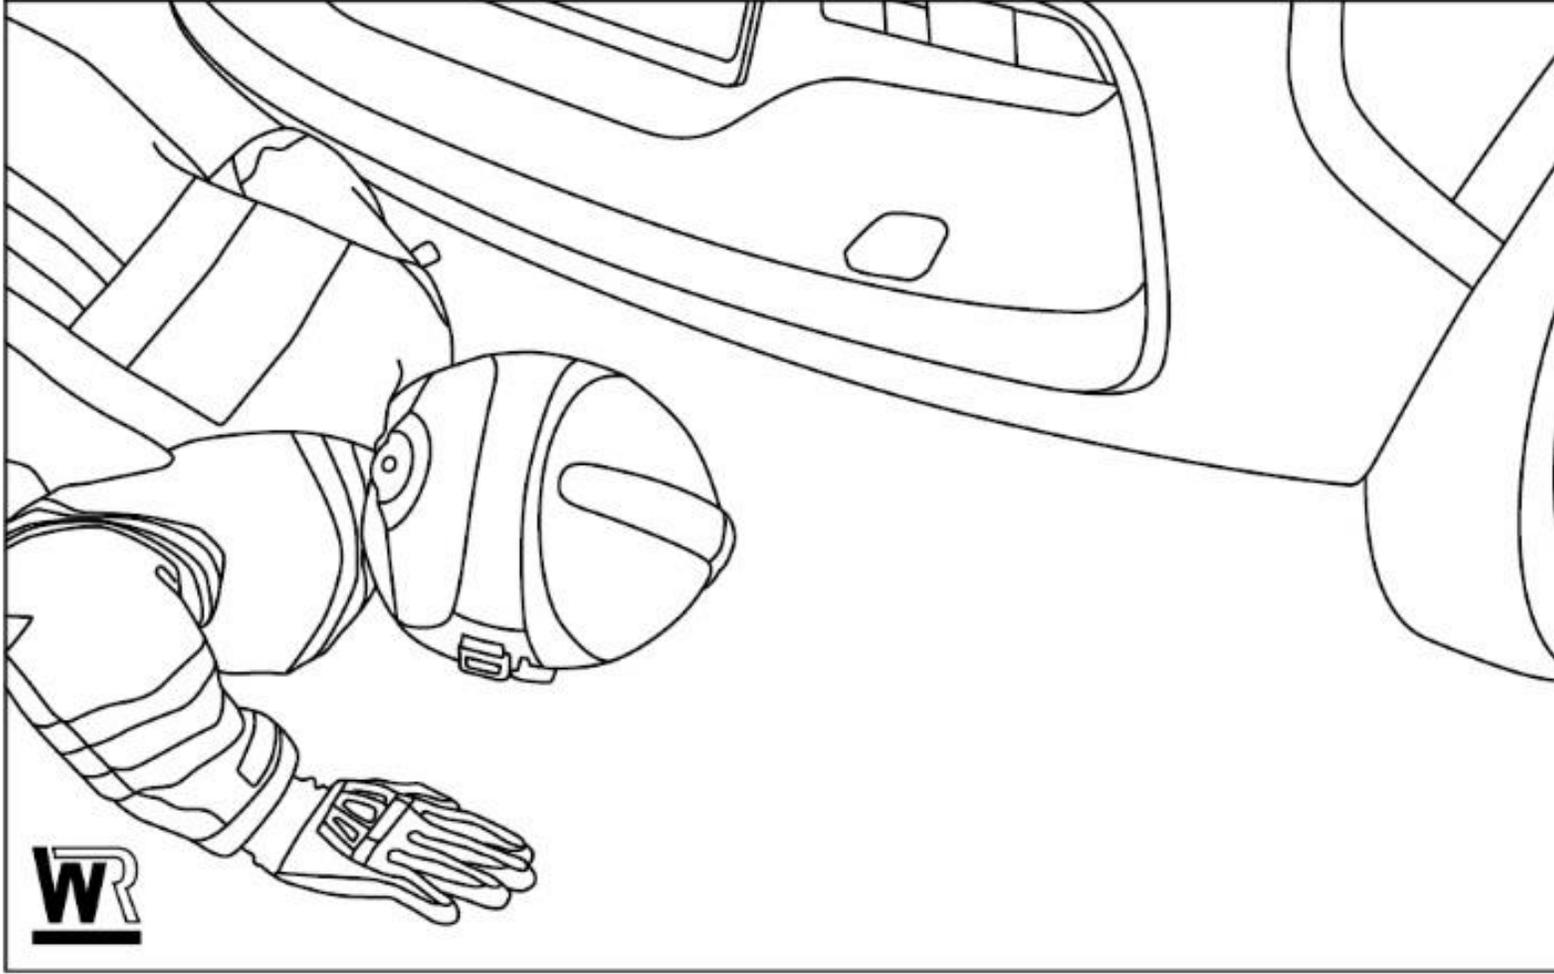

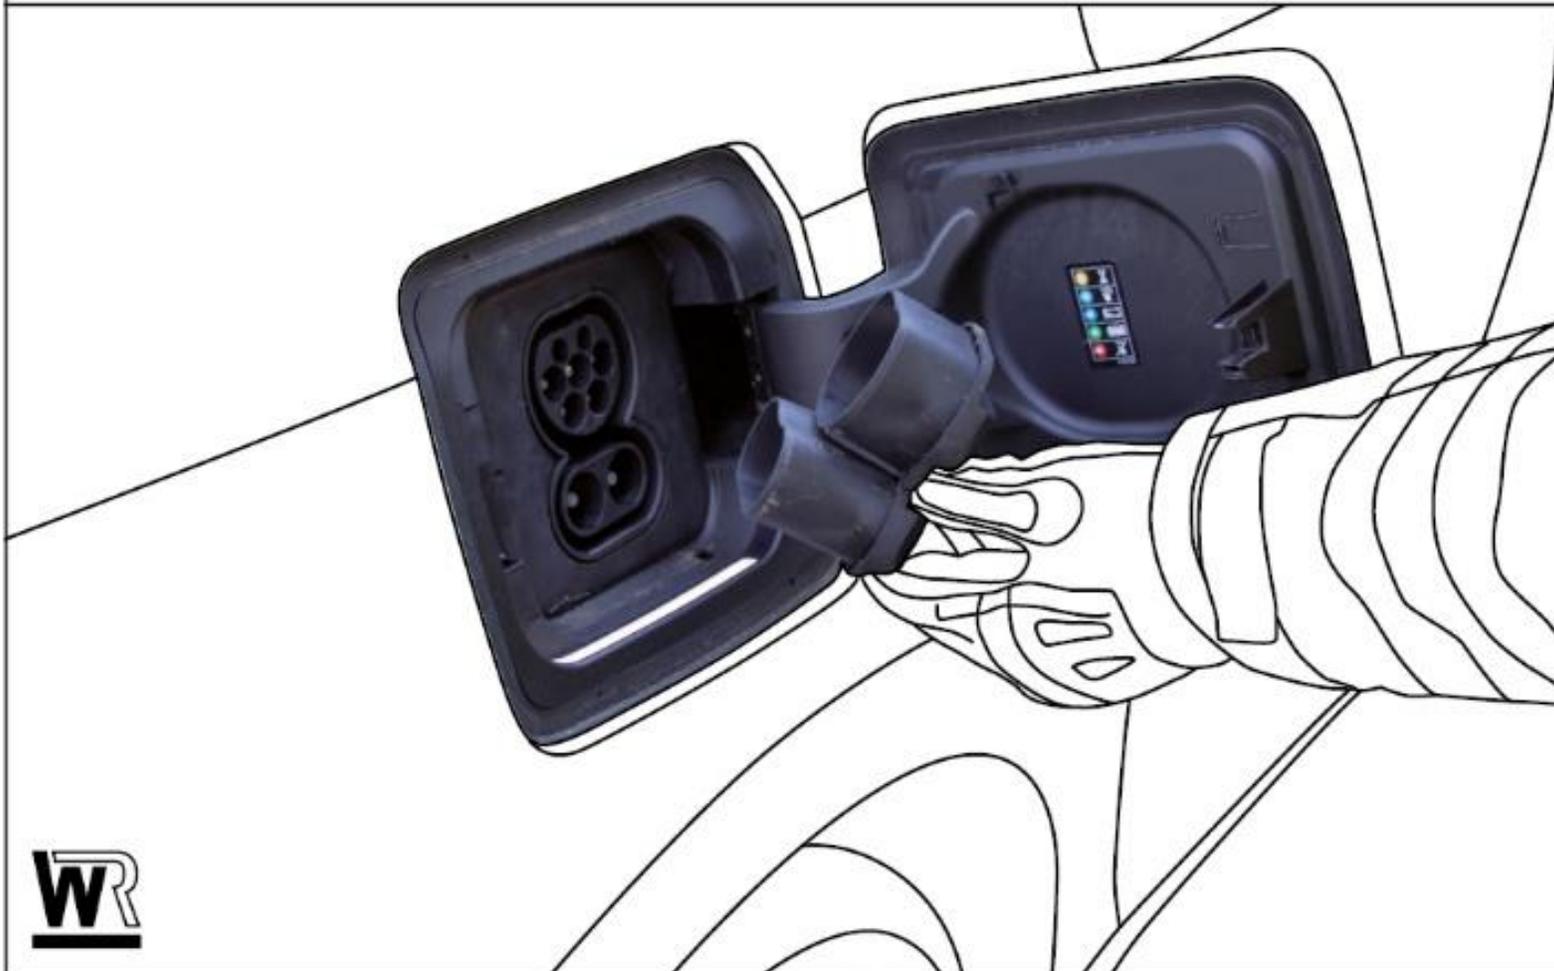

1 **AUTO**-Regel: **A**uslaufende Betriebsstoffe, **U**nterboden absuchen

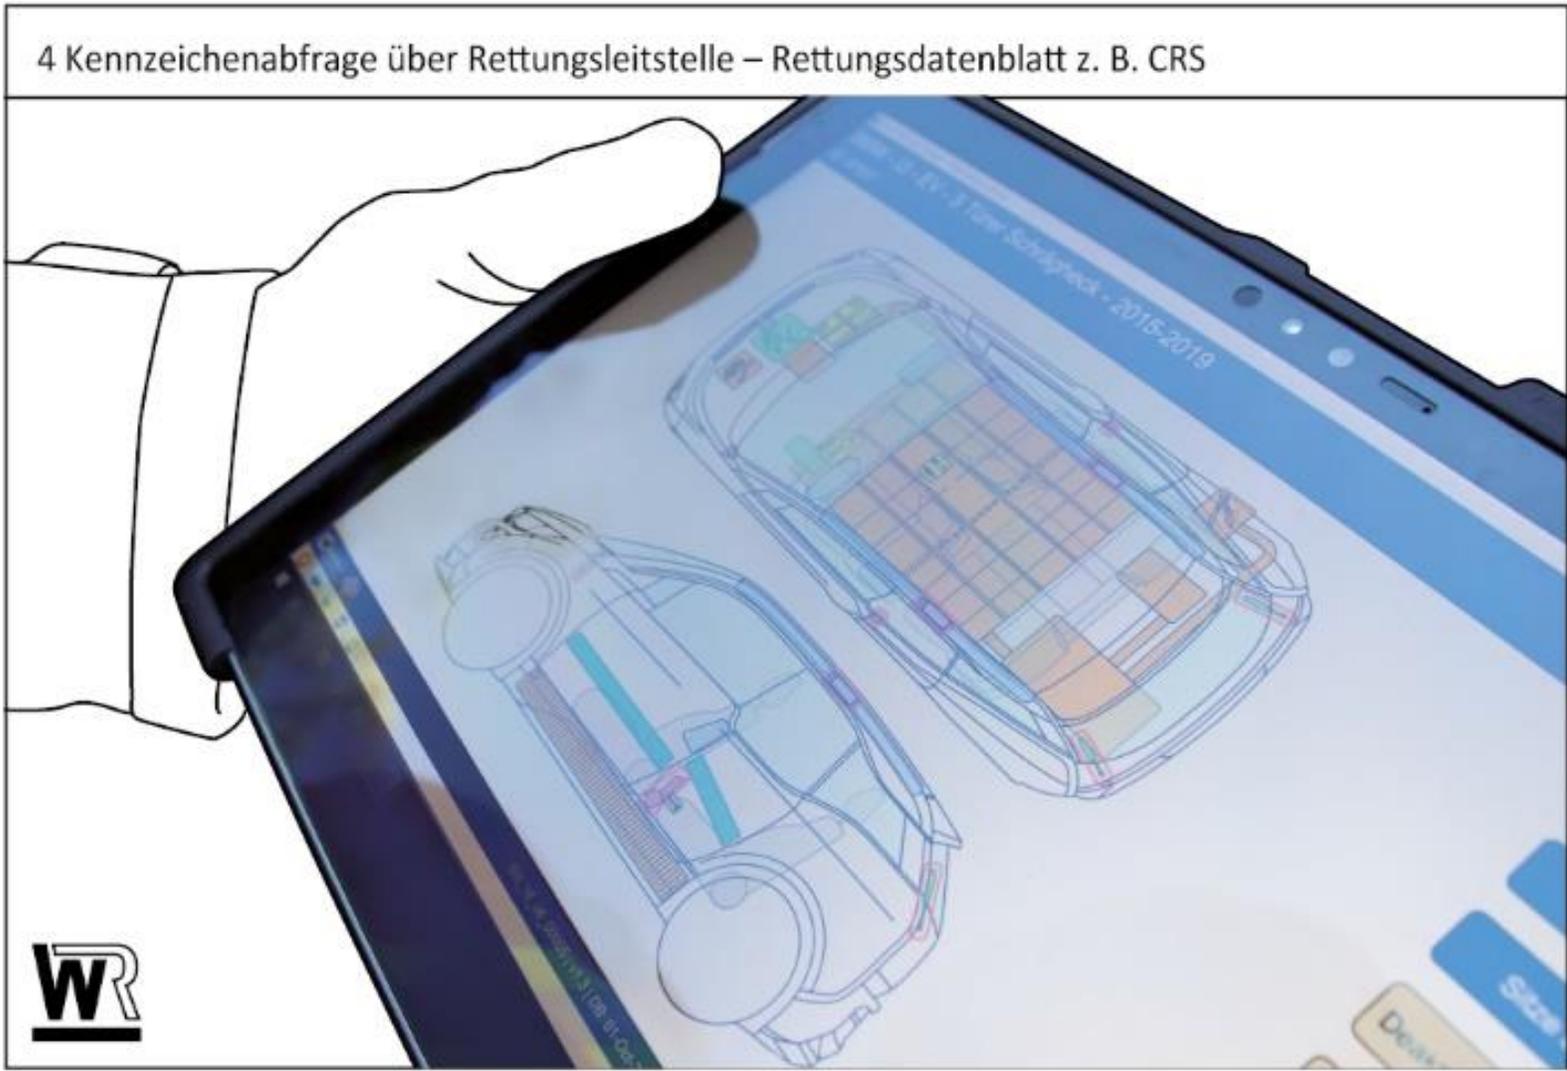

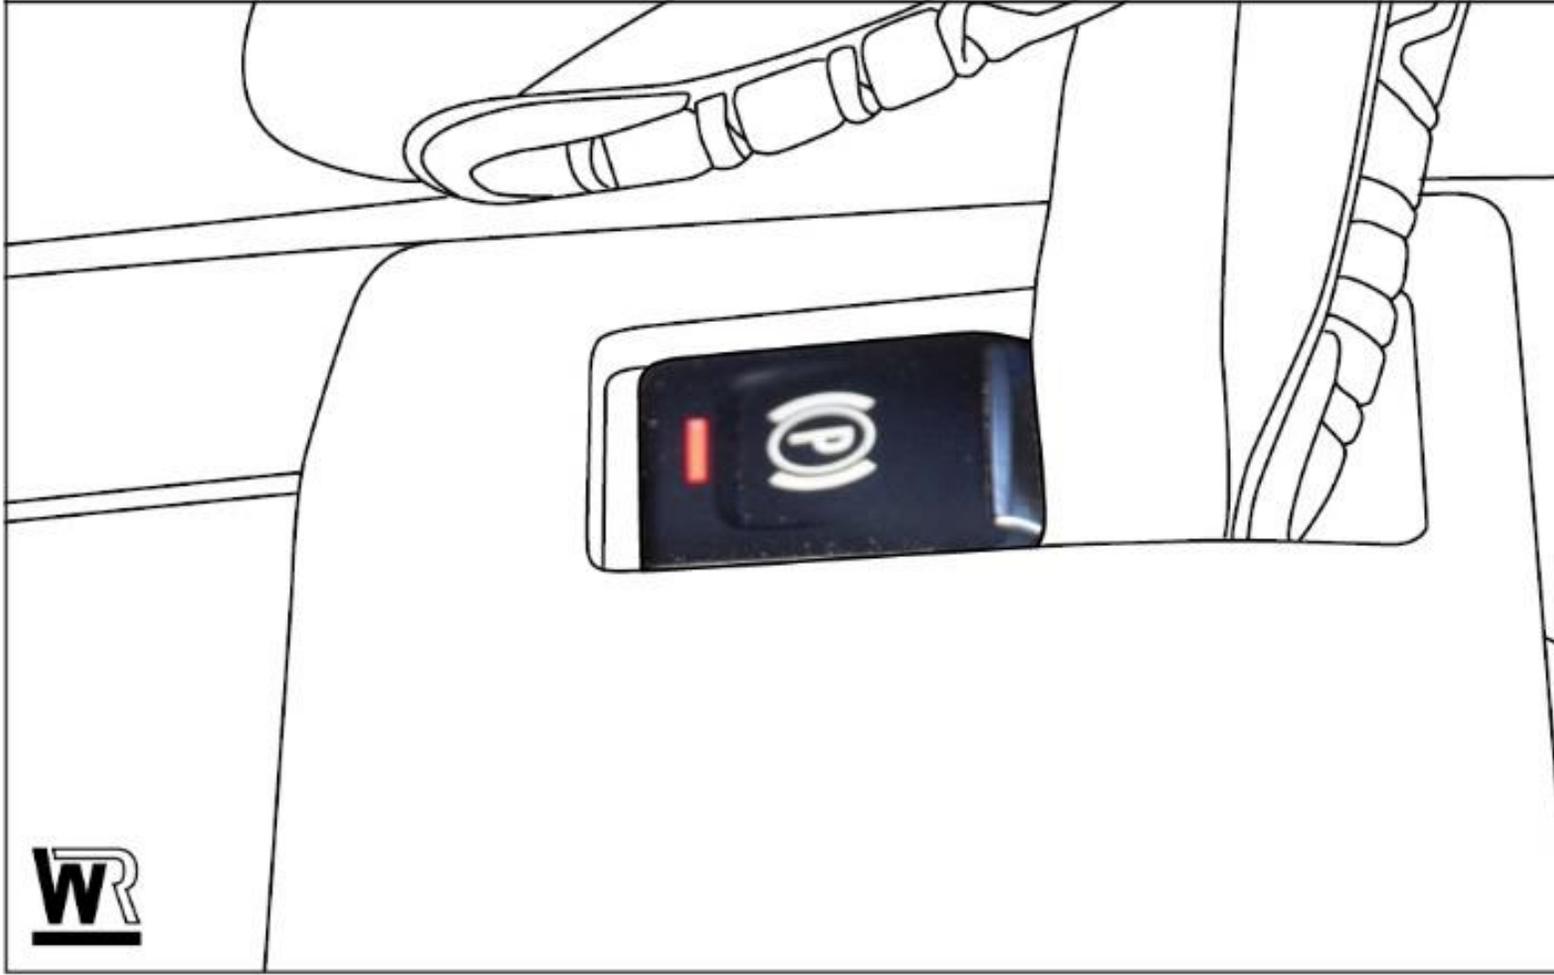

2 AUTO-Regel: Tankdeckel öffnen, Hinweis auf Benzin, Diesel, Gas, Elektro-Antrieb

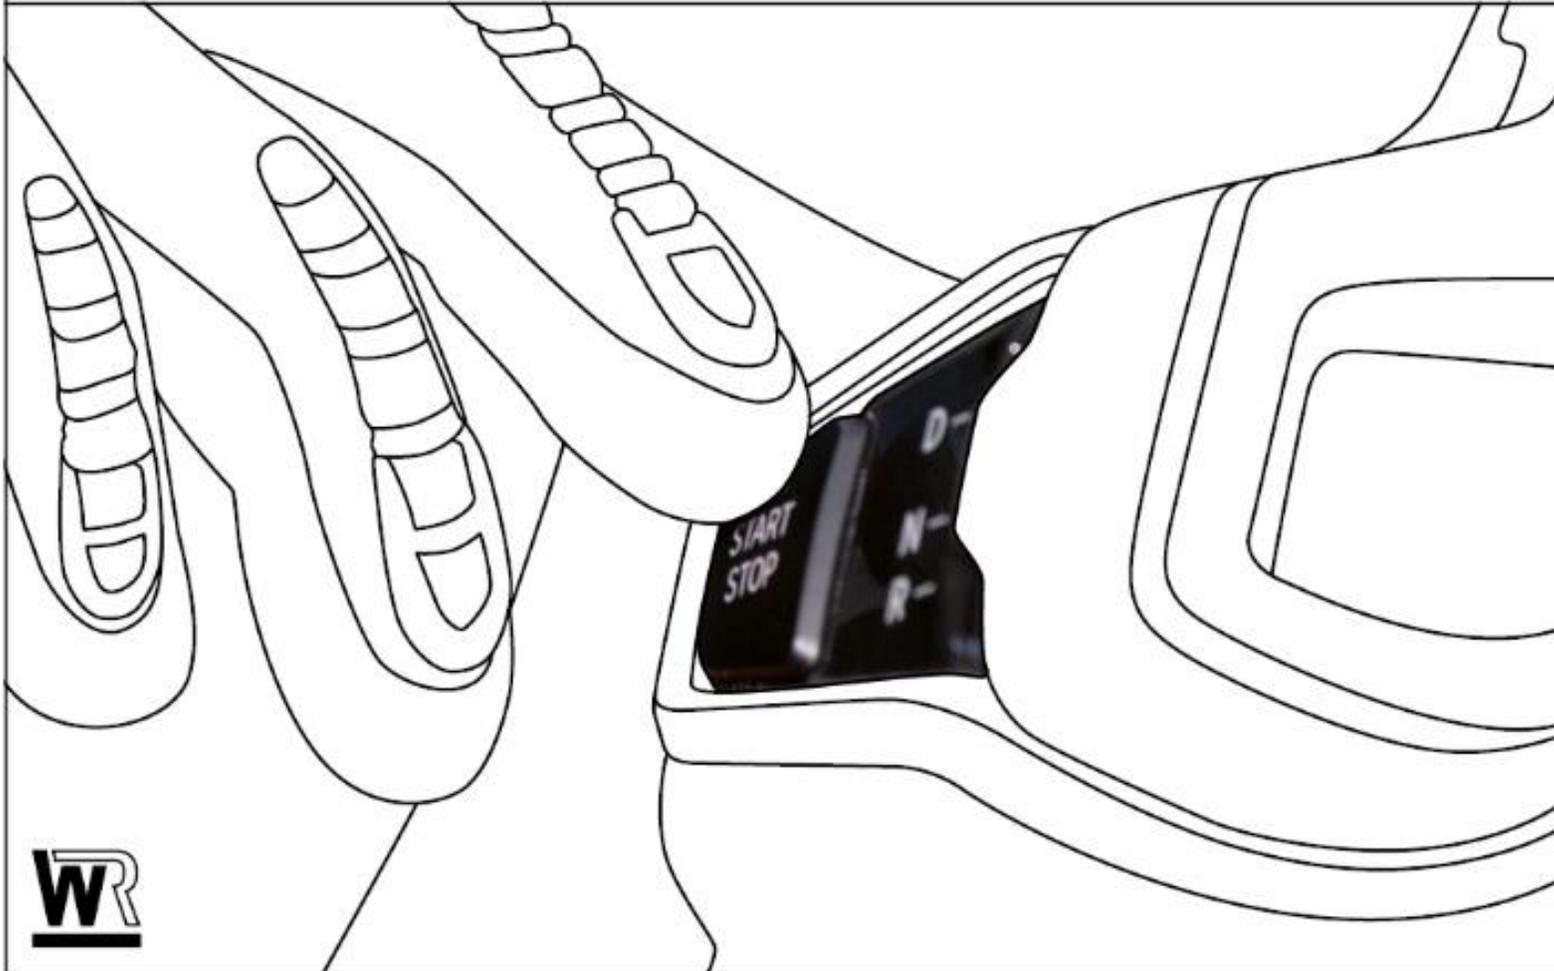

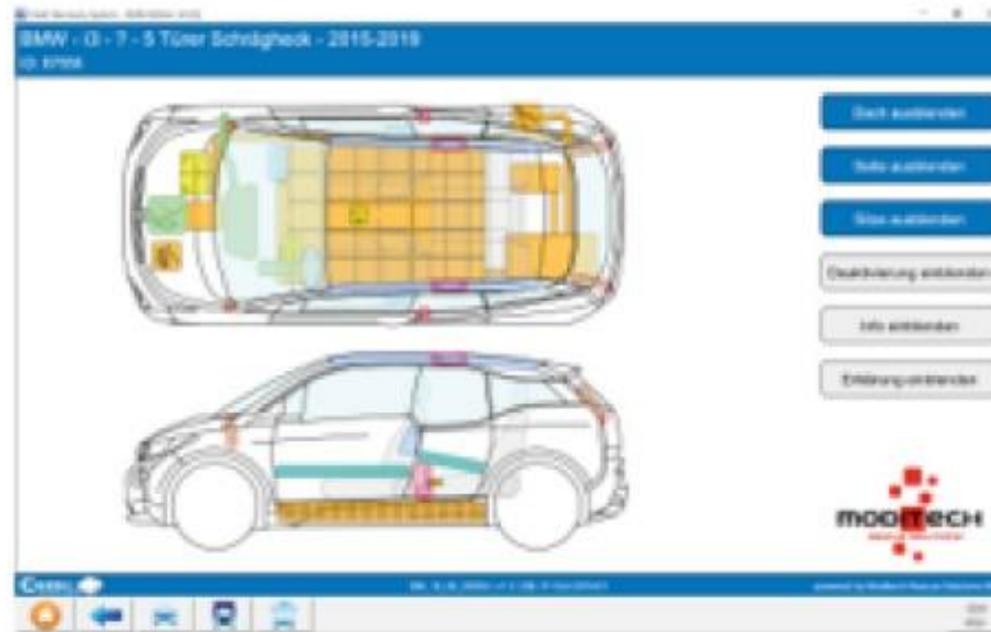

5 Parkbremse bzw. Handbremse aktivieren

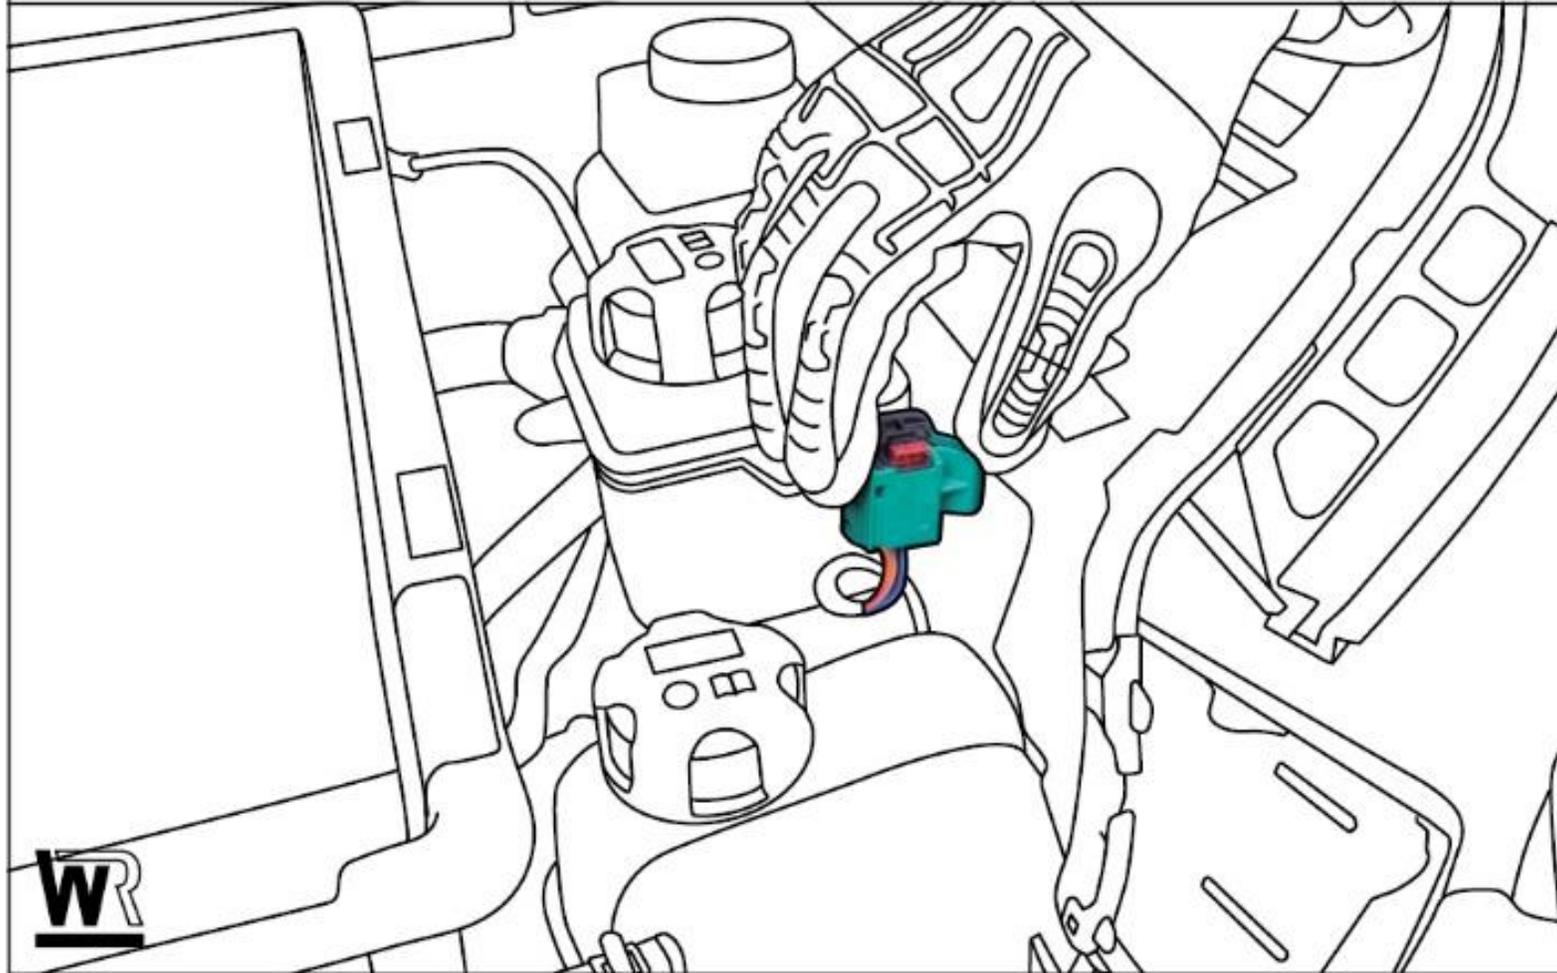

6 Fahrzeugmotor ausschalten – Stop-Taste drücken oder über Schlüssel

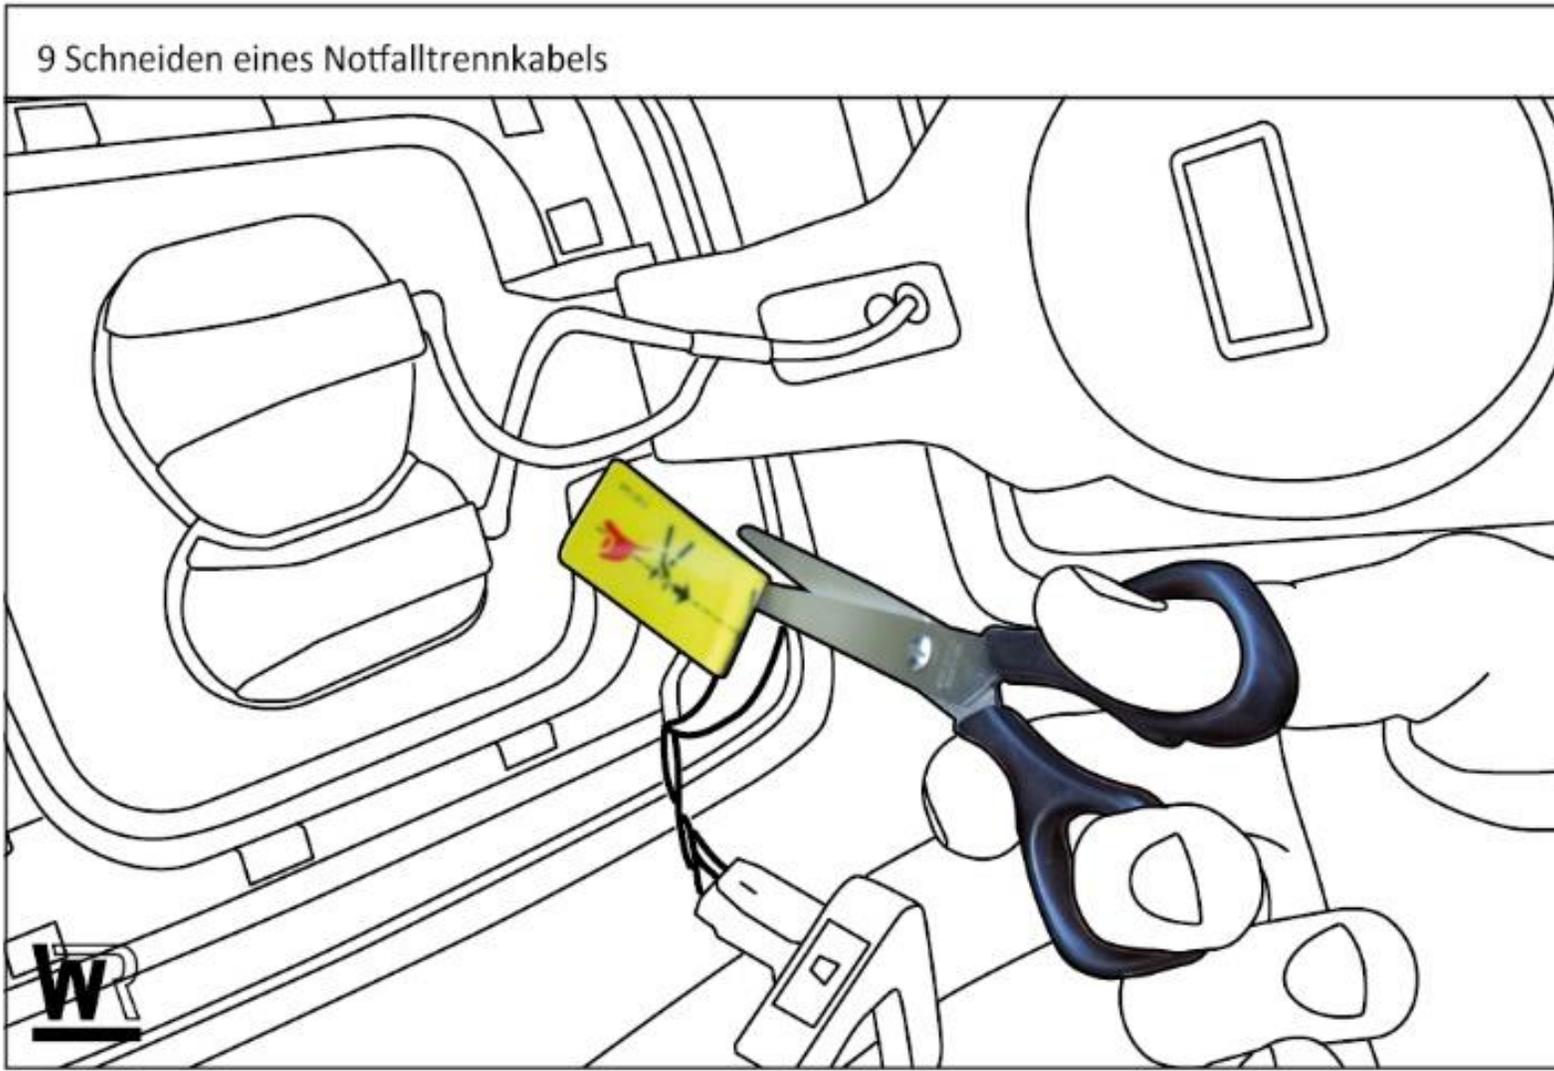

7 Deaktivierung des Unfallfahrzeuges nach Herstellerangaben

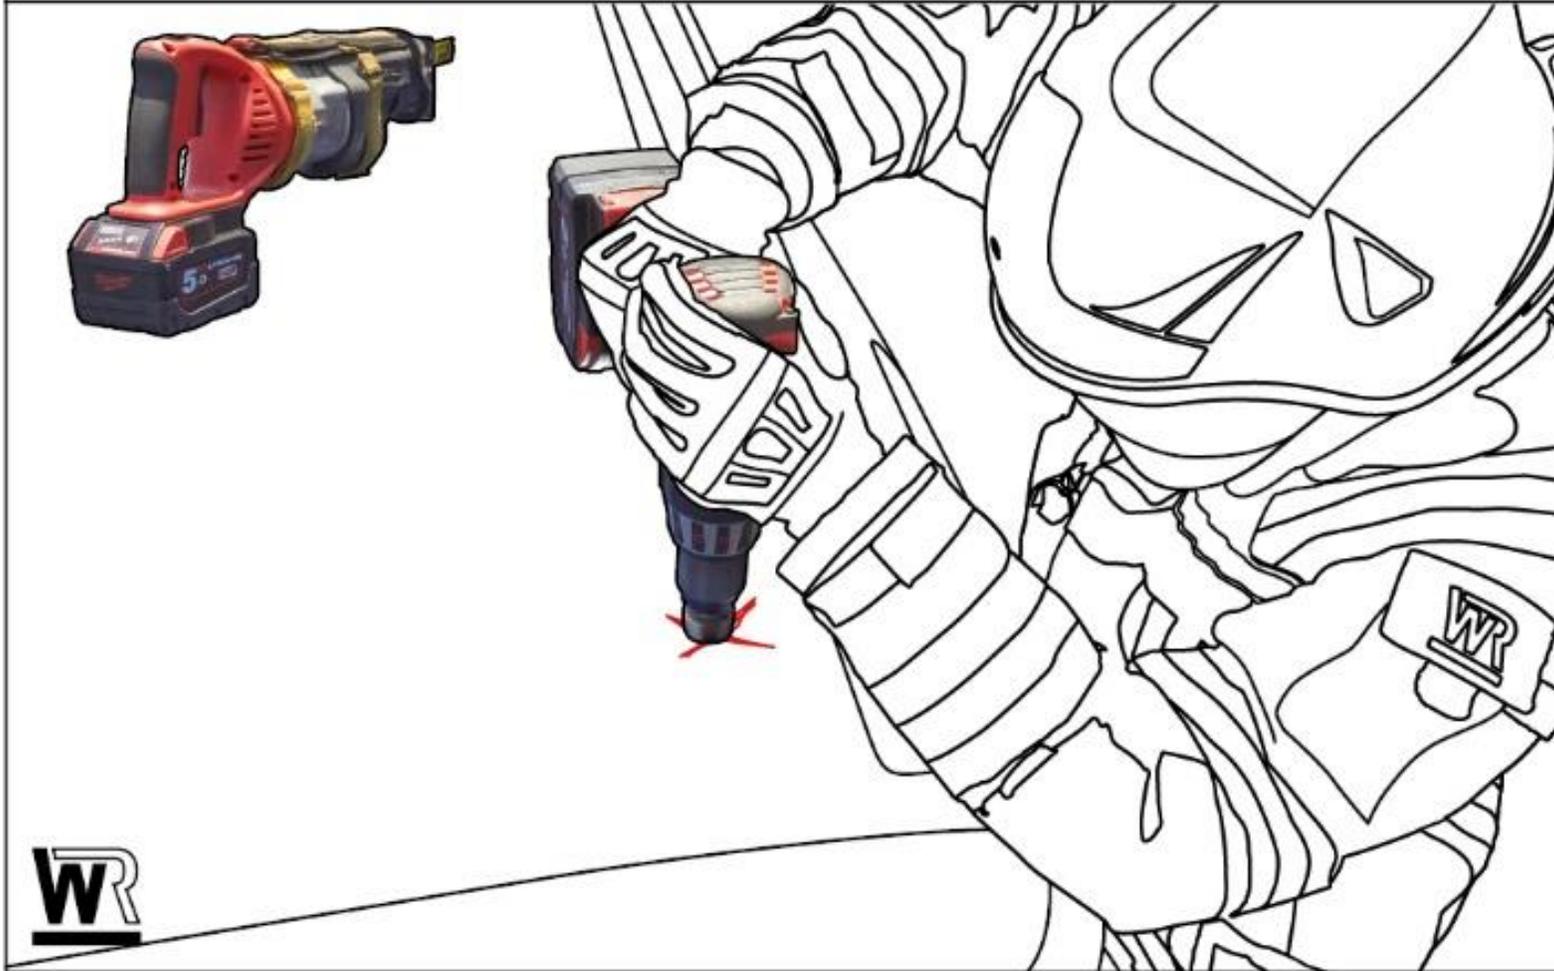

8 Trennen des Servicesteckers

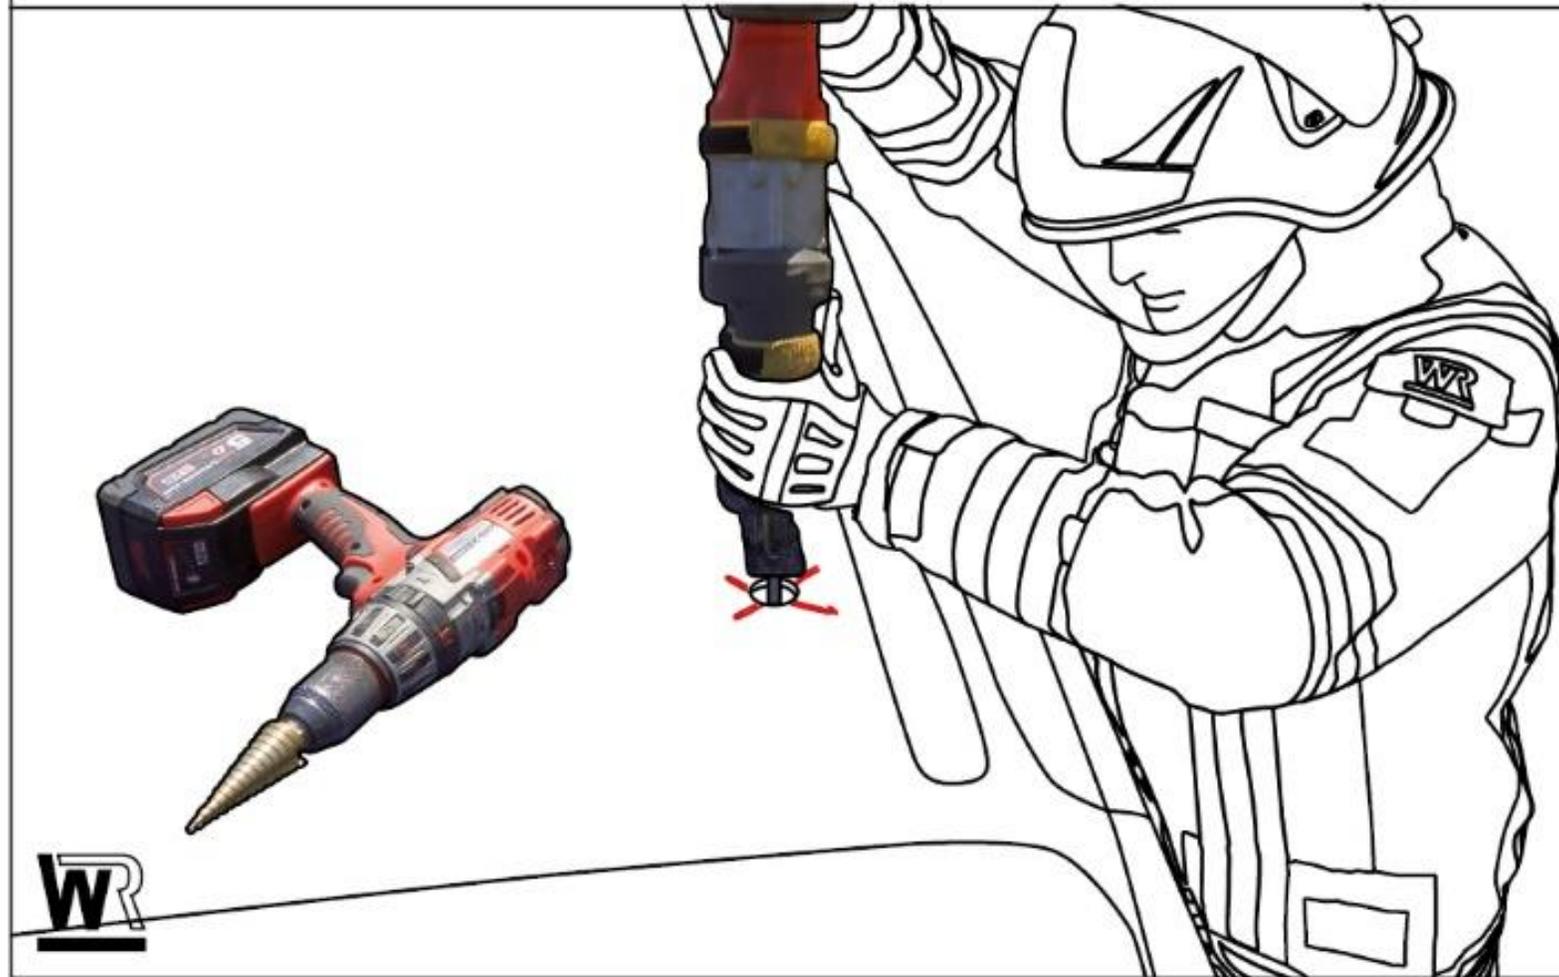

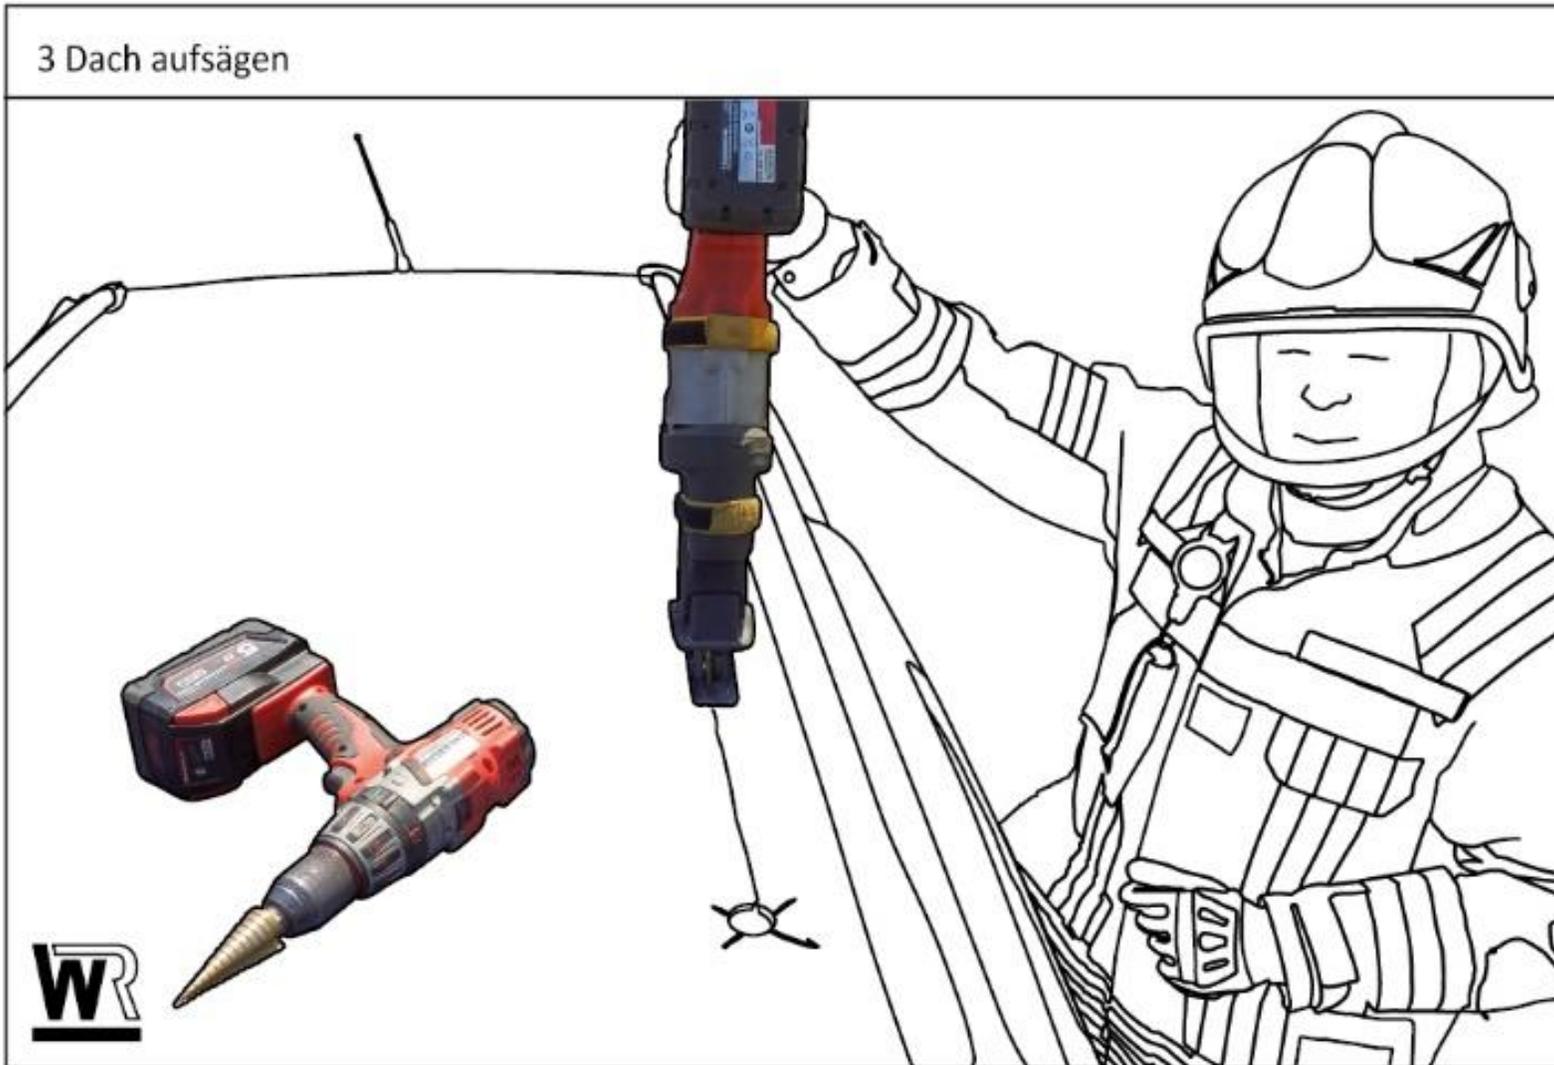

1 Loch für Ansatz Säbelsäge in Dach bohren

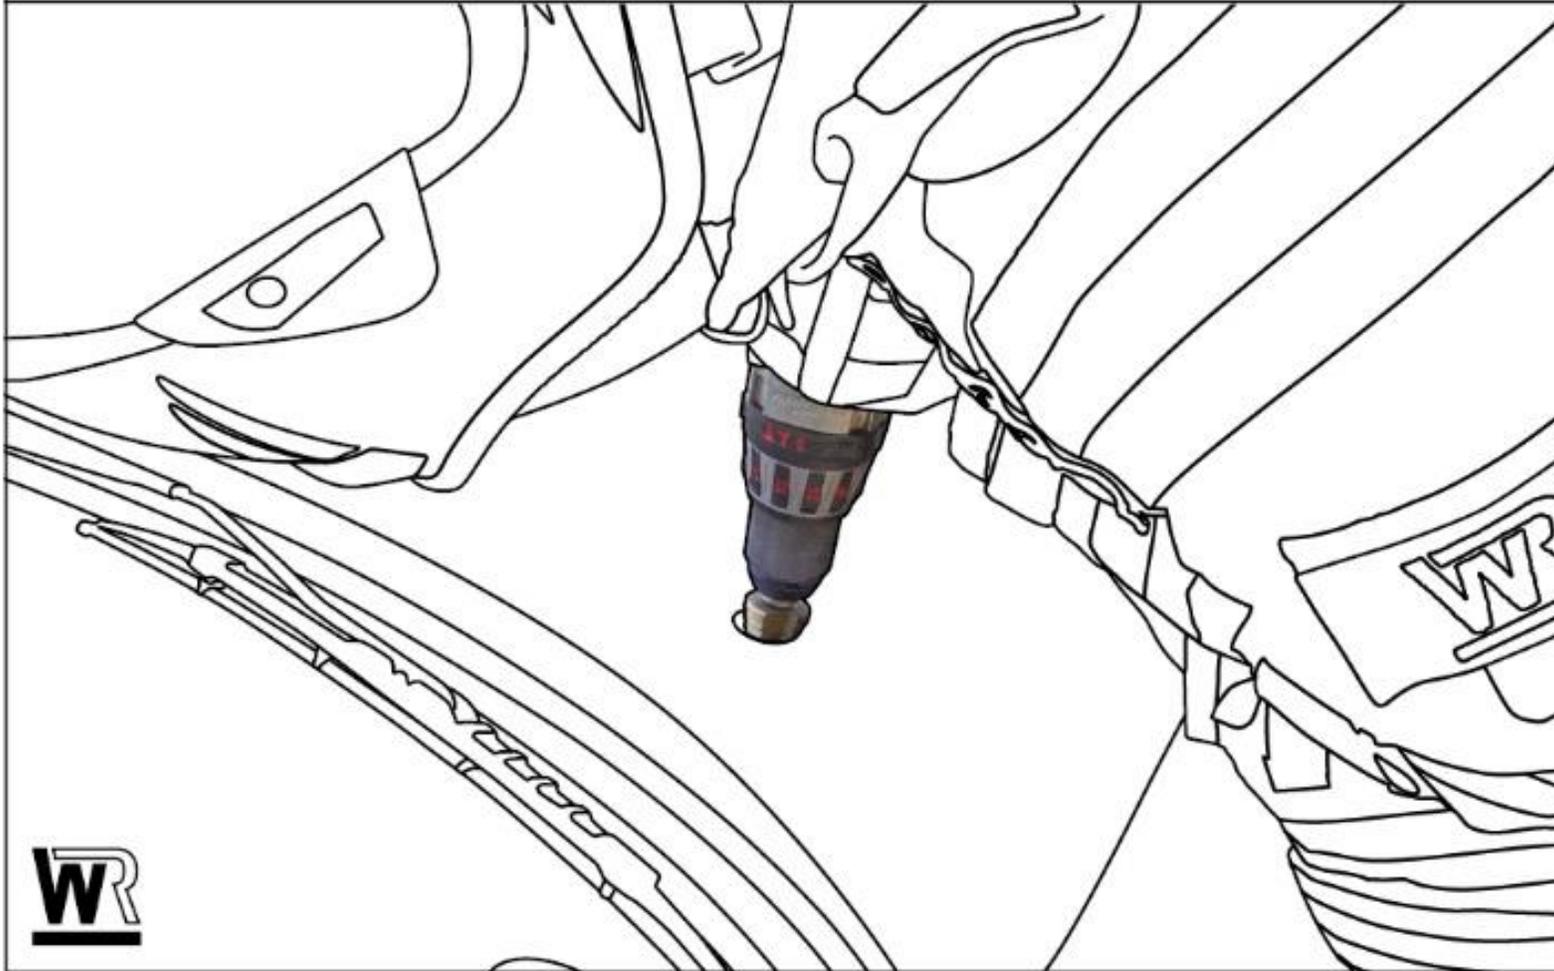

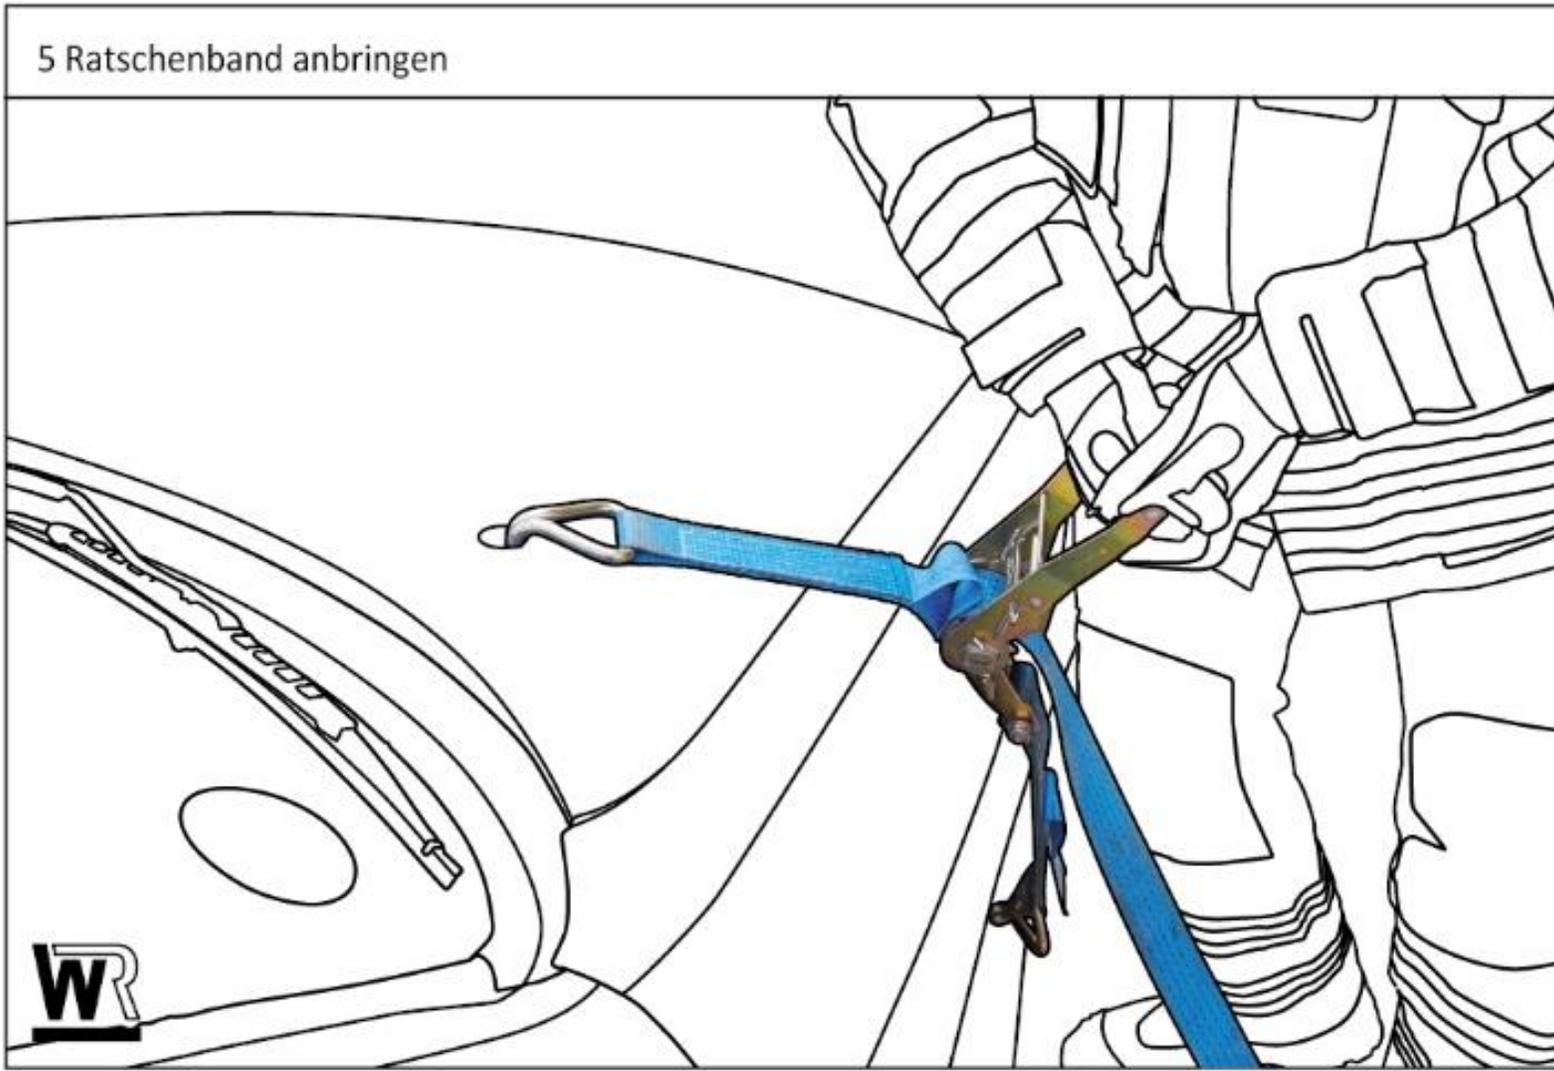

2 Säbelsäge ansetzen

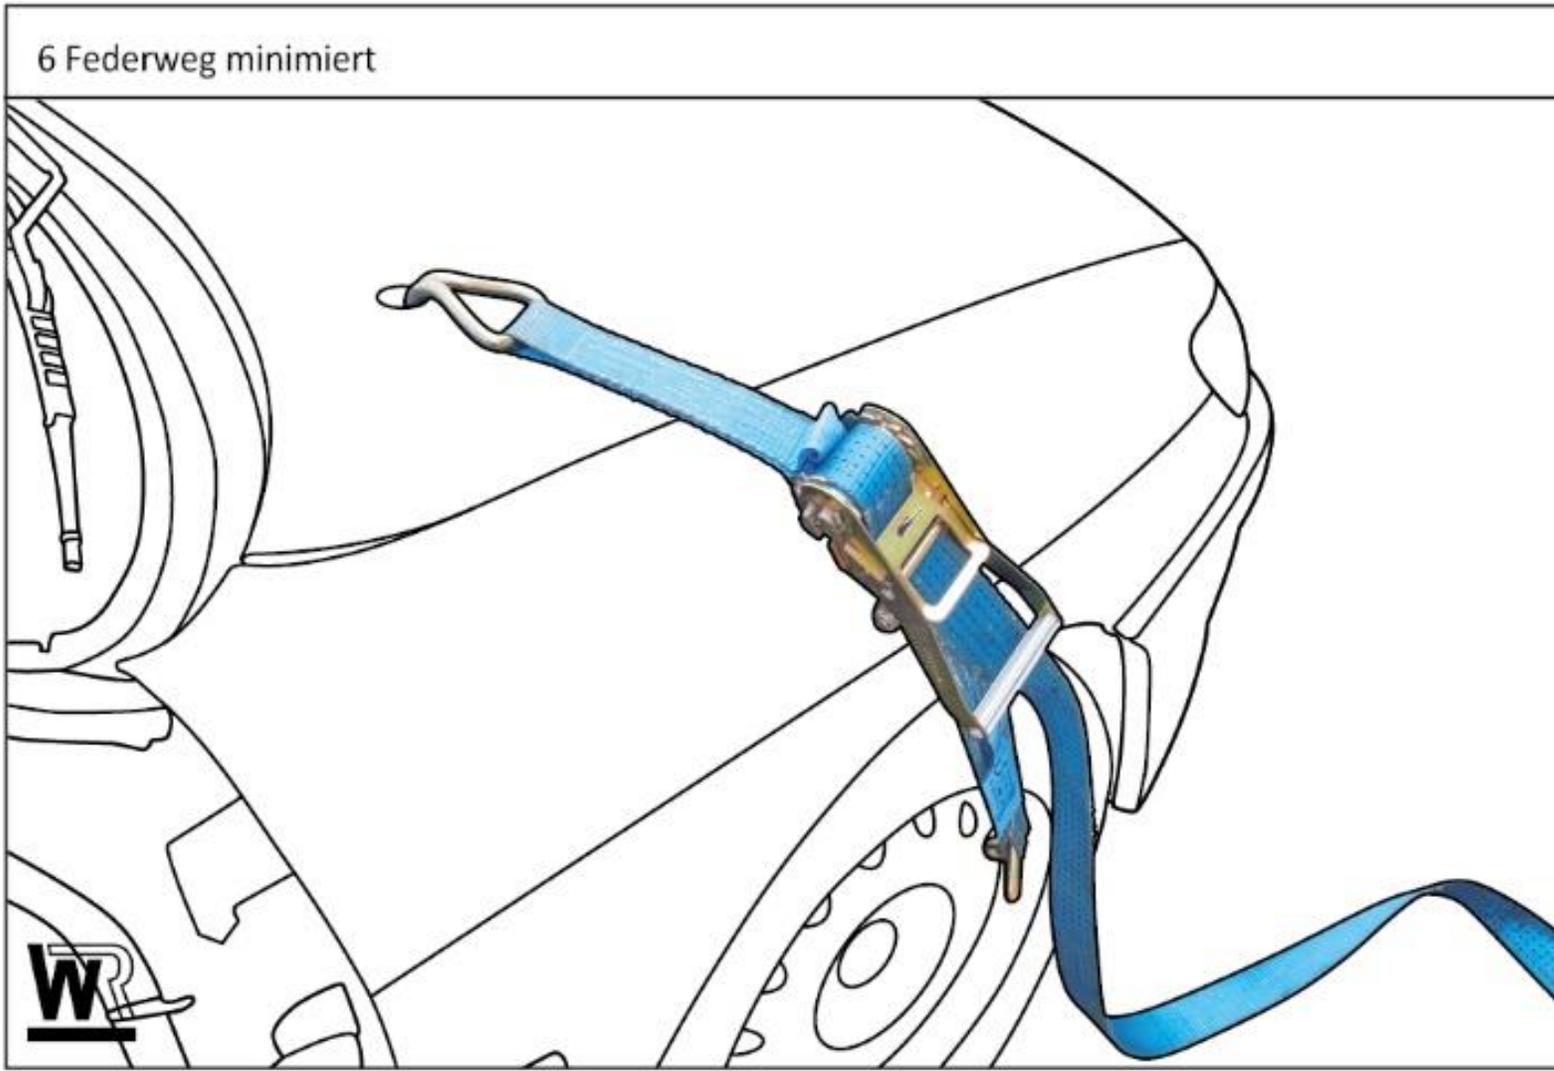

4 Loch für Ansatz Ratschenband in Motorhaube bohren

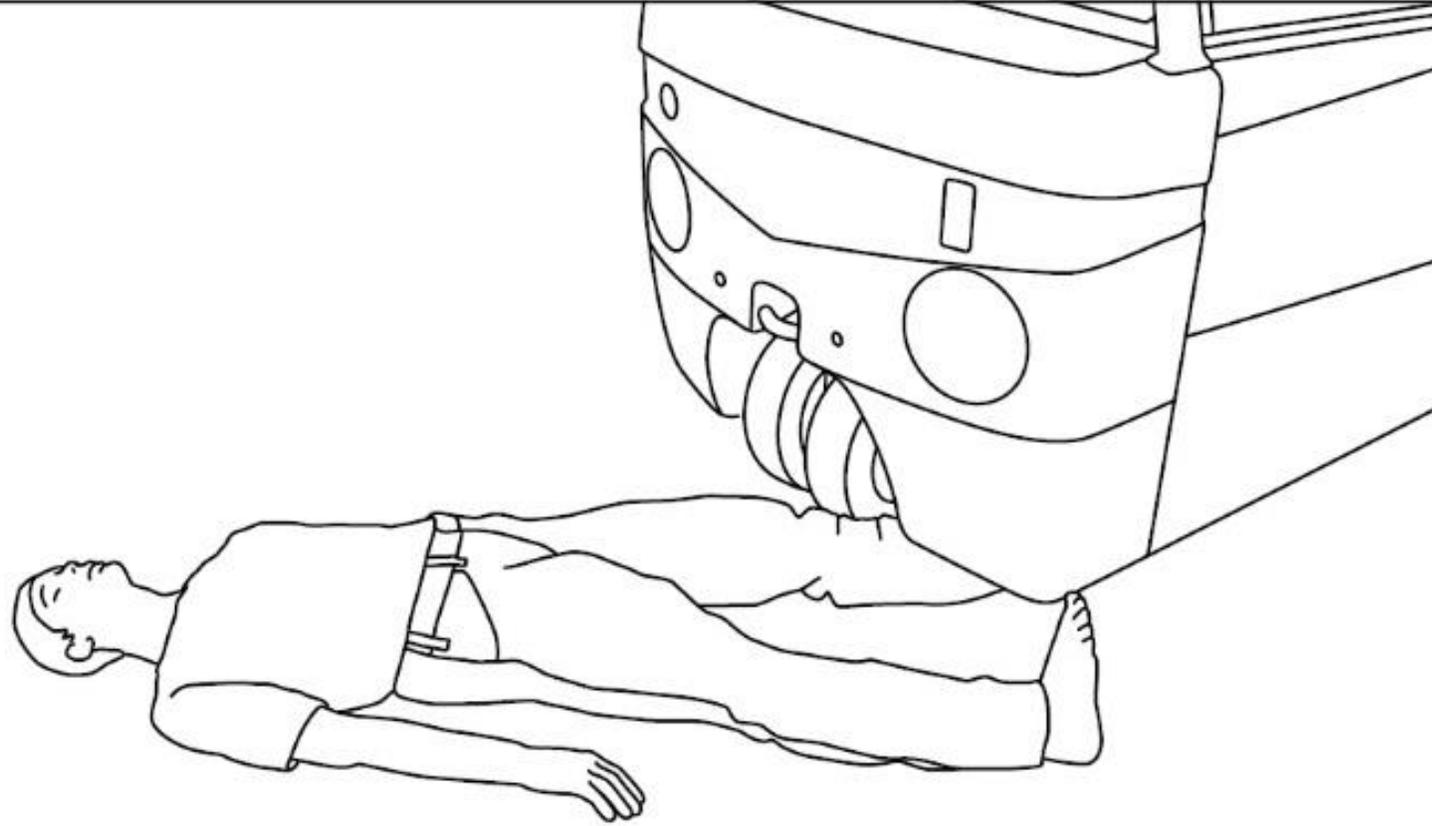

1 Equipment: Büffel, Stab-PACK

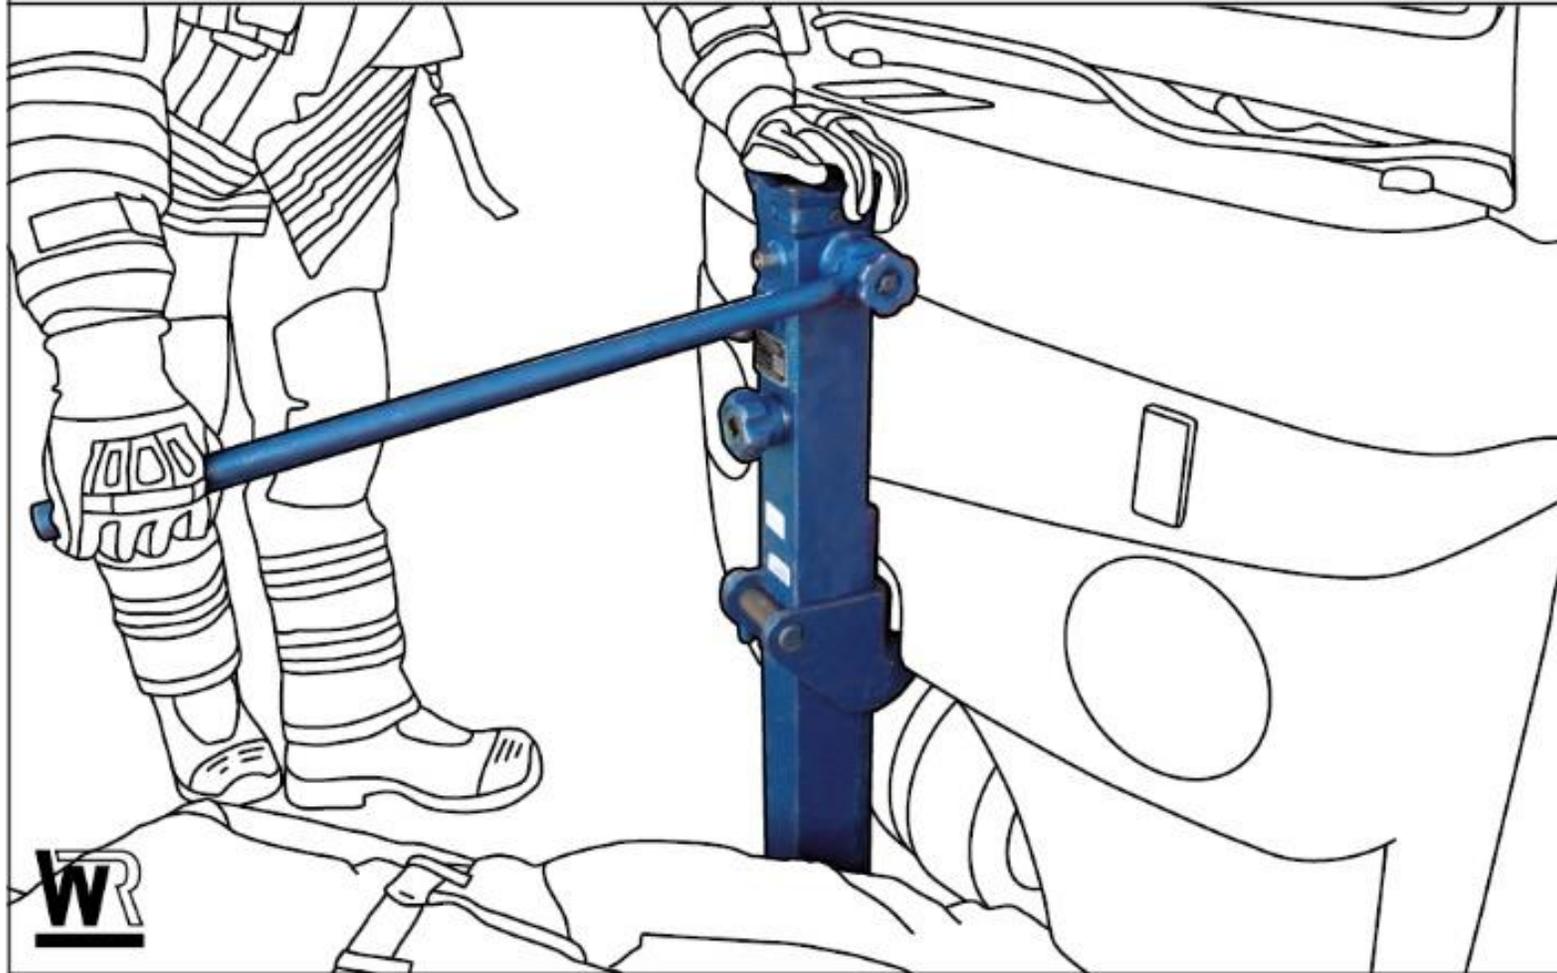

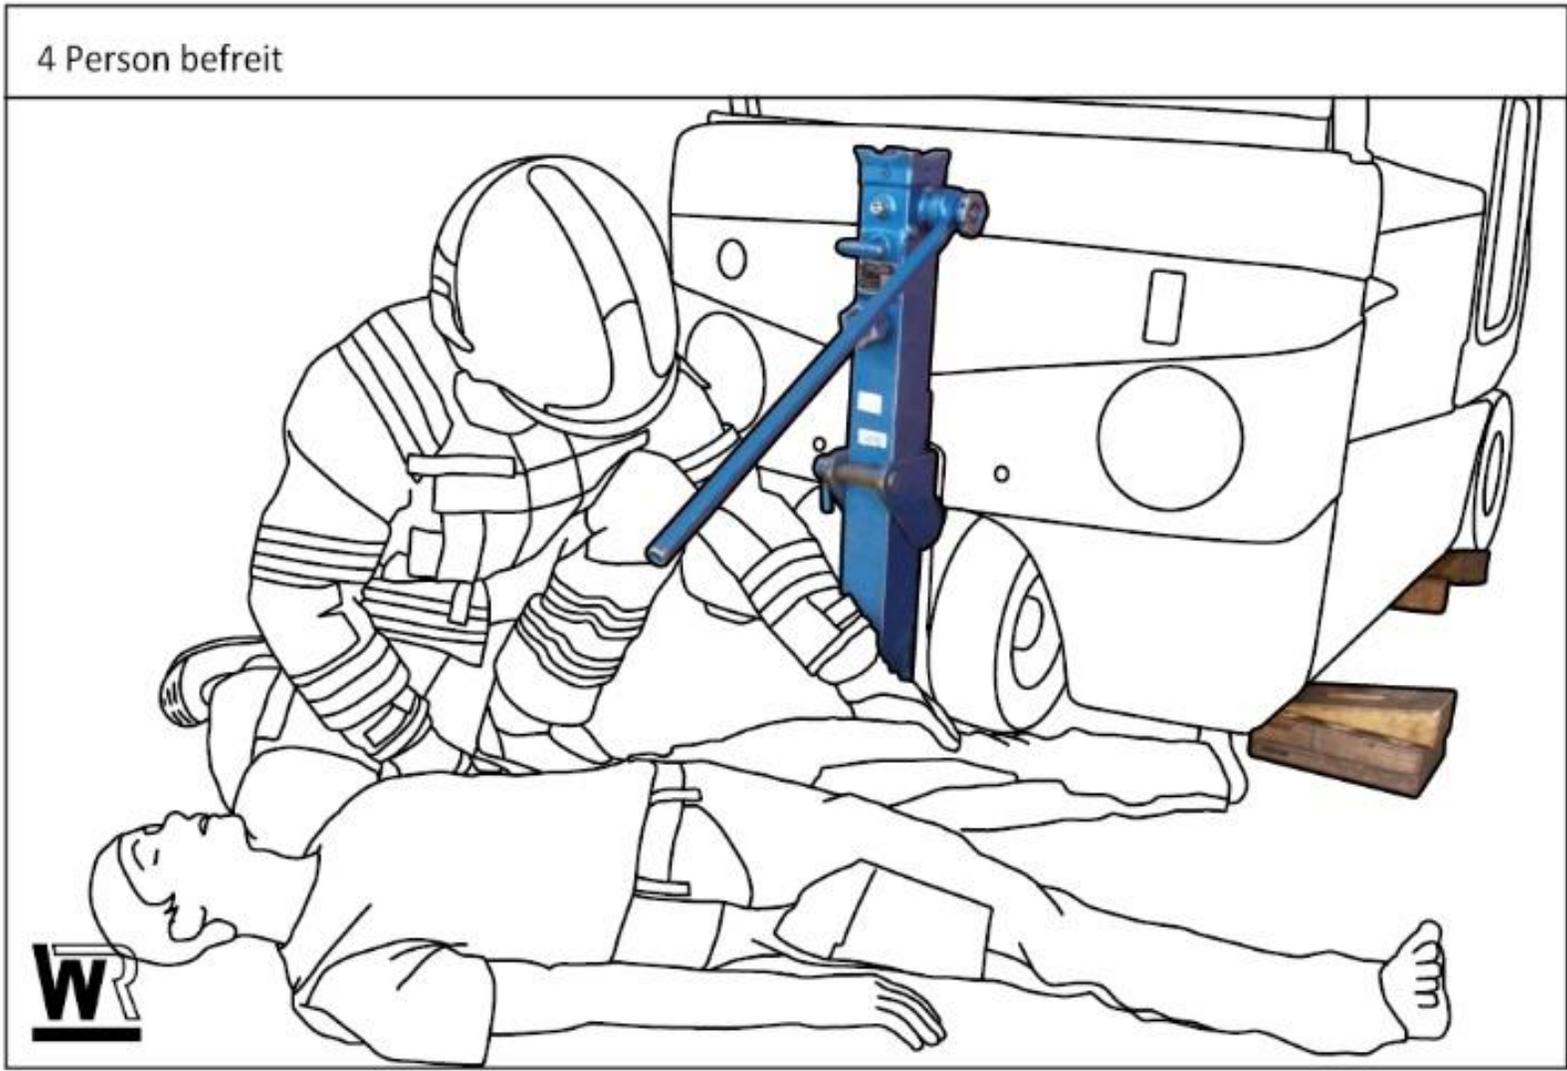

2 Person unter Stapler eingeklemmt

3 Beidseitig mit STAB-PACK unterbauen, Büffel ansetzen und Stapler anheben

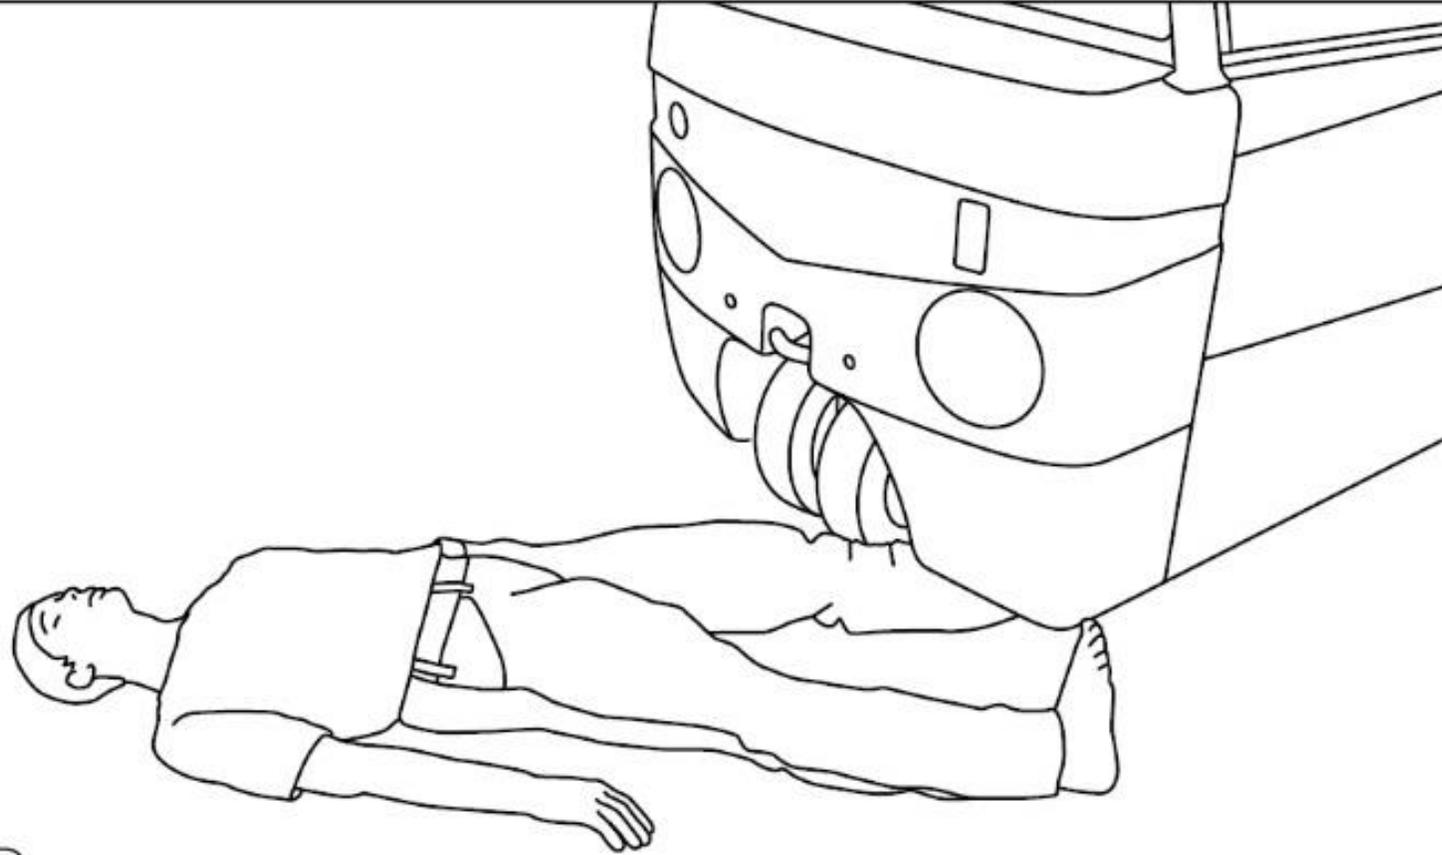

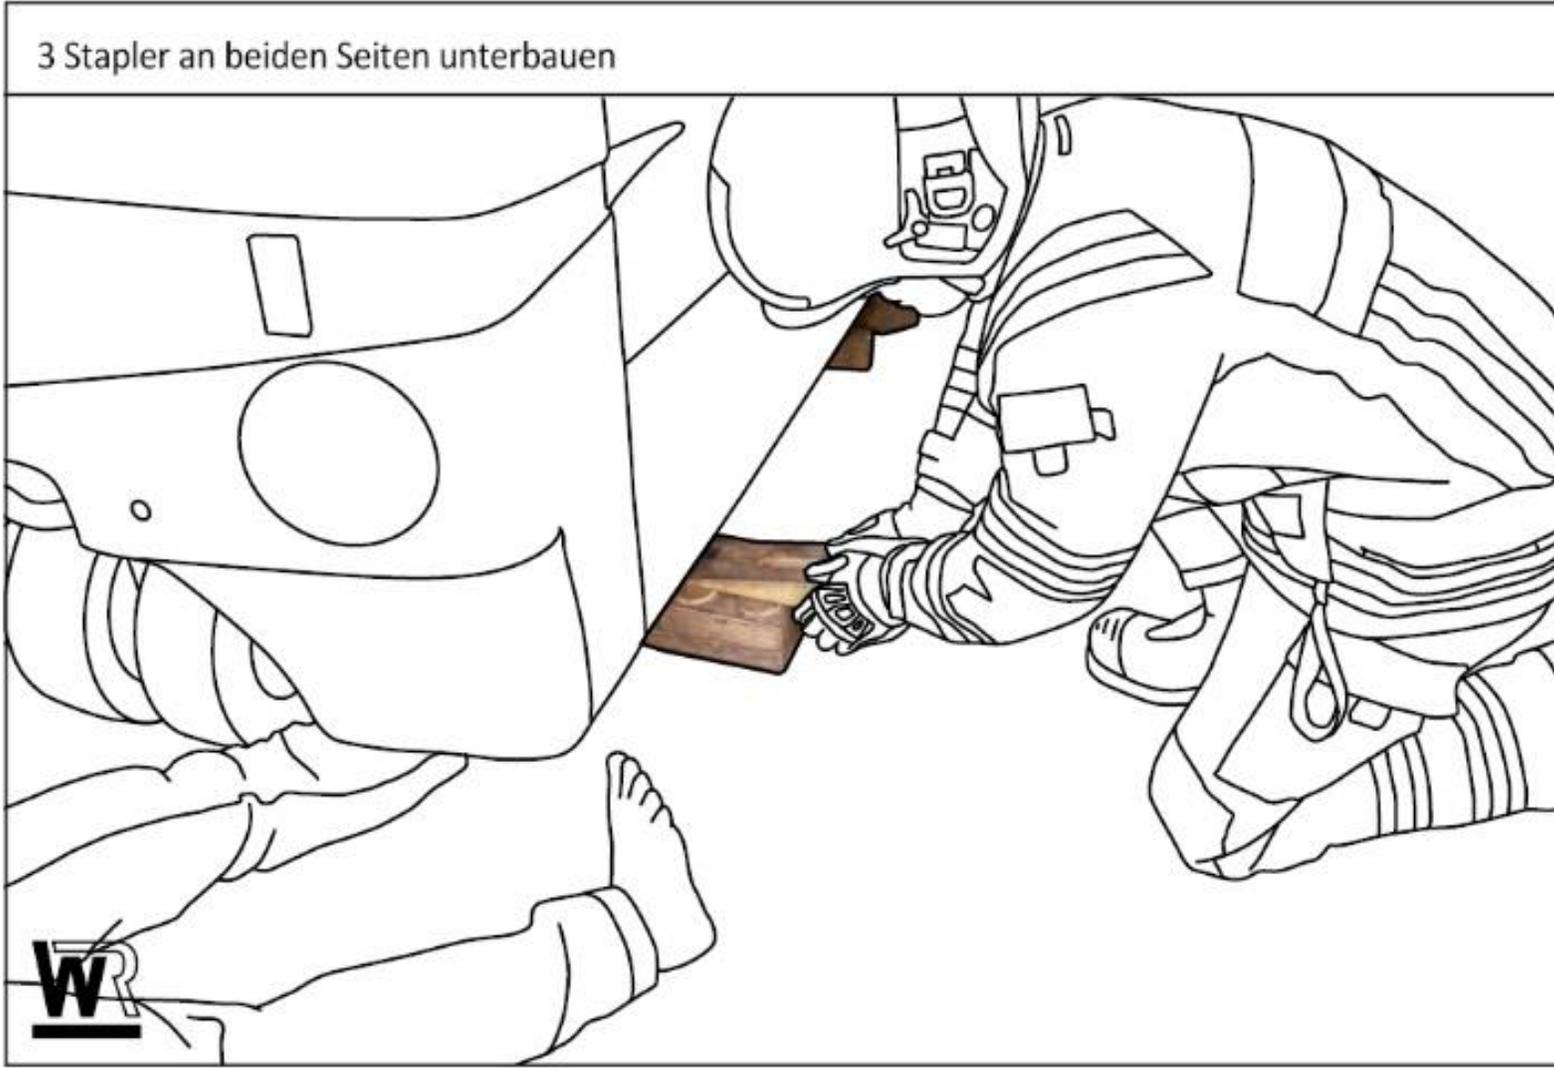

1 Equipment: Zwei Hebekissen FLAT-BAG inkl. Zubehör, Stab-PACK

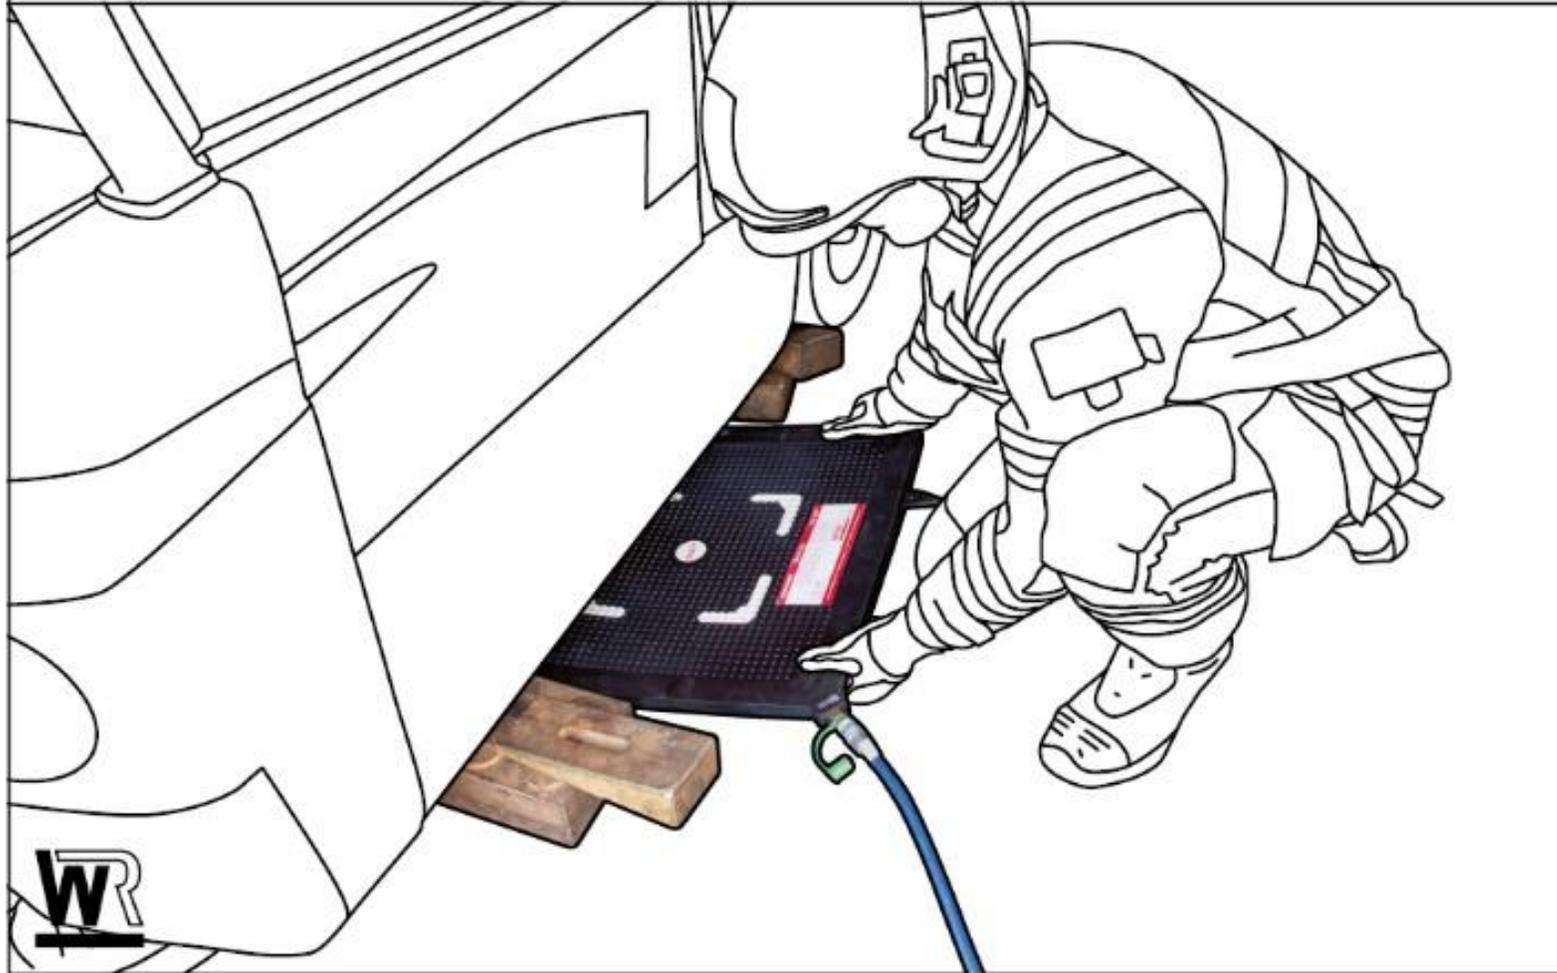

2 Person unter Stapler eingeklemmt

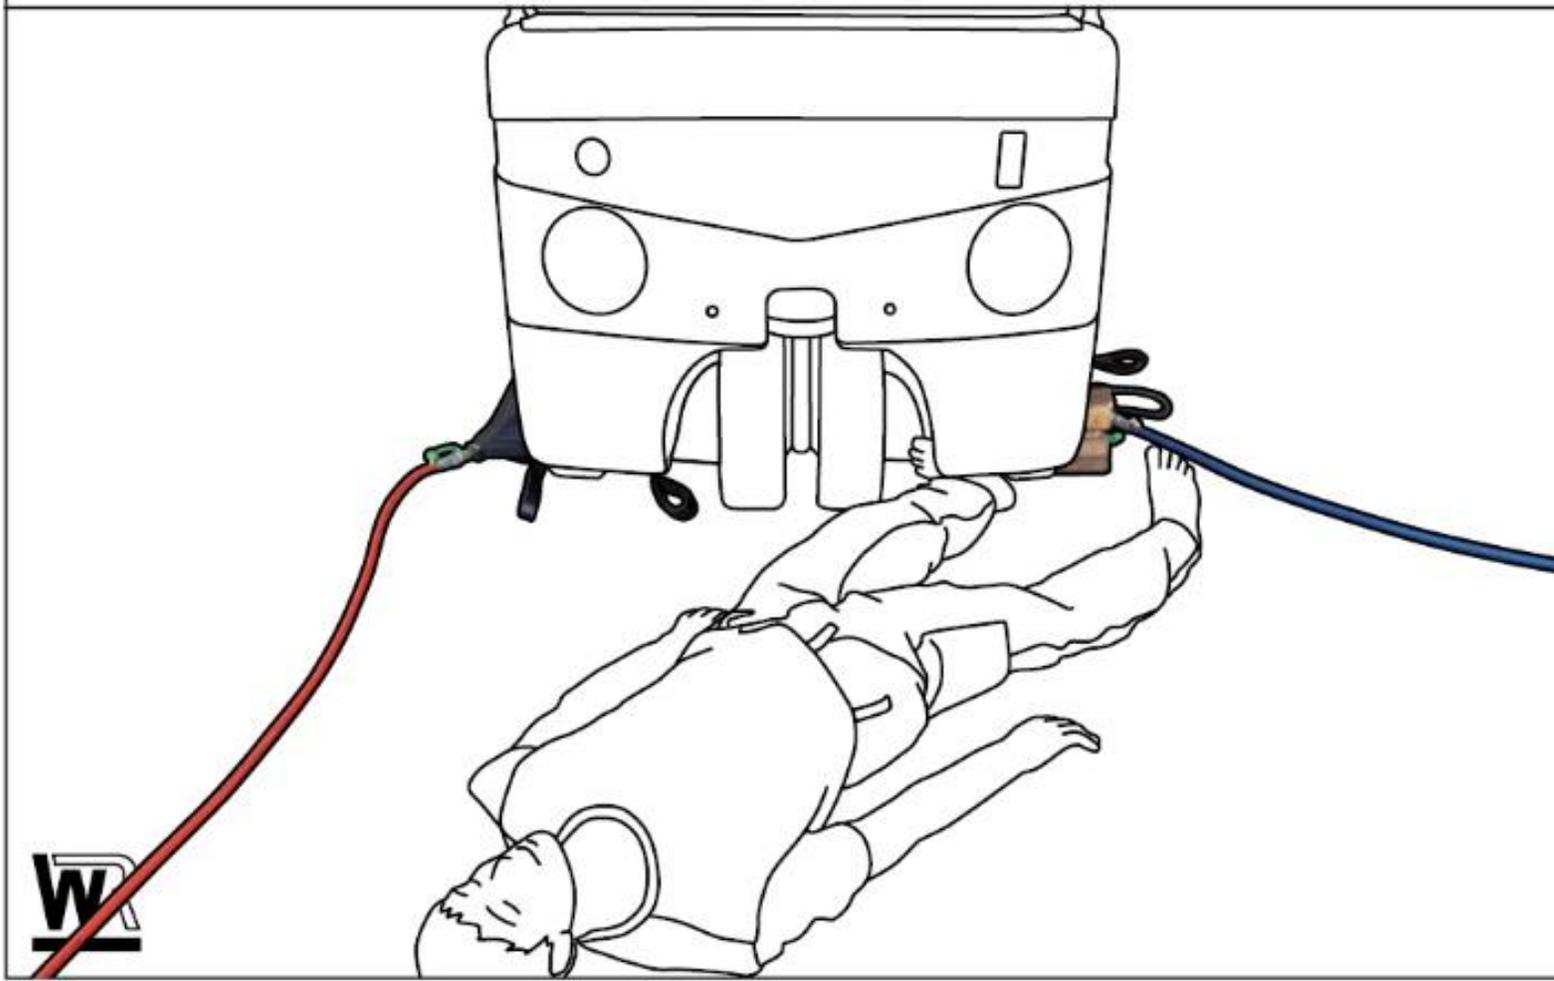

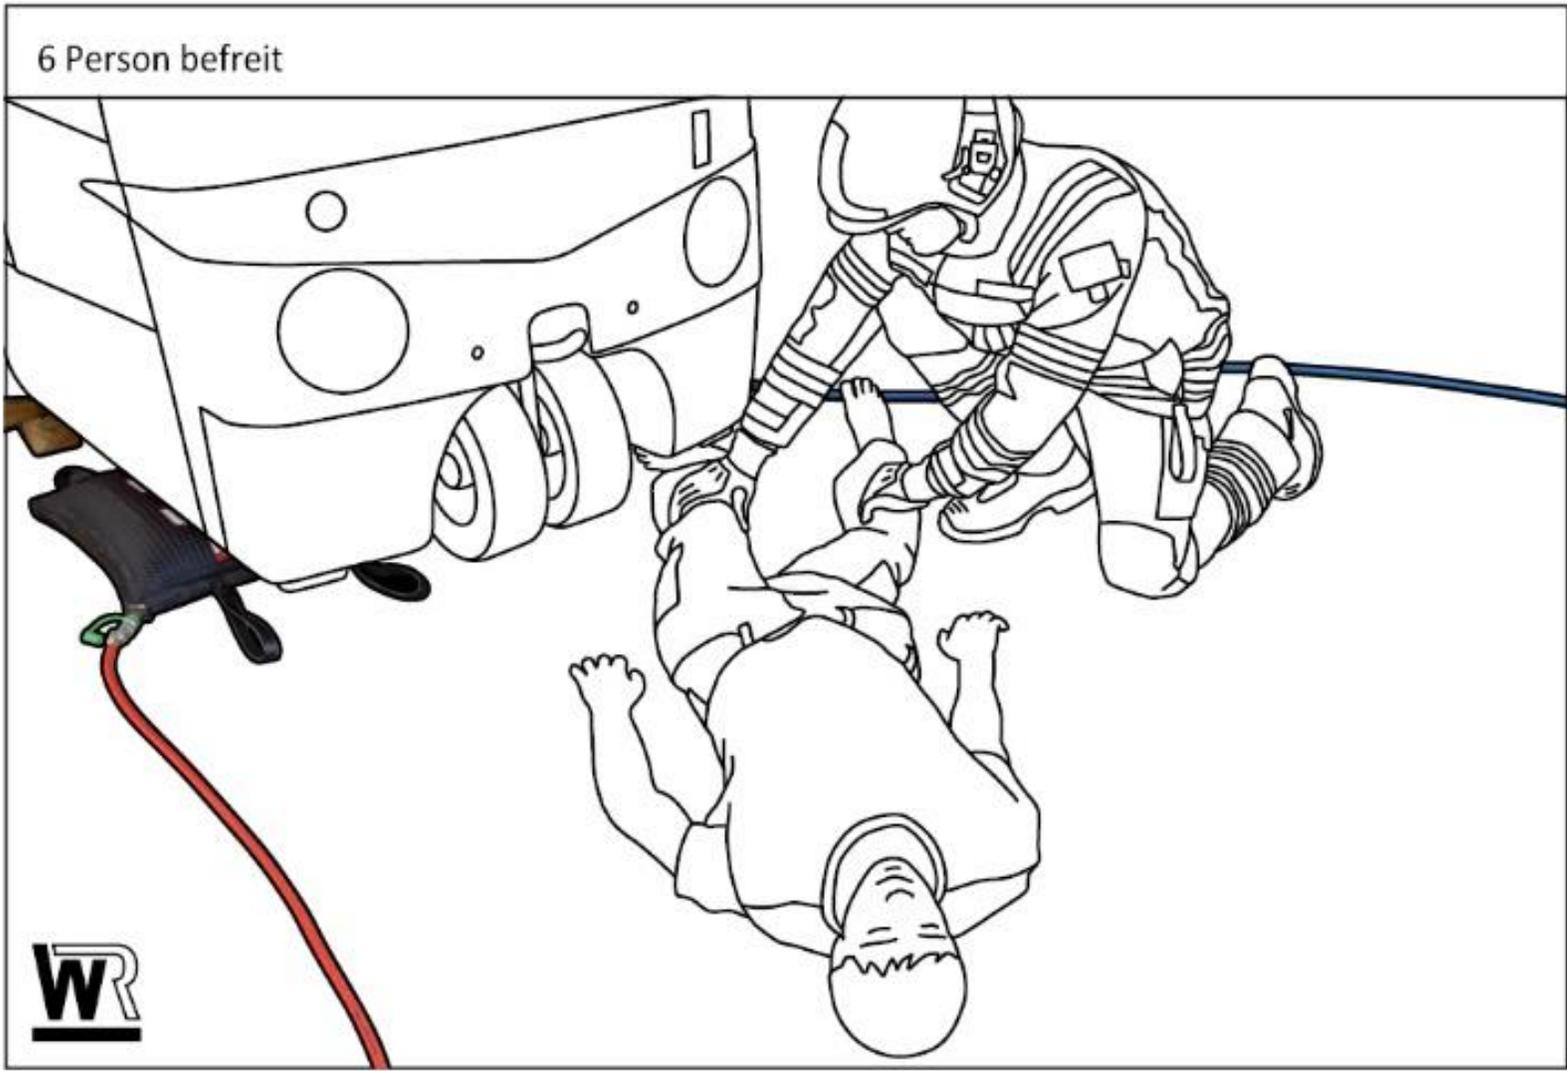

4 An beiden Seiten des Staplers die Hebekissen versetzt platzieren

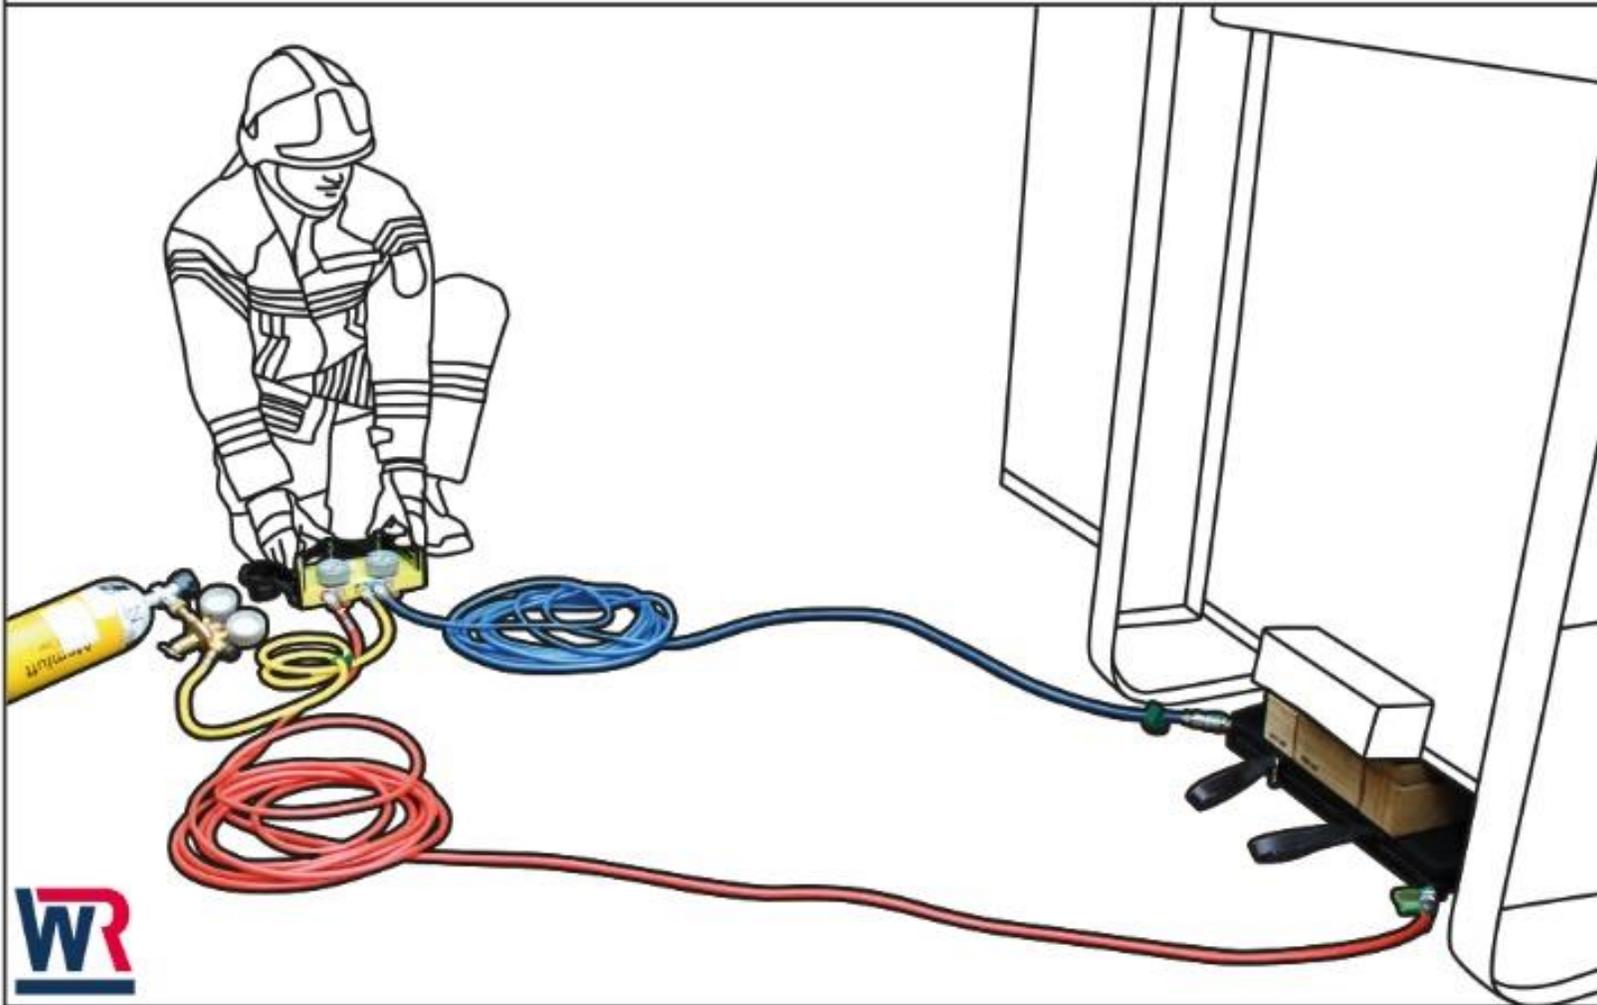

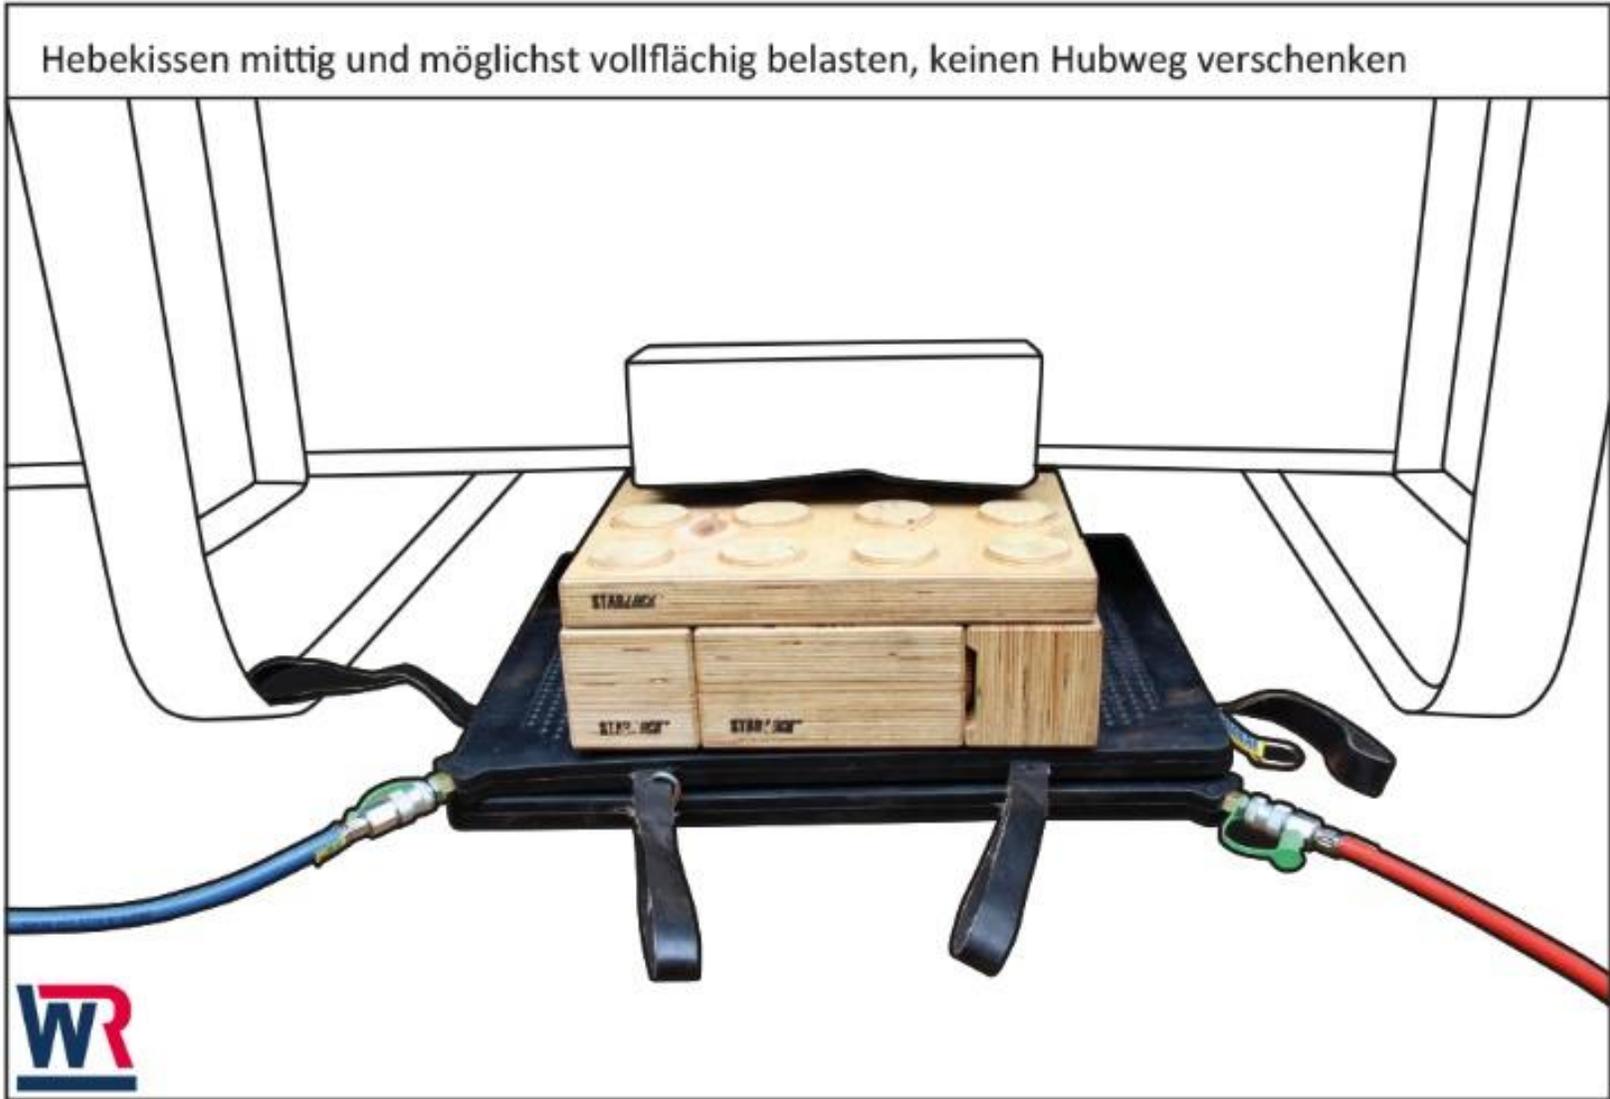

5 Hebekissen gleichzeitig aufblasen und Stapler anheben

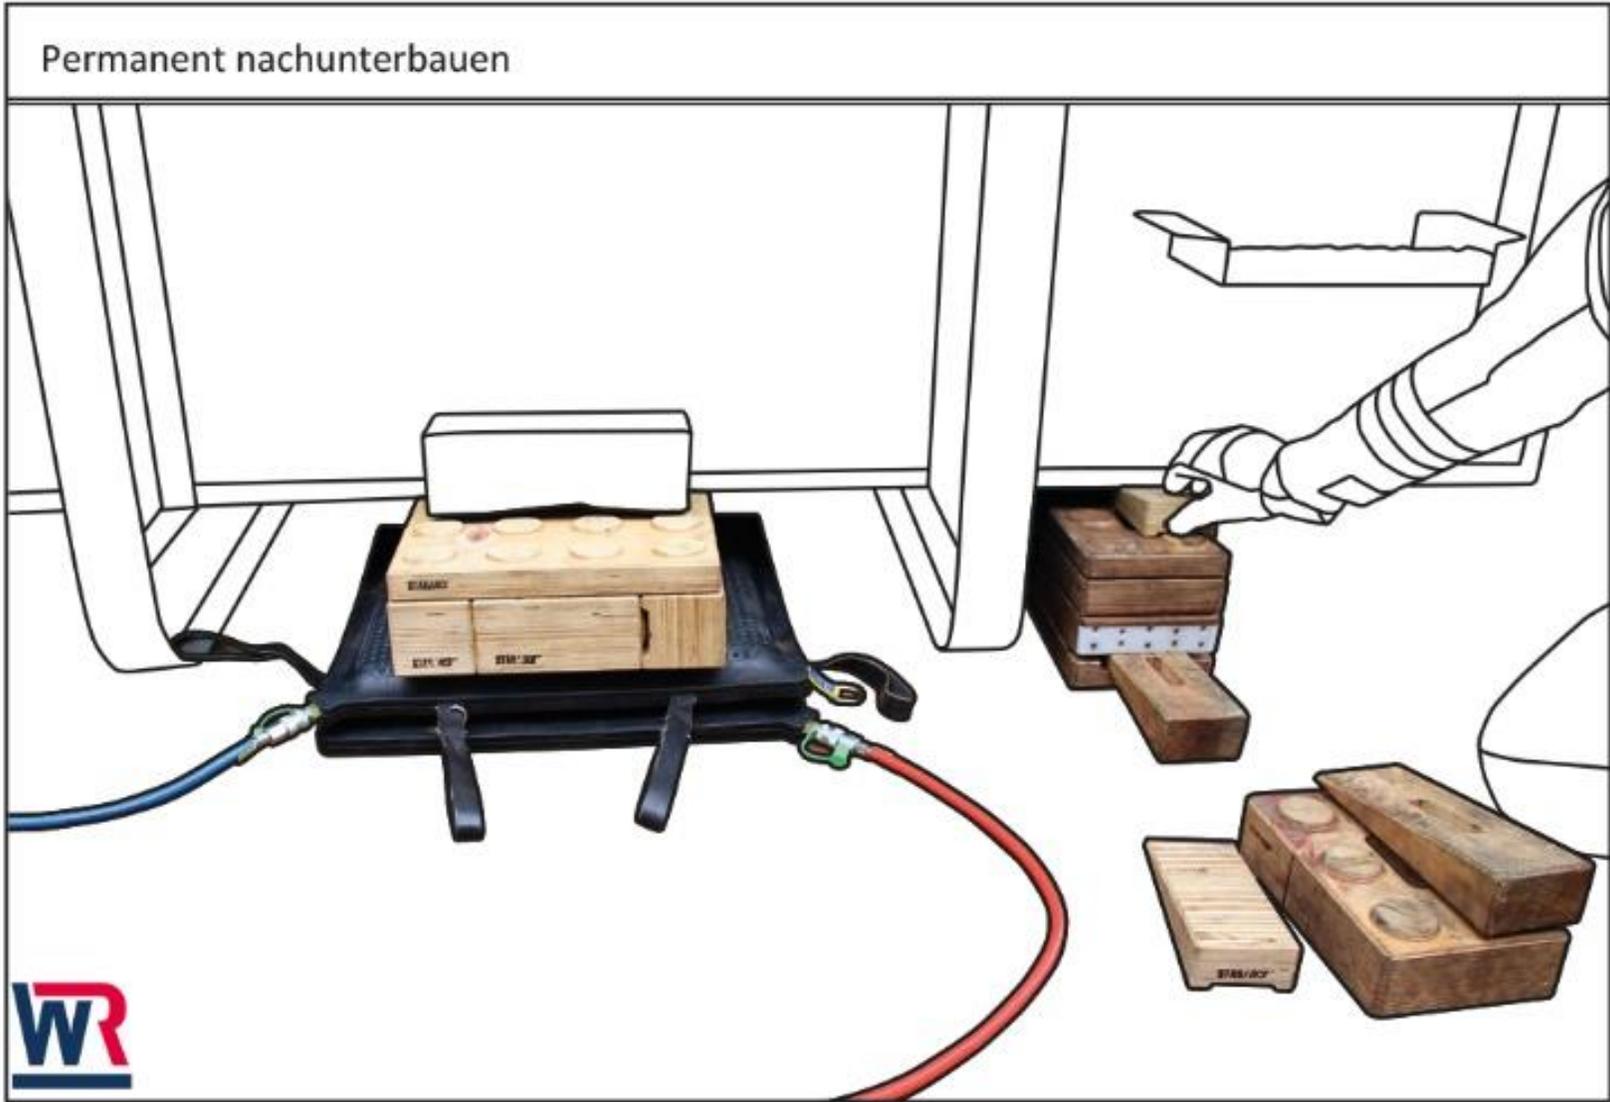

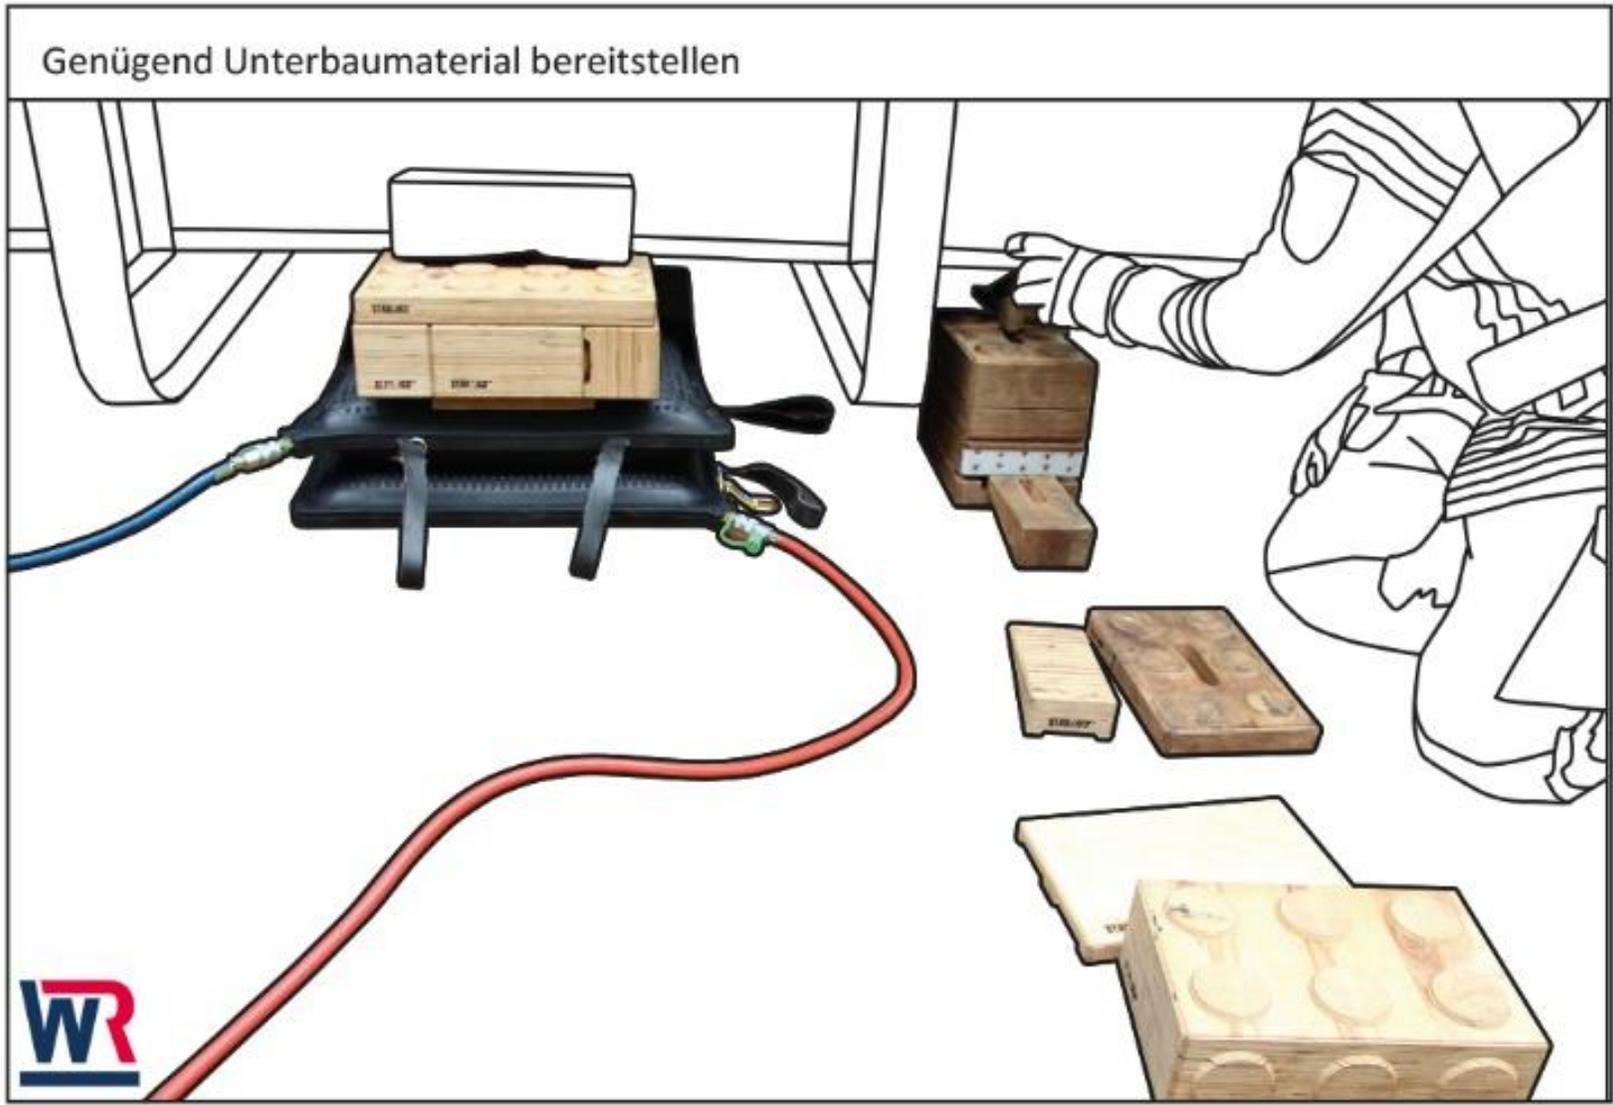

Sicherheitsabstand beachten! Nicht vor Hebekissen aufhalten

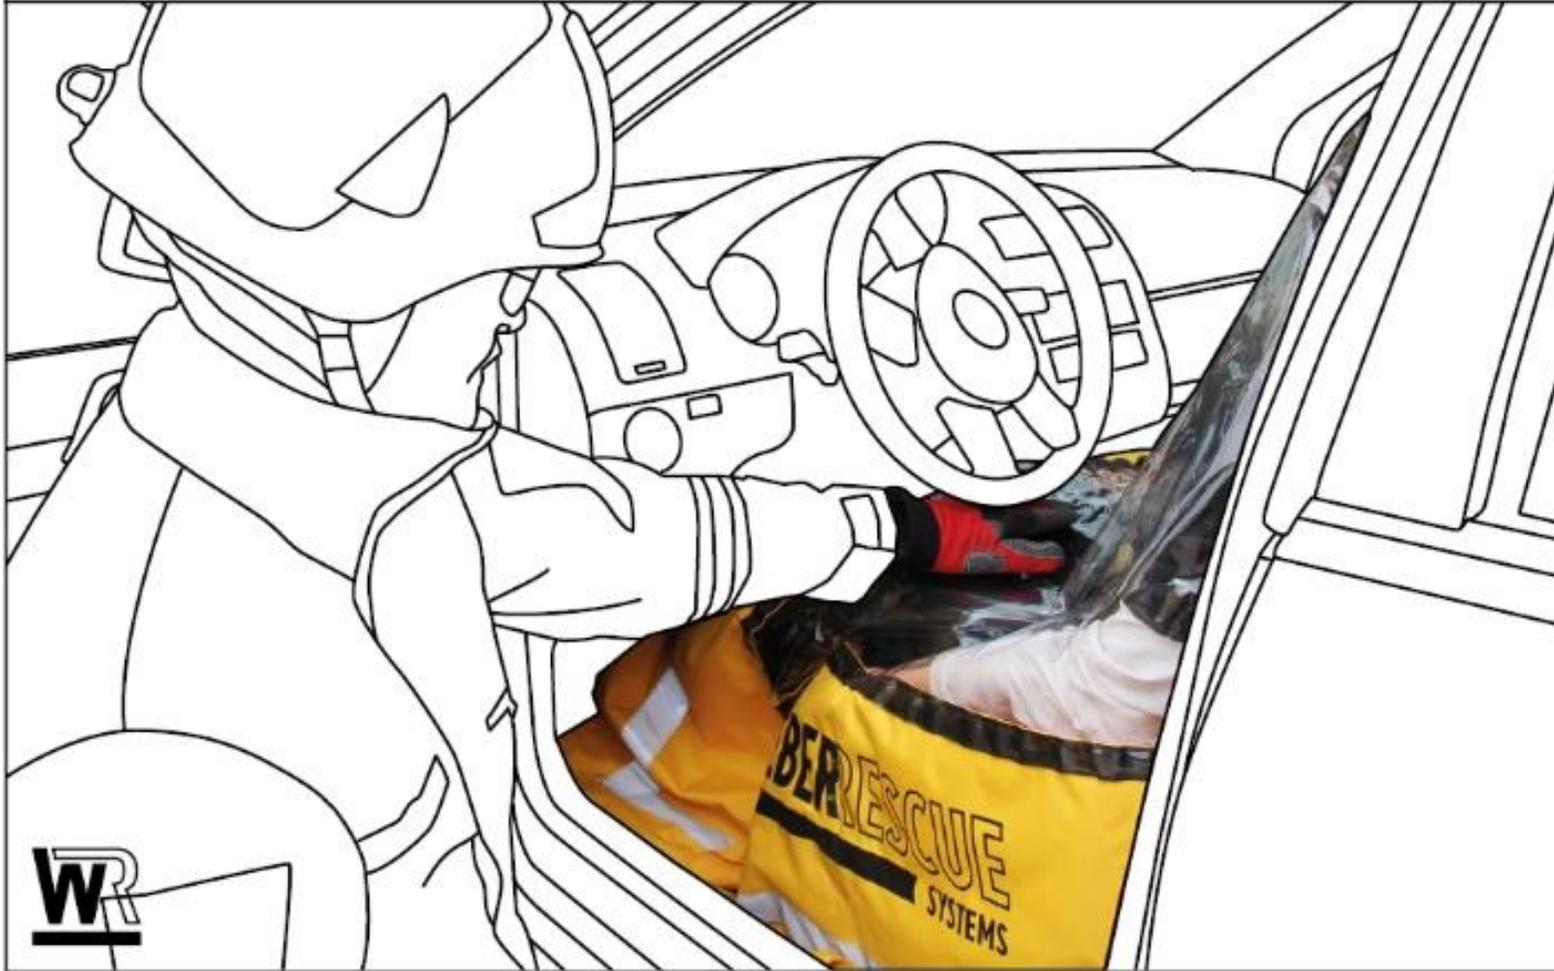

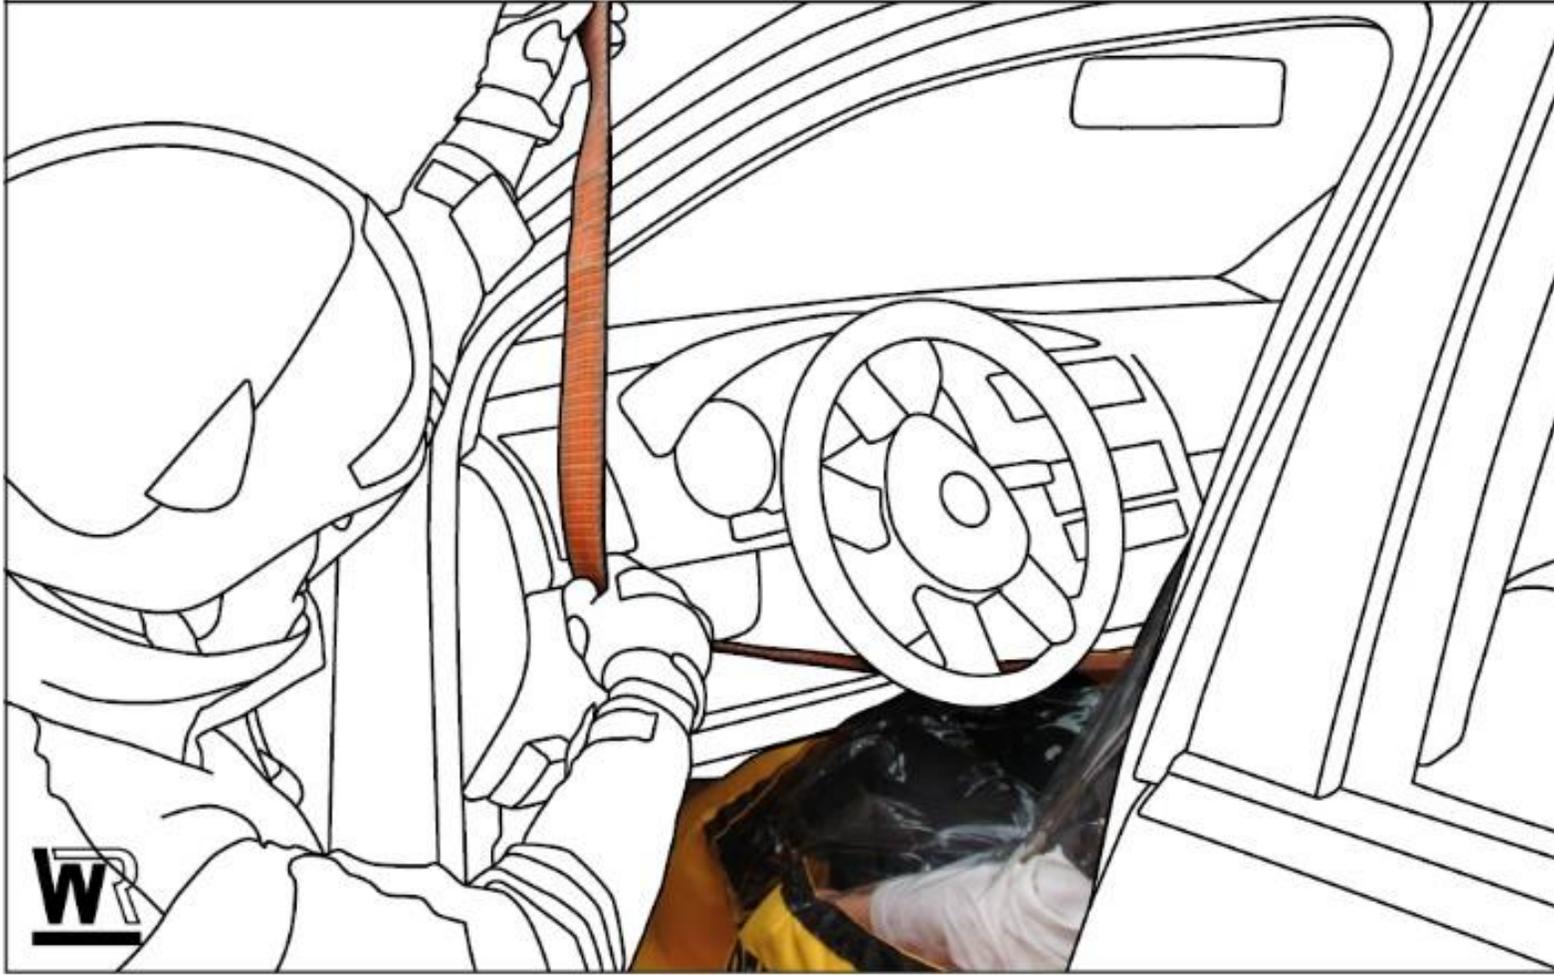

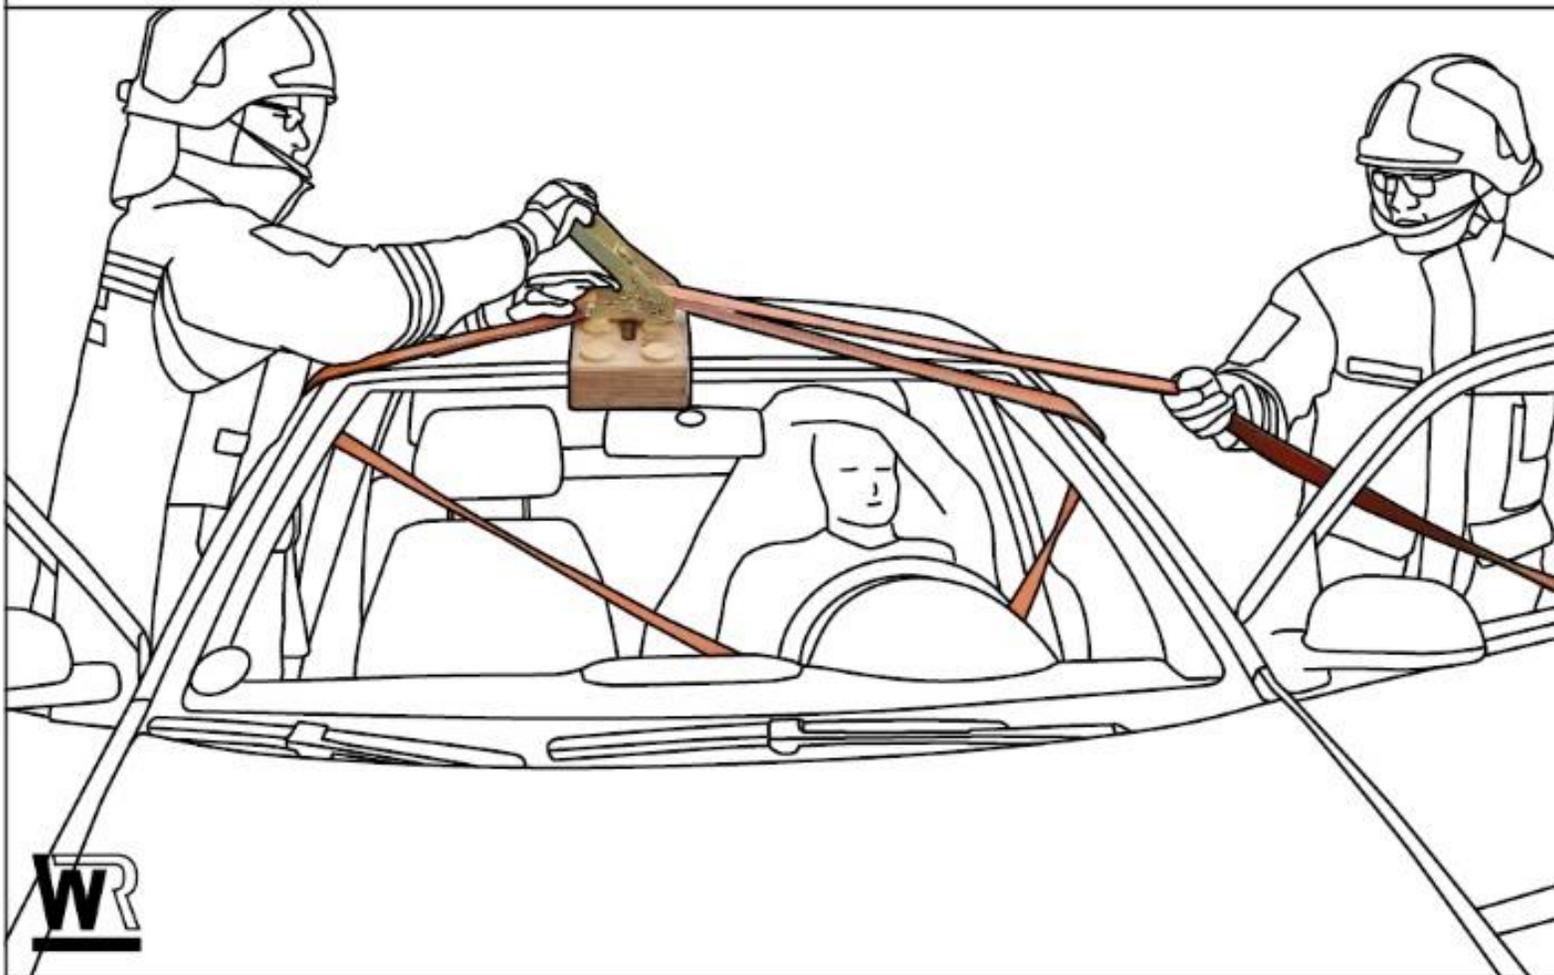

1 Wenig Platz zwischen Lenkrad und Patient

2 Spanngurt unter Lenkrad durch Innenraum führen

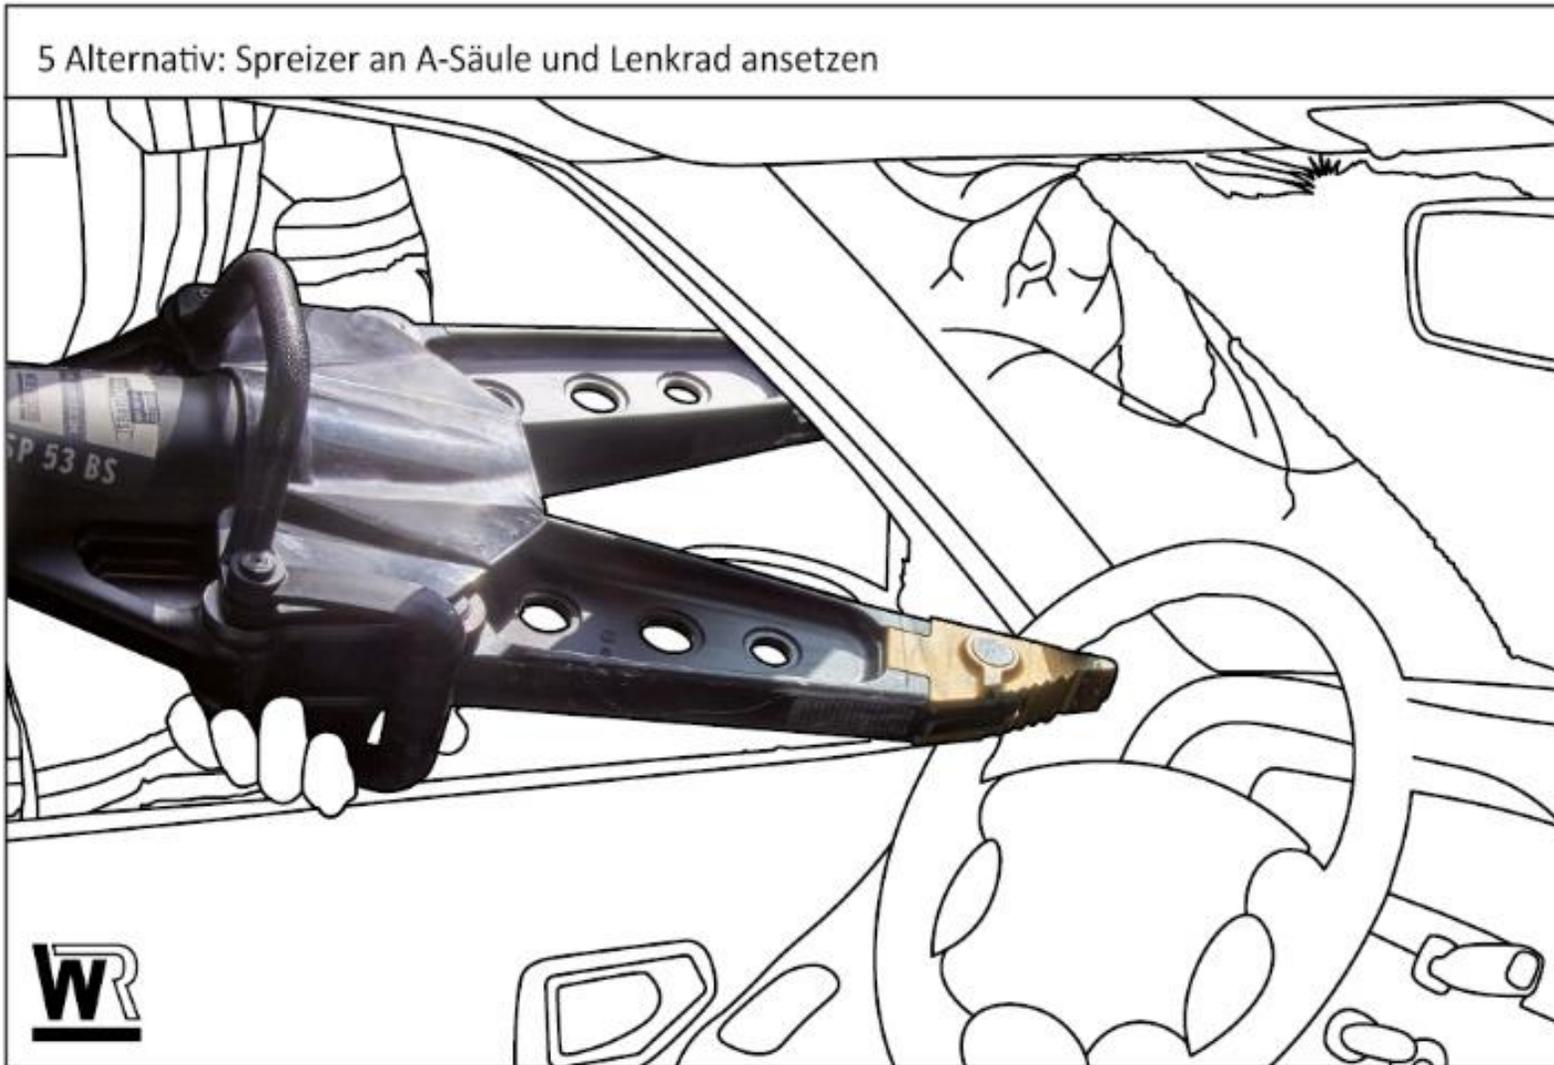

3 Mit Holz unterlegen und an Oberkante Scheibe festzurren

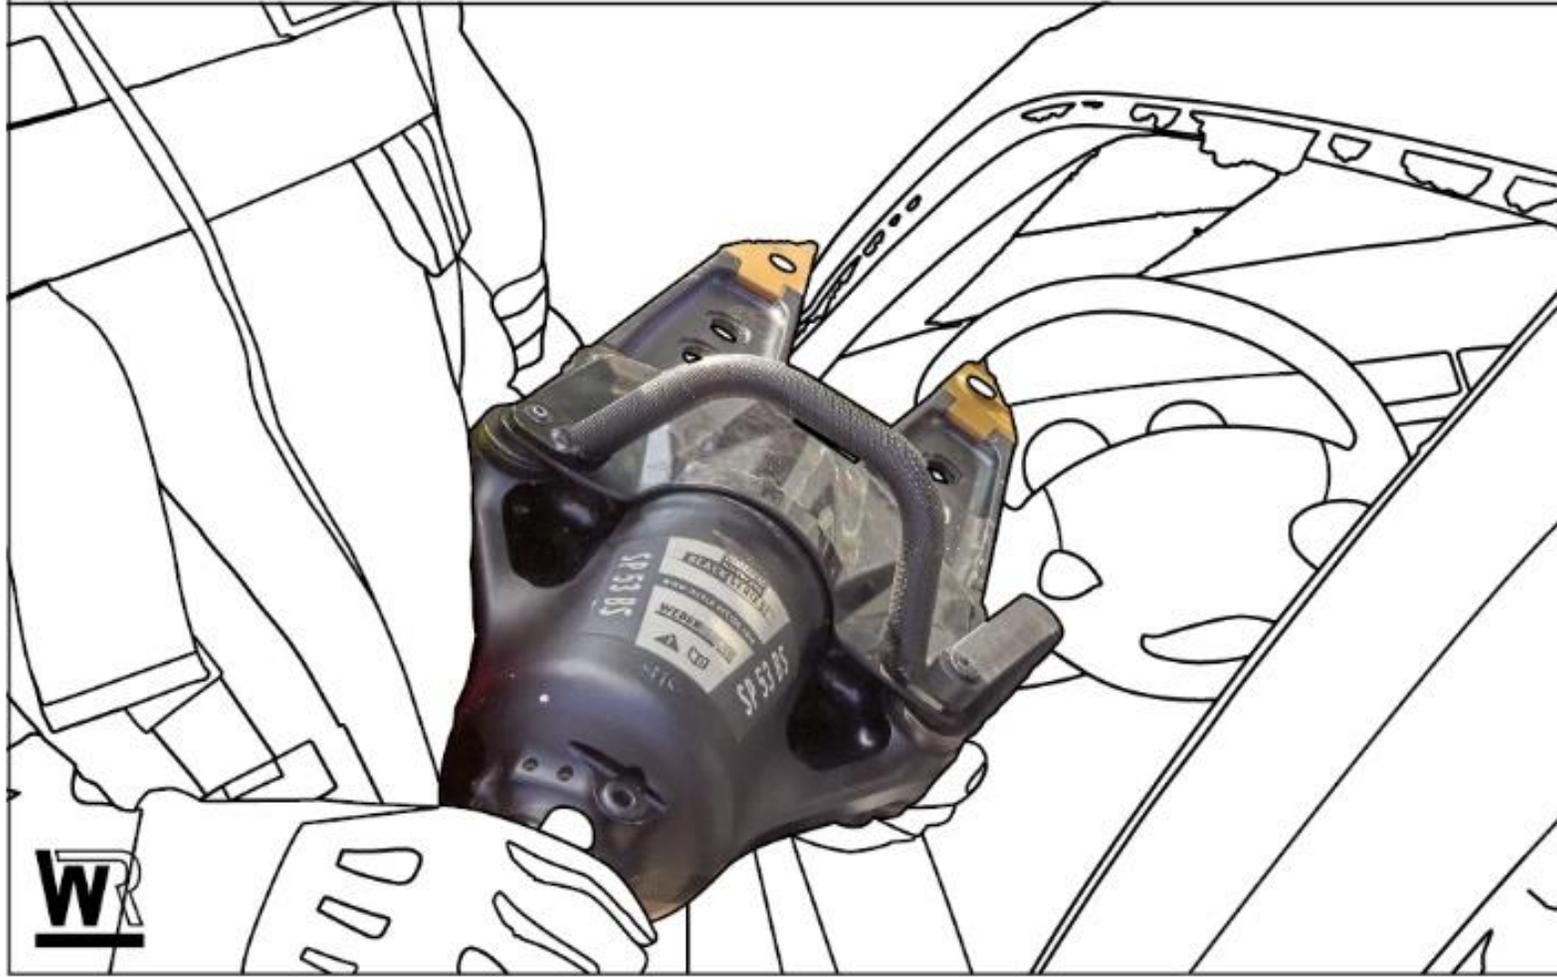

4 Spanngurt anziehen

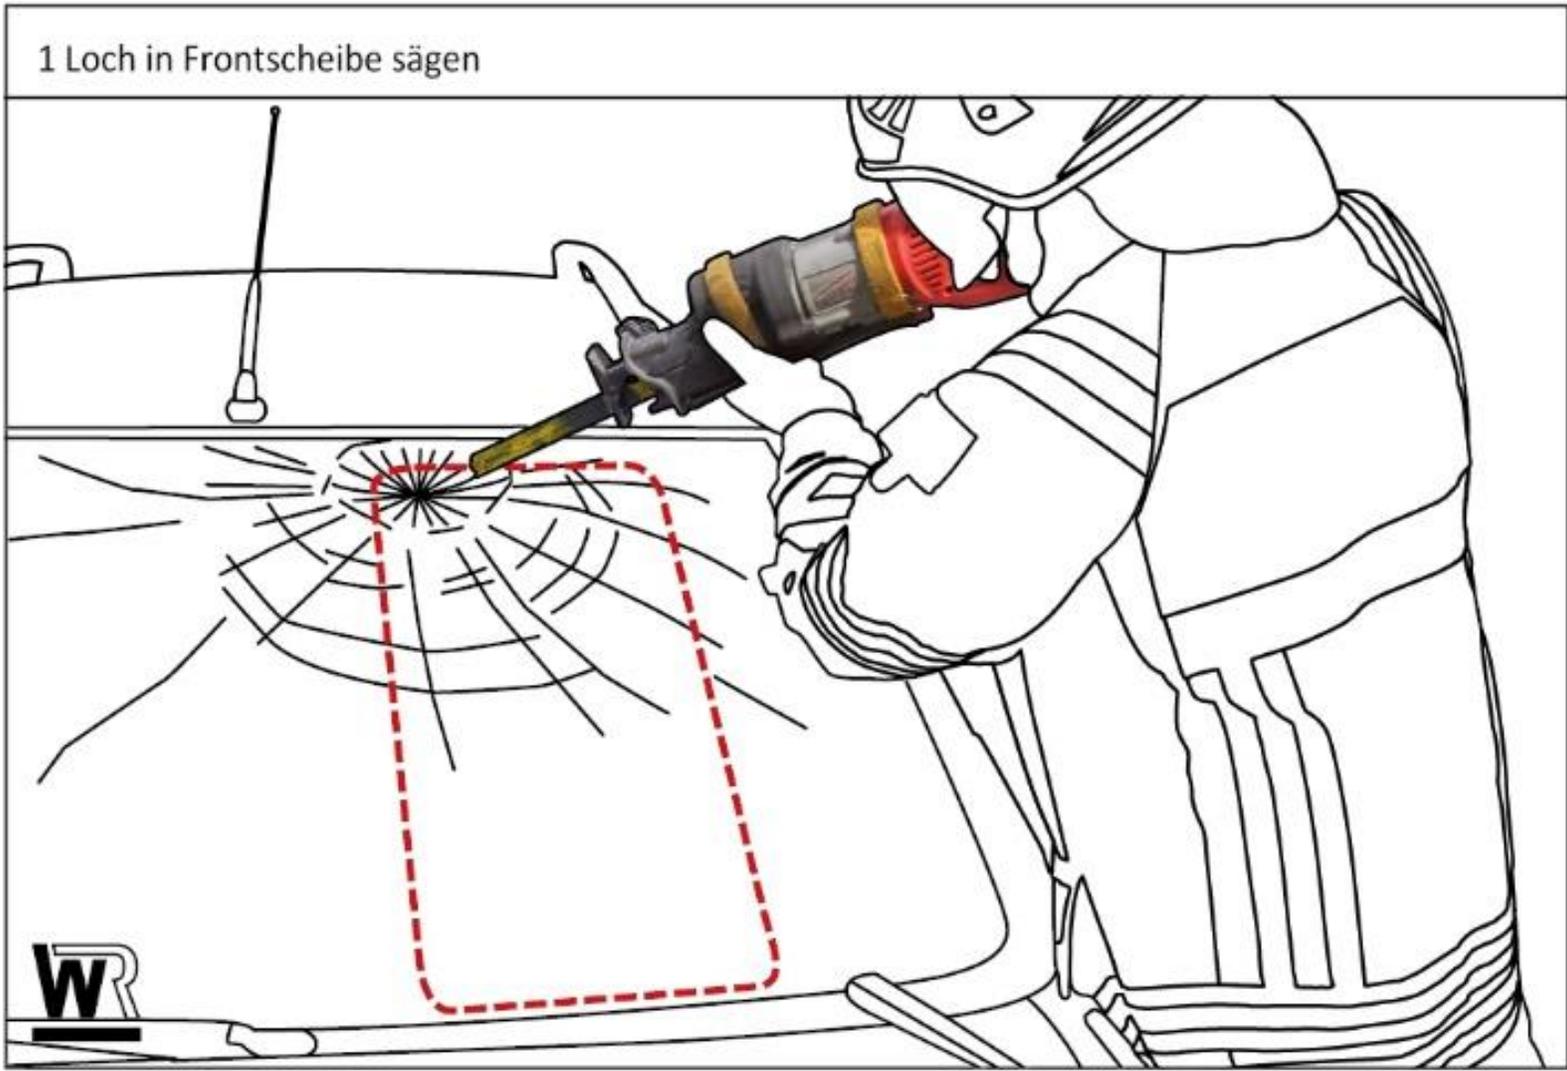

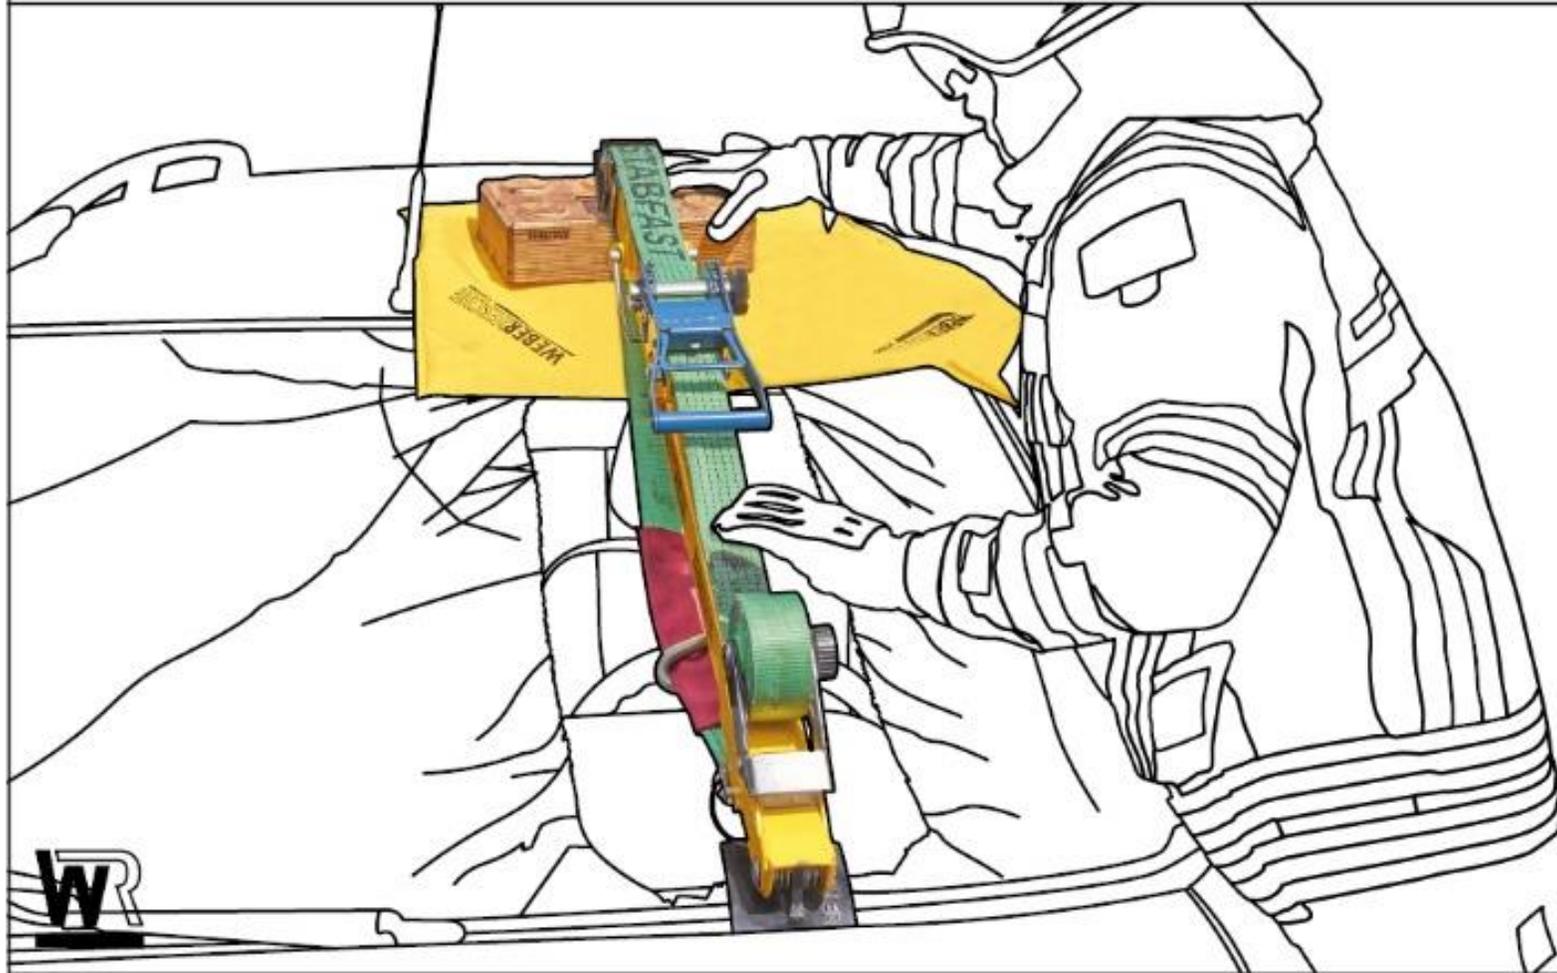

6 Spreizer schließen und Lenkrad zur Seite ziehen

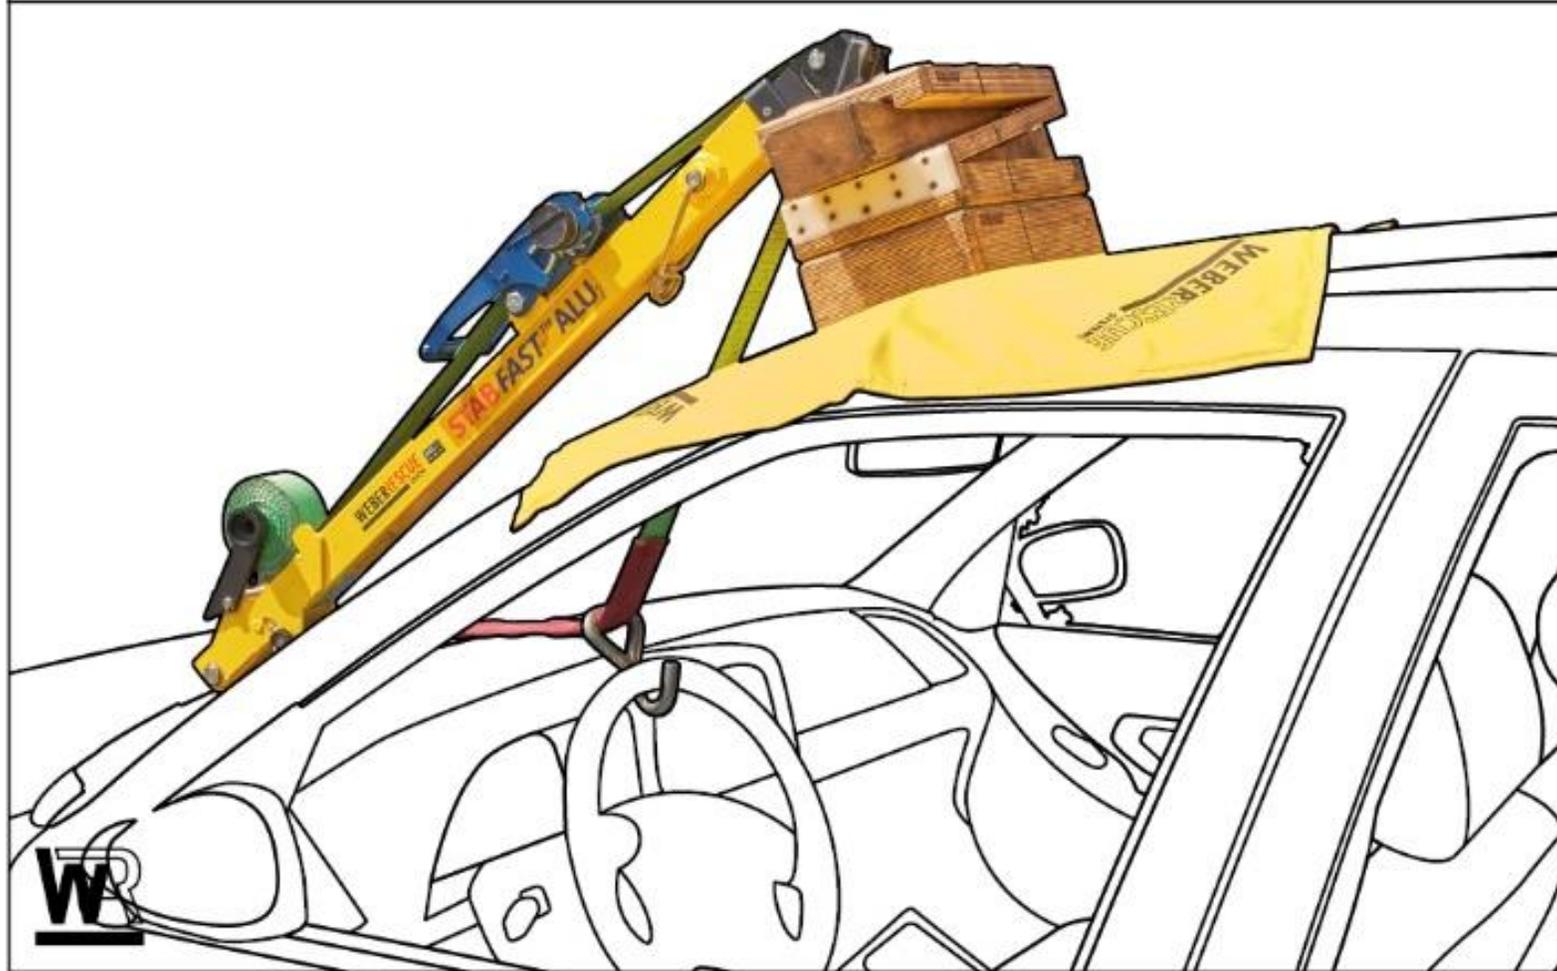

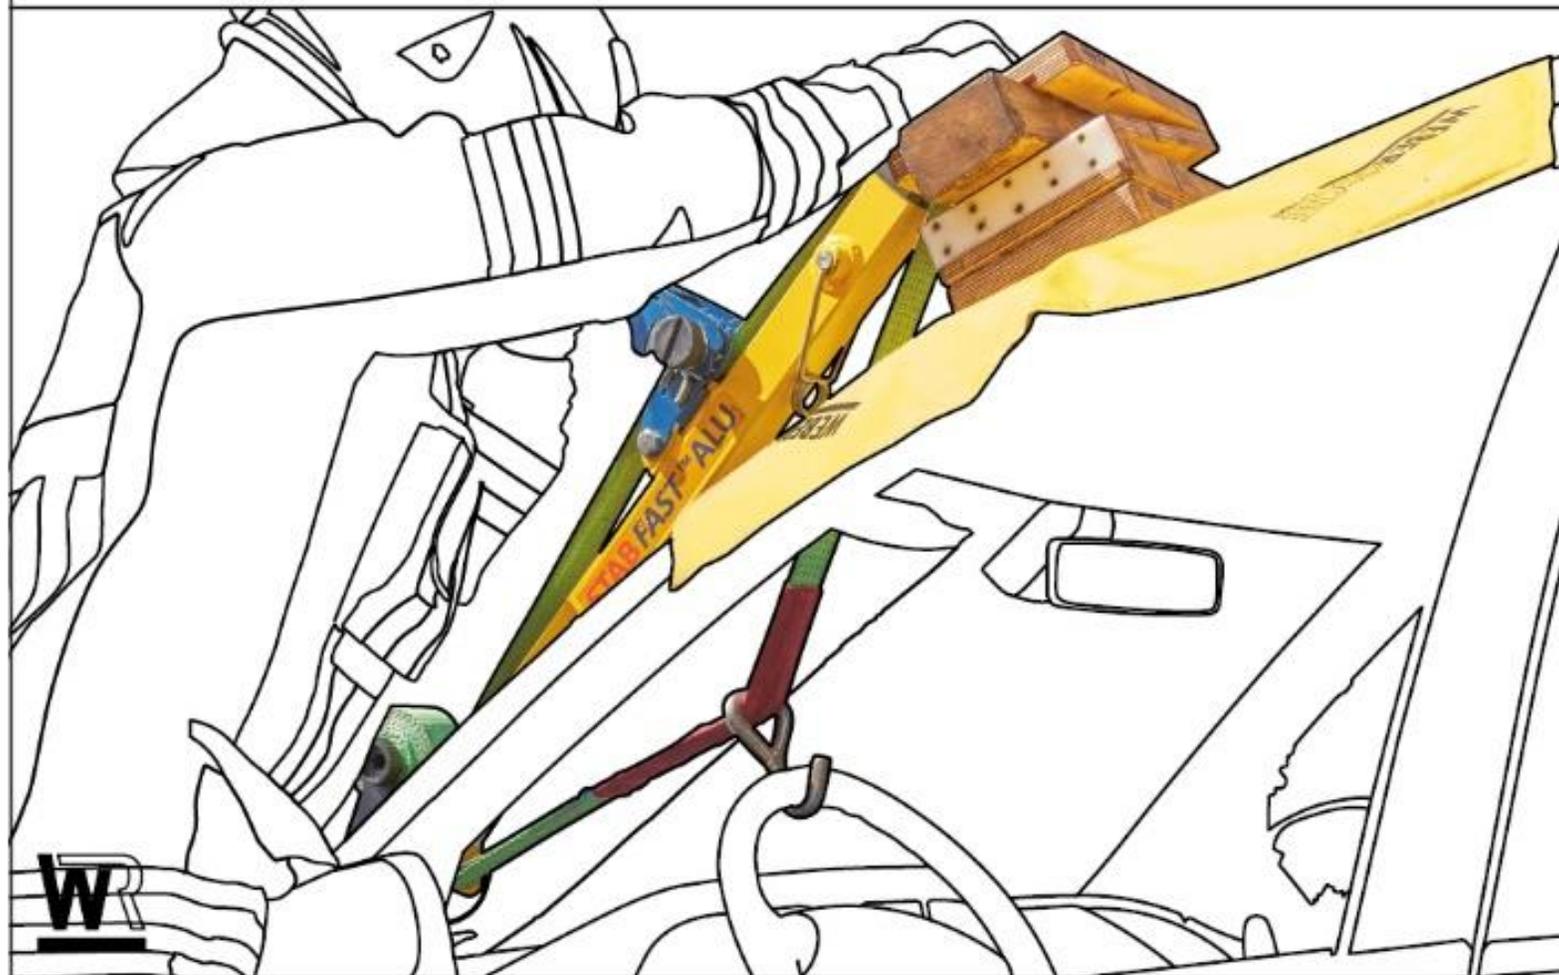

2 Scharfe Kanten abdecken und STAB-FAST auflegen

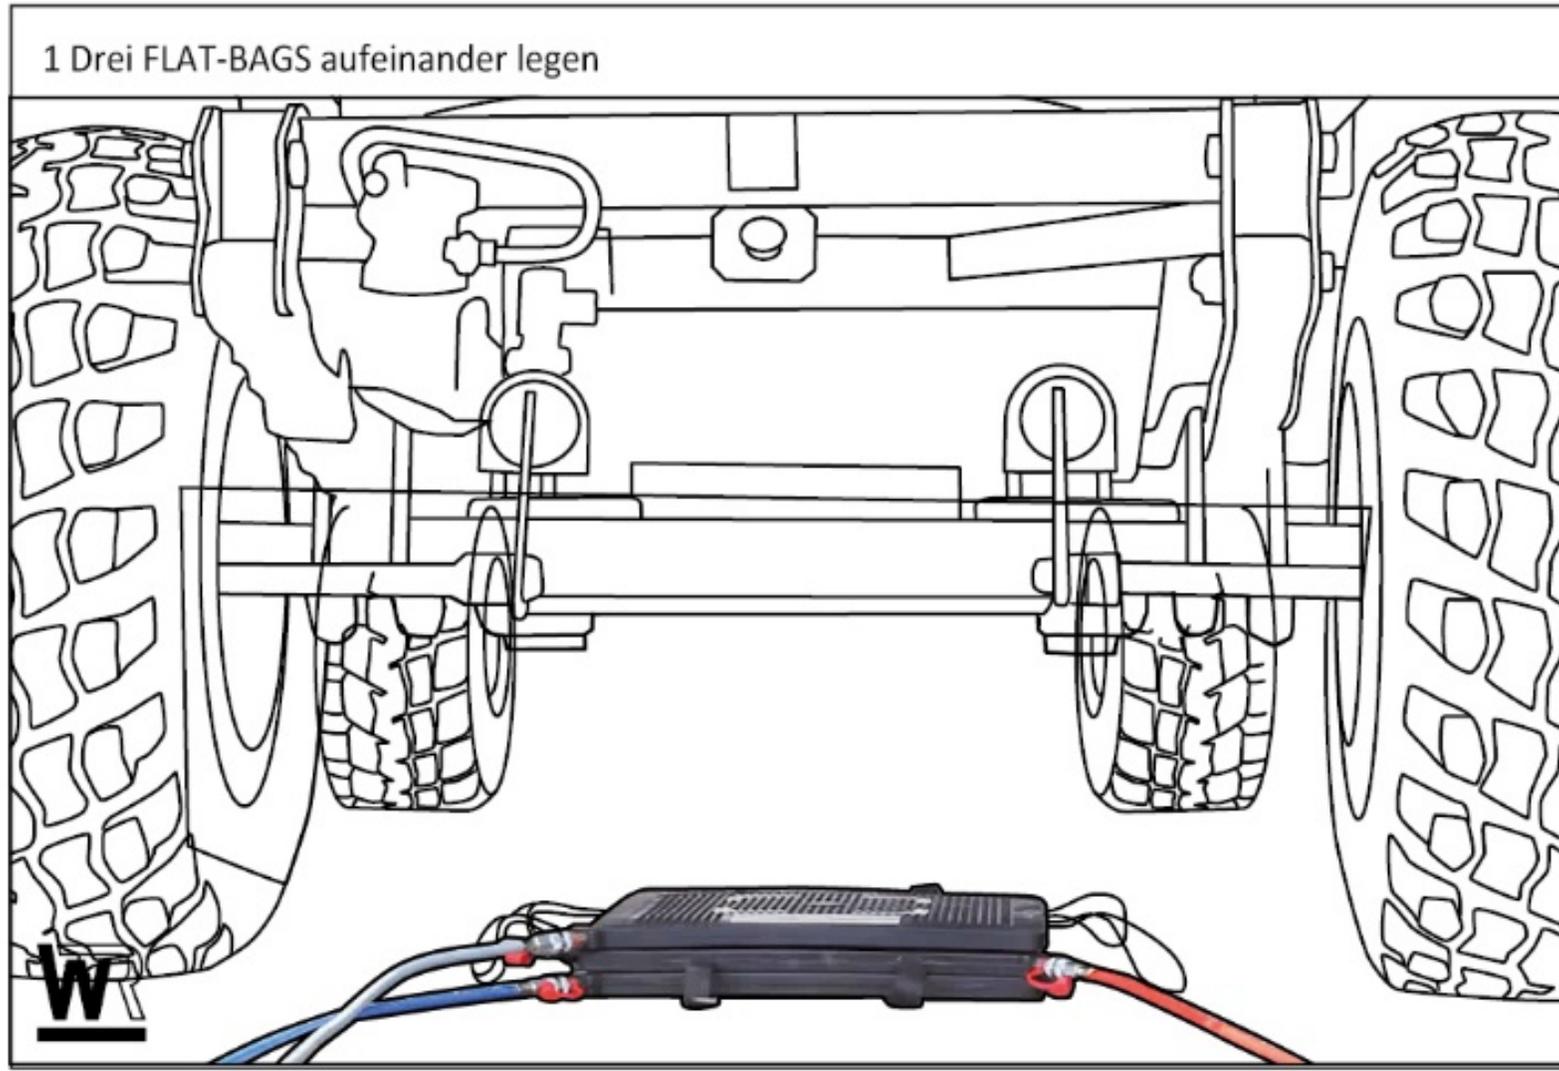

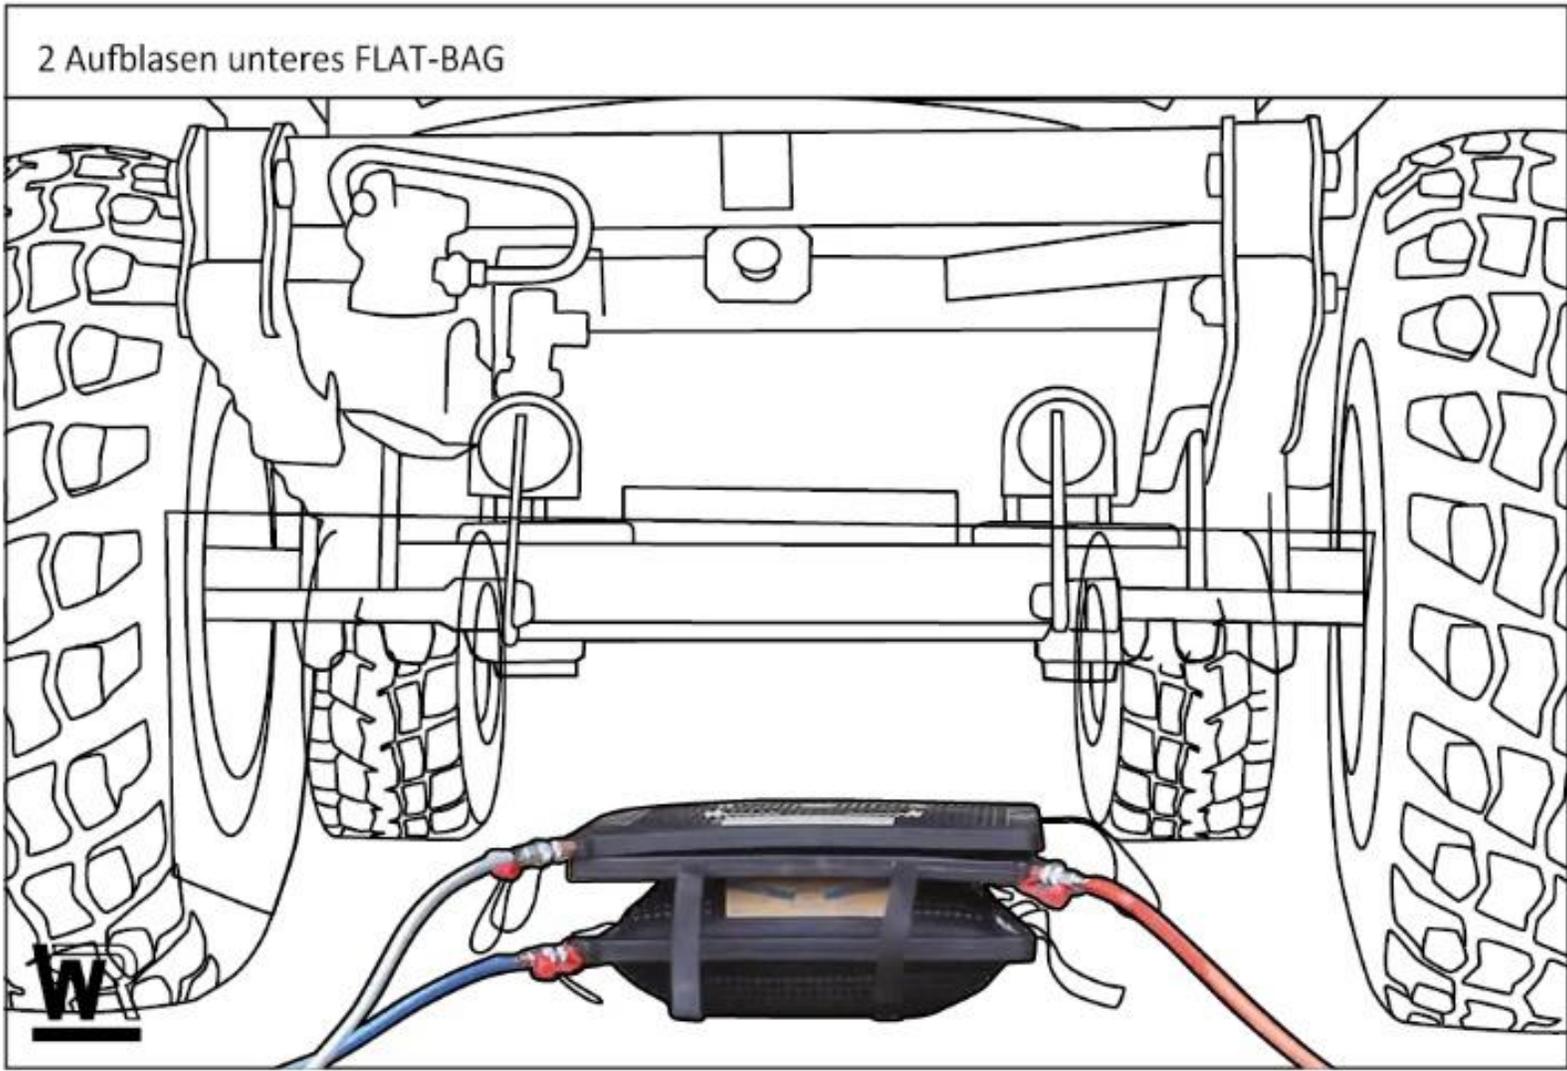

3 Mit Haken an Lenkrad oder mit kurzer Bandschlinge um Lenksäule befestigen

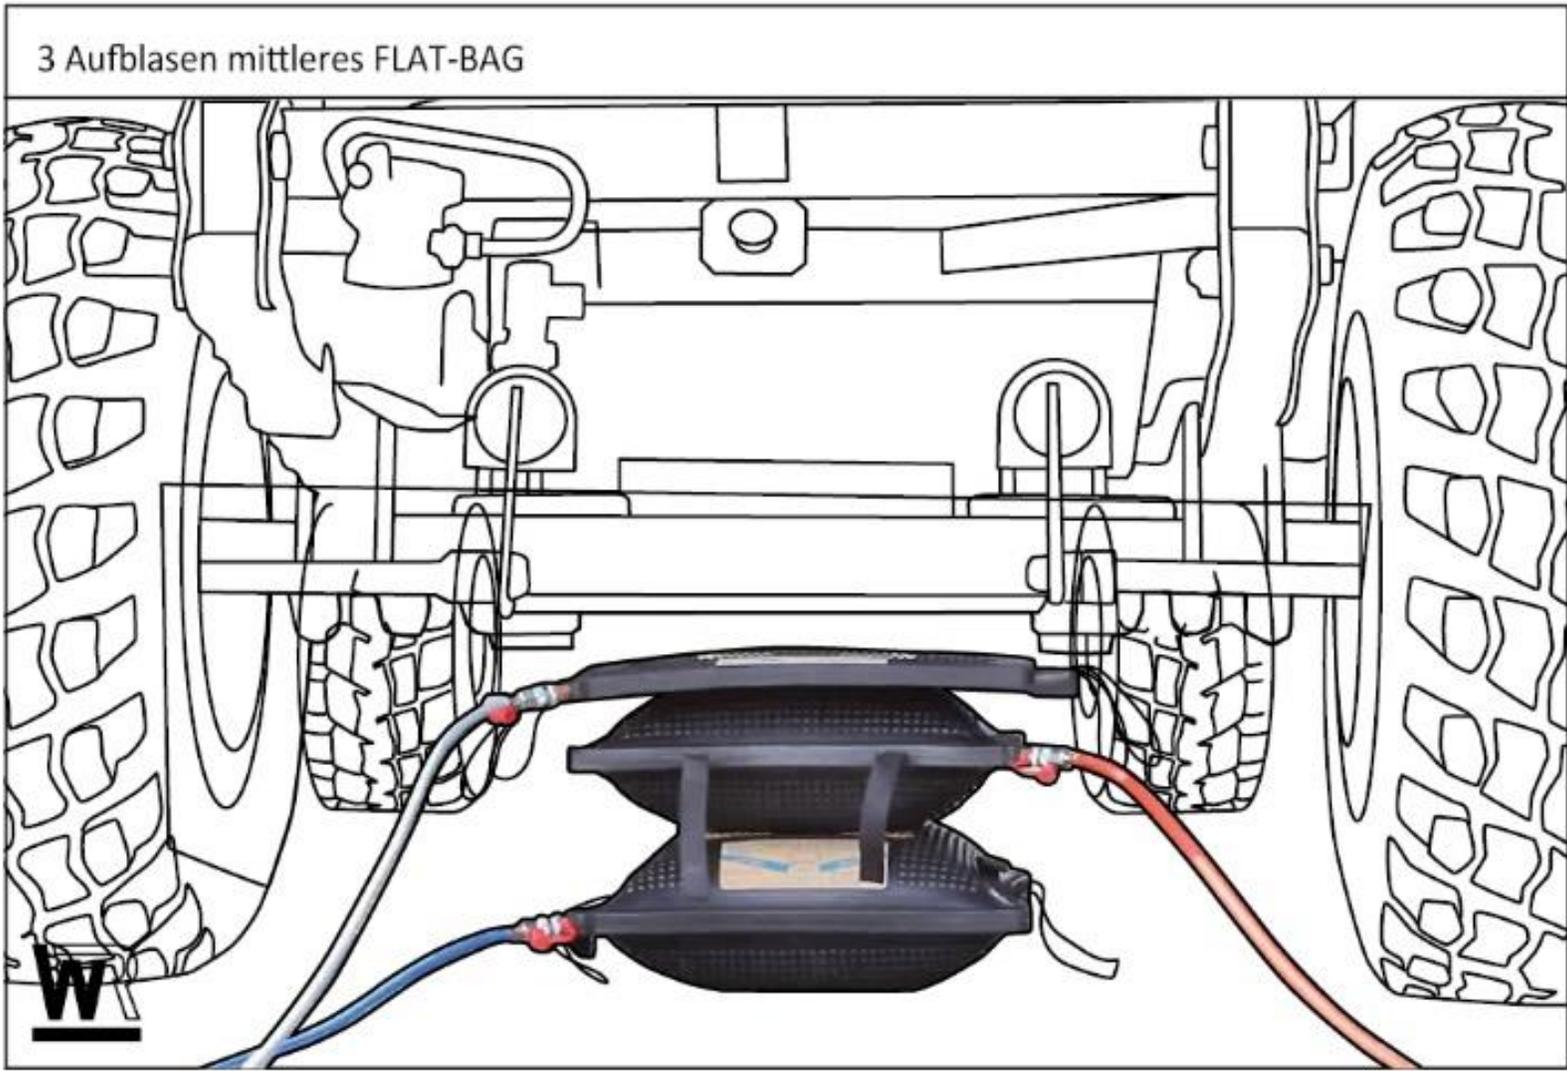

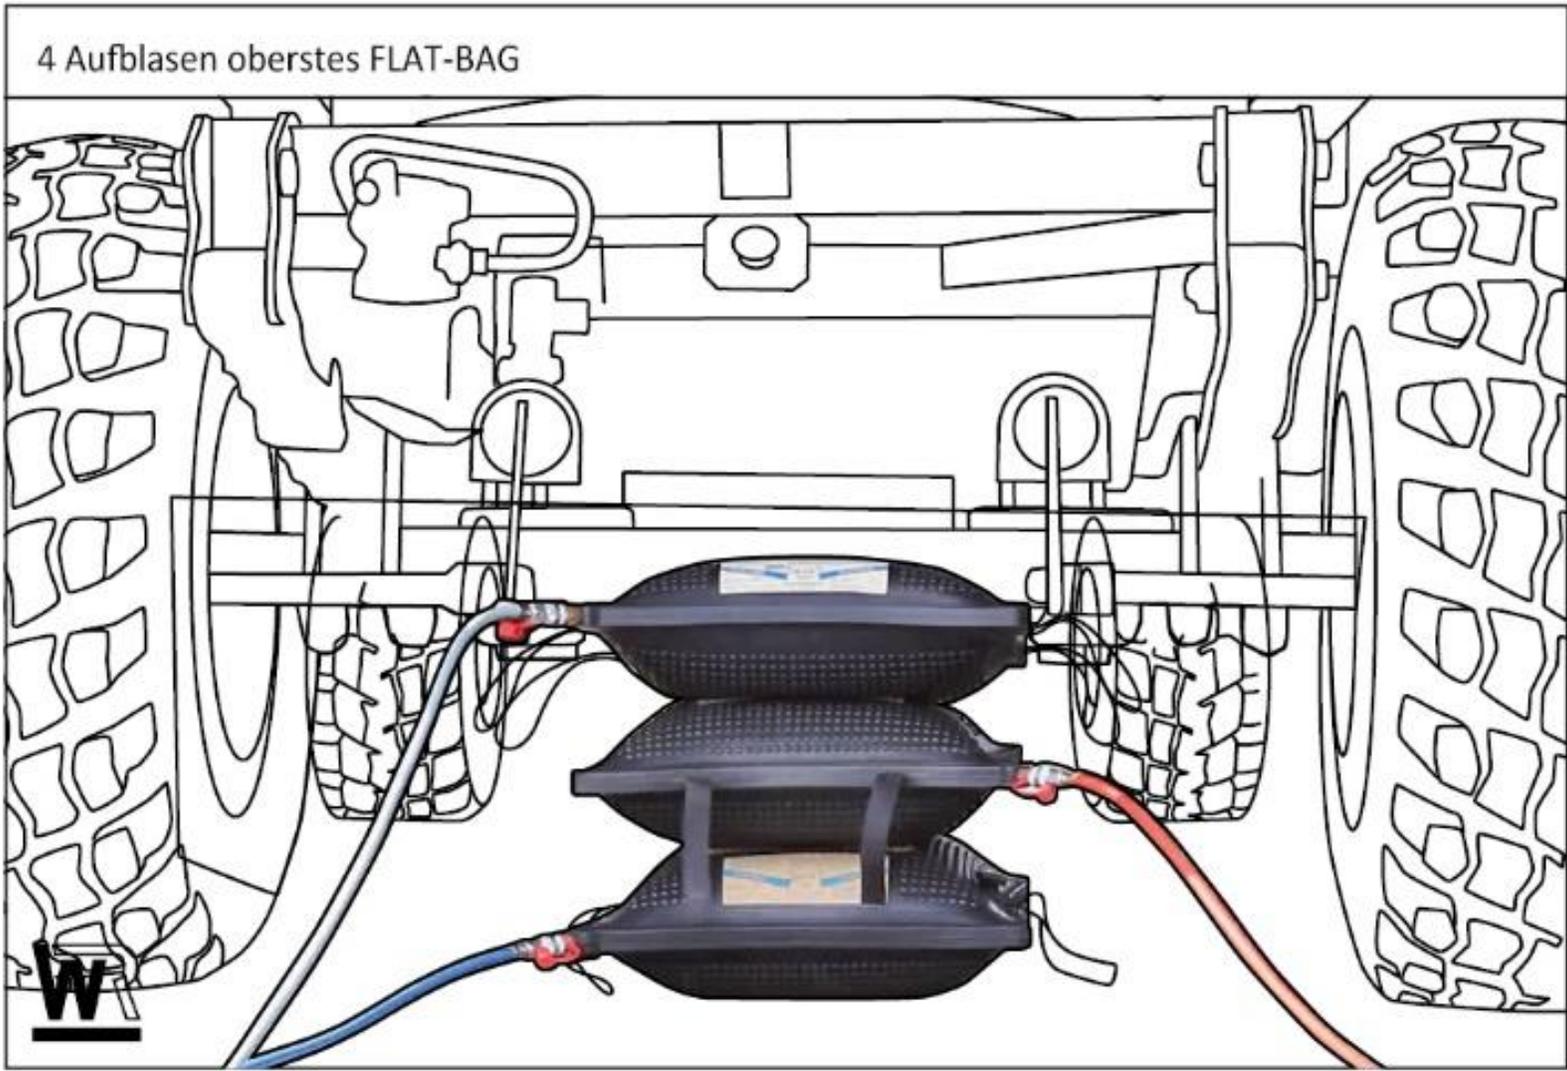

4 STAB-FAST betätigen, Lenkrad wird nach oben gezogen

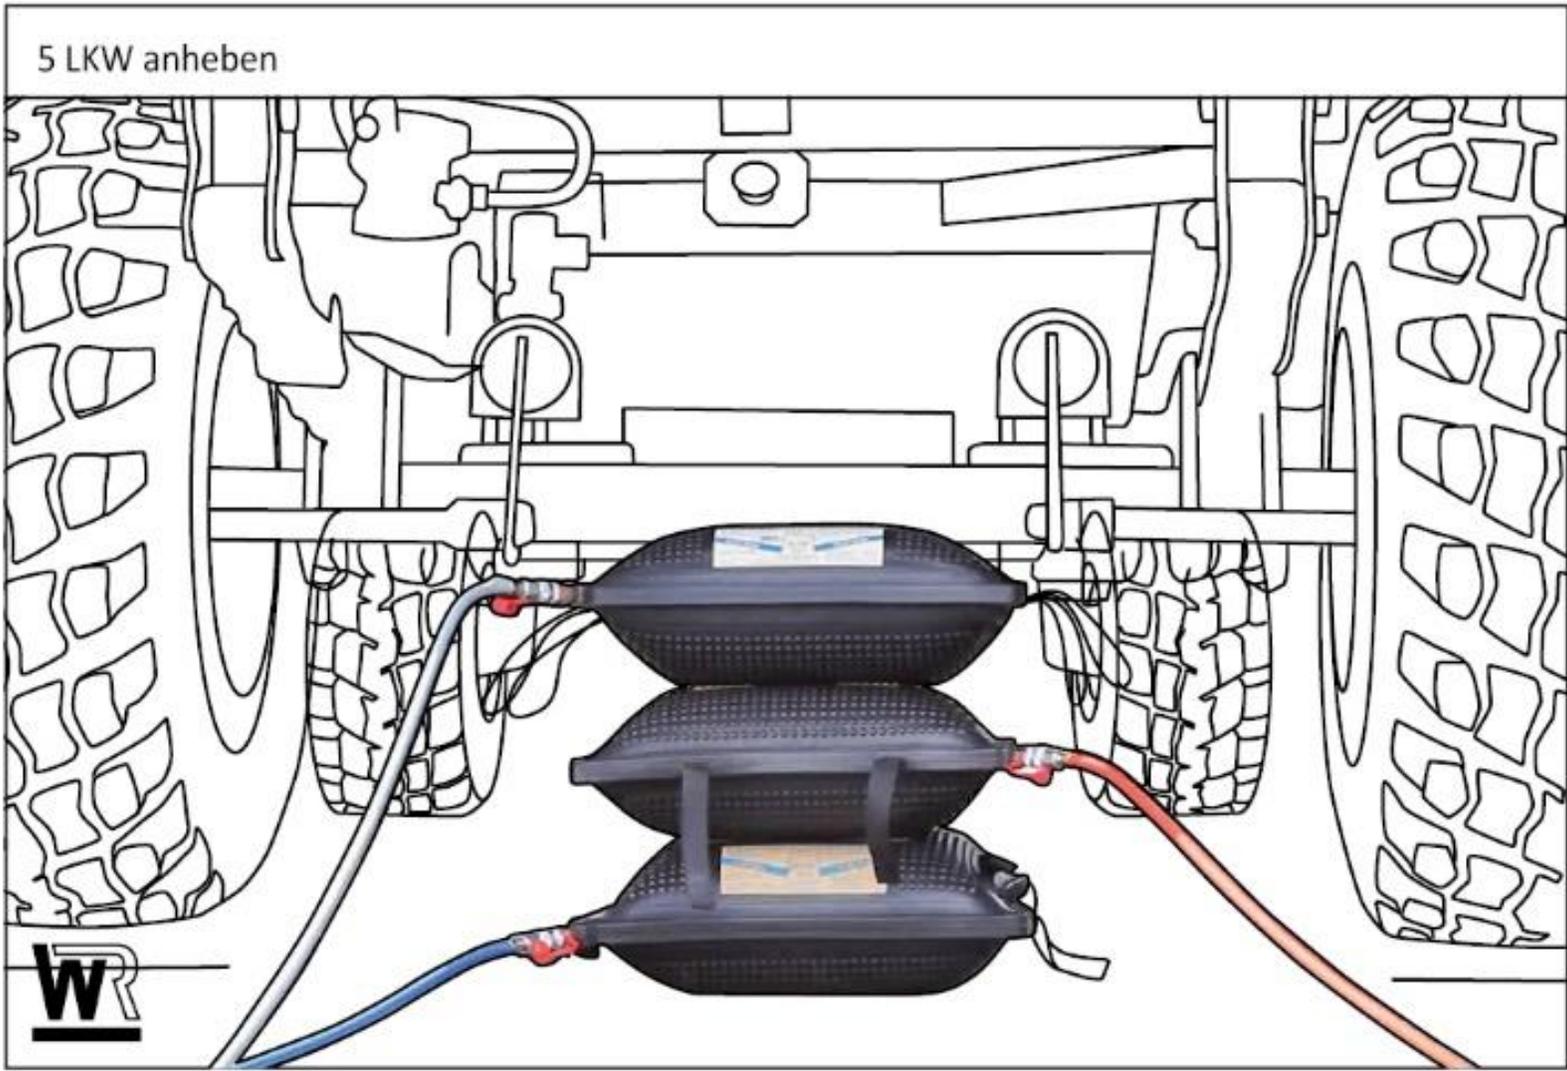

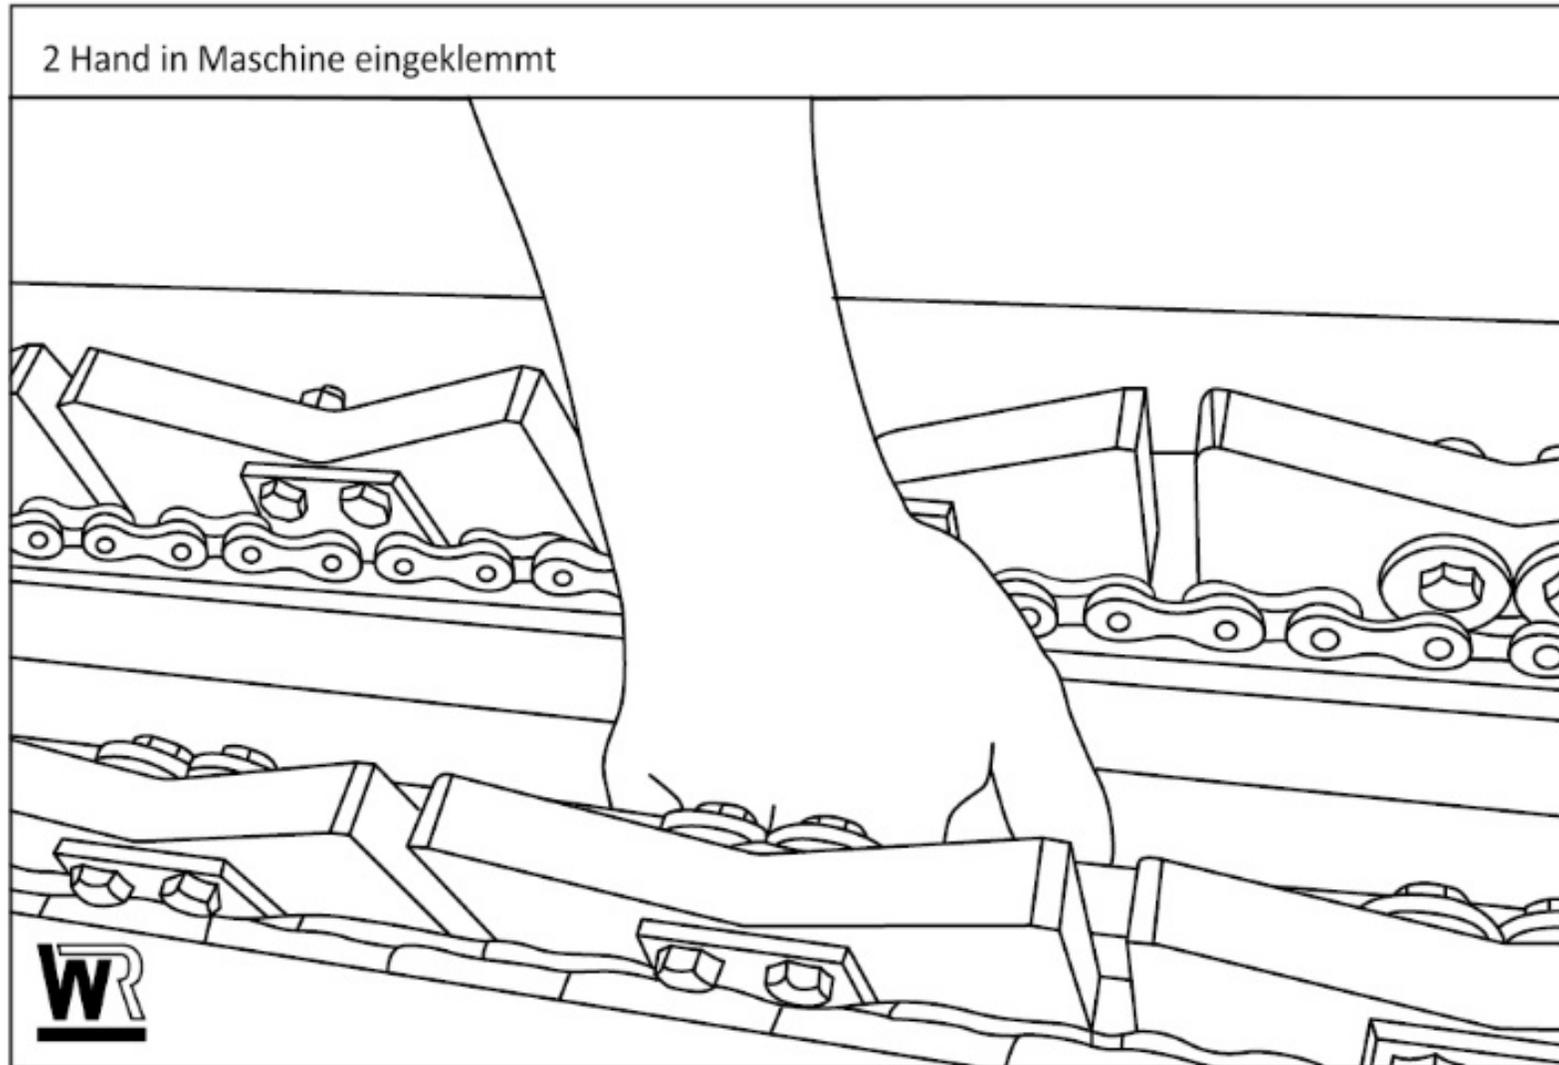

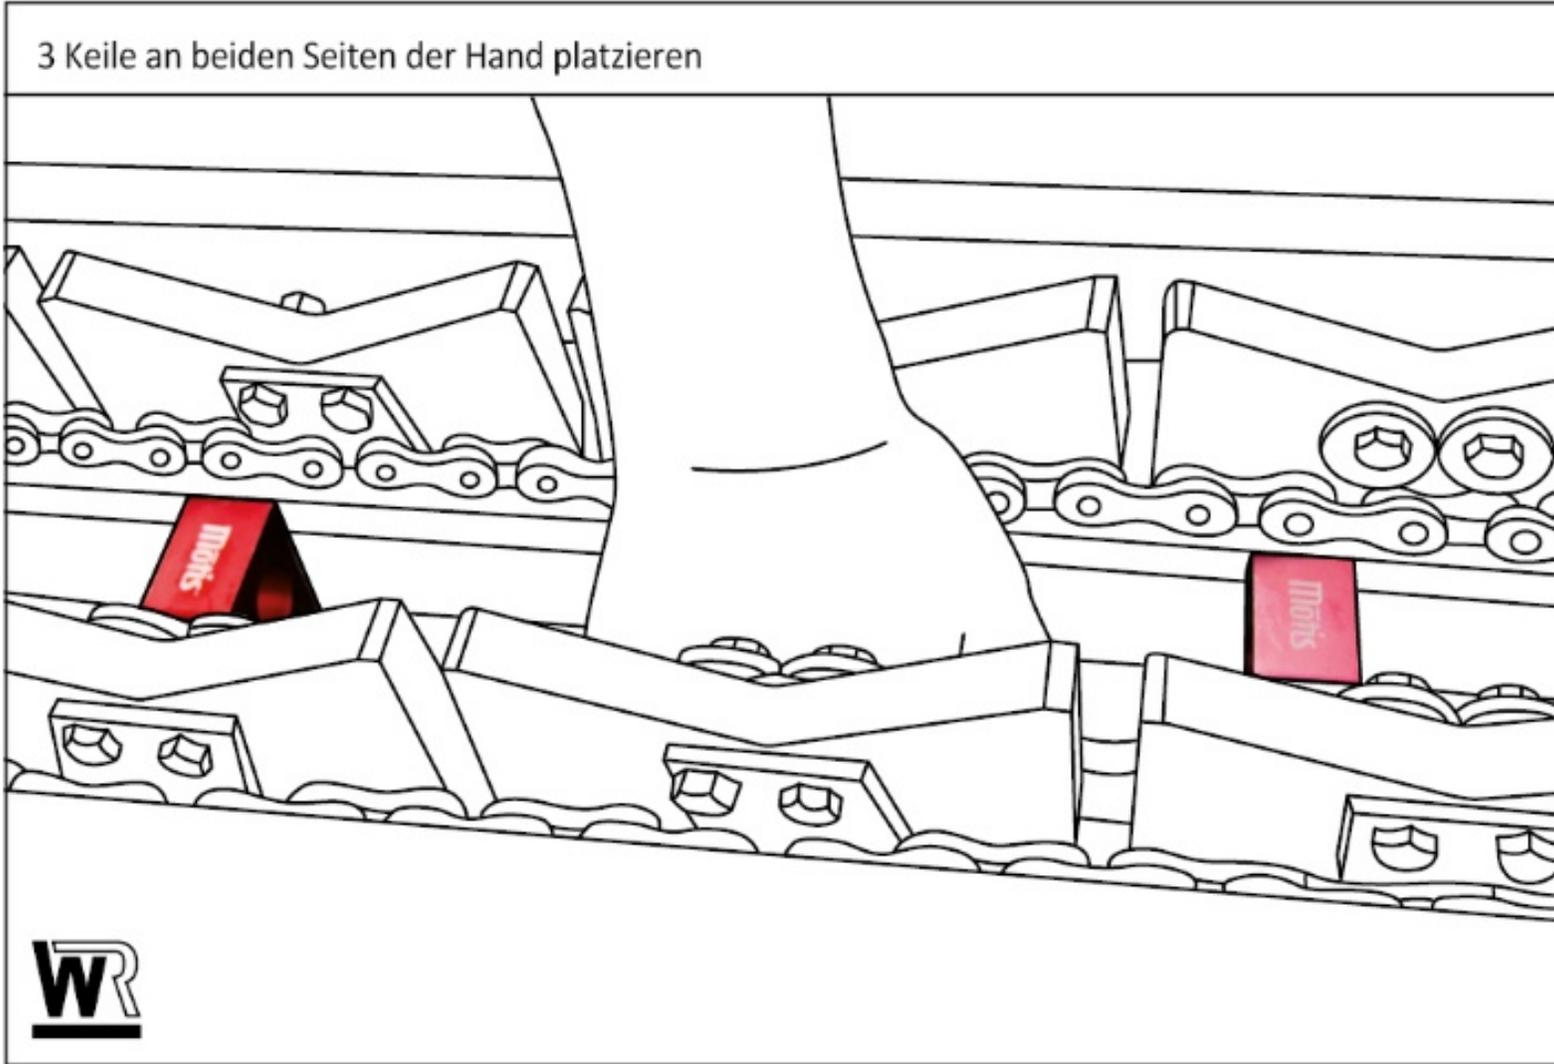

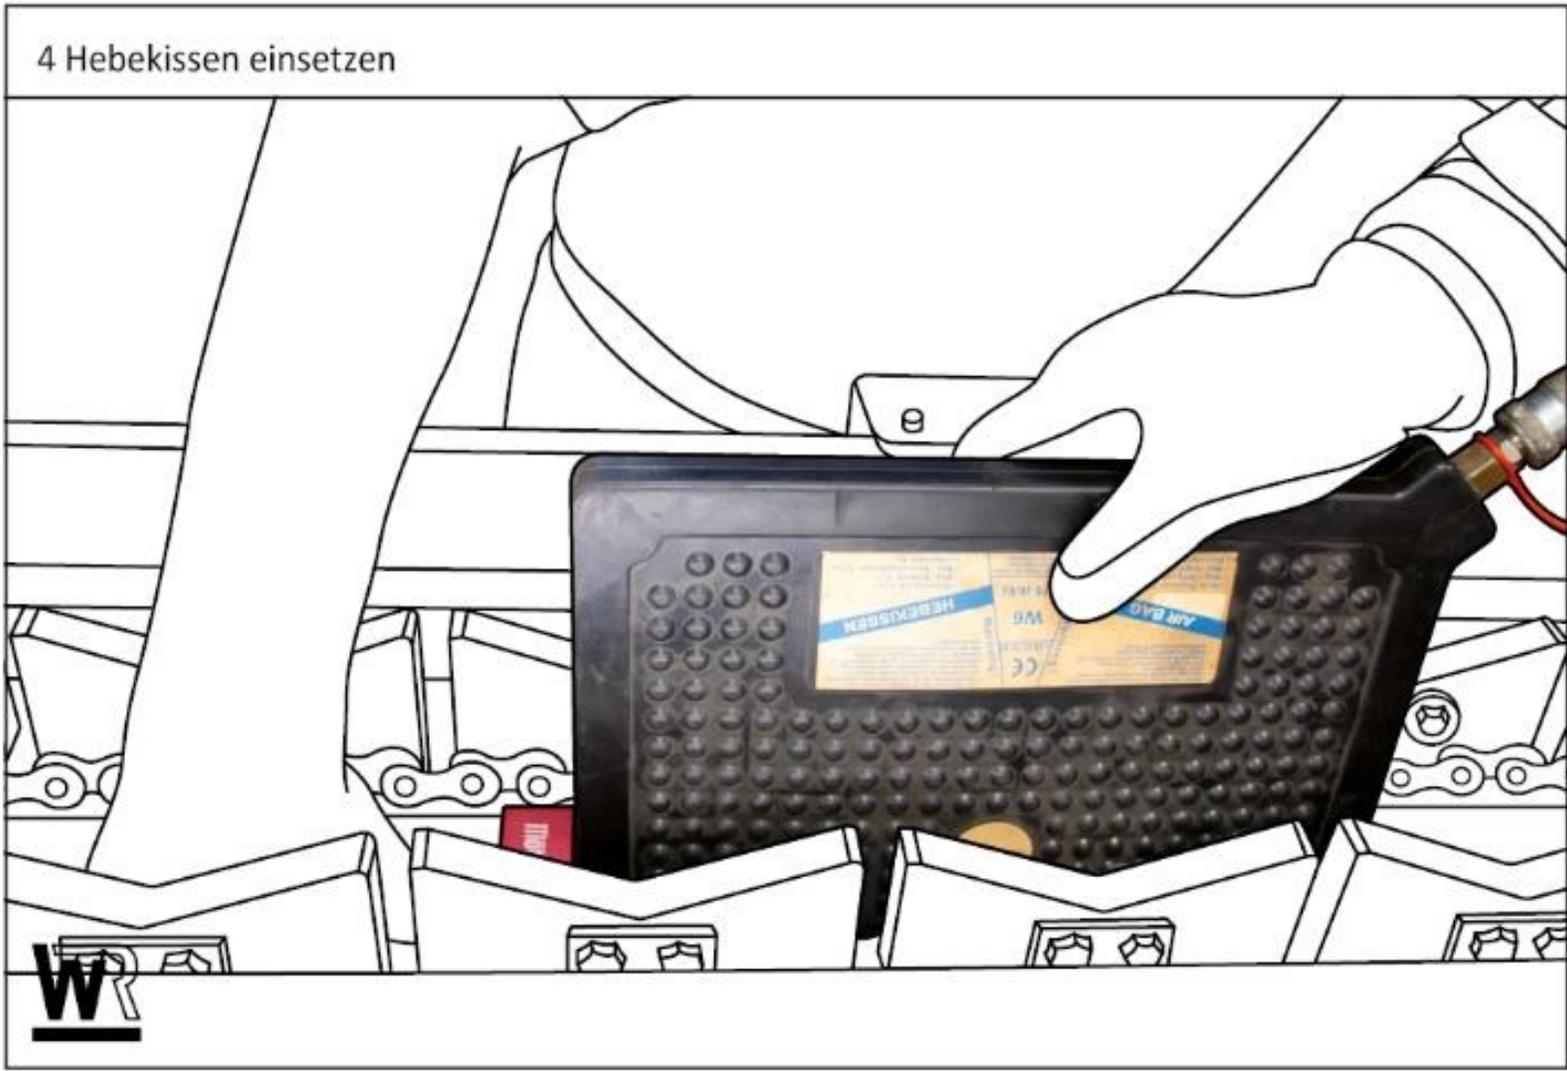

Equipment: Hebekissen inklusive Zubehör und Keile

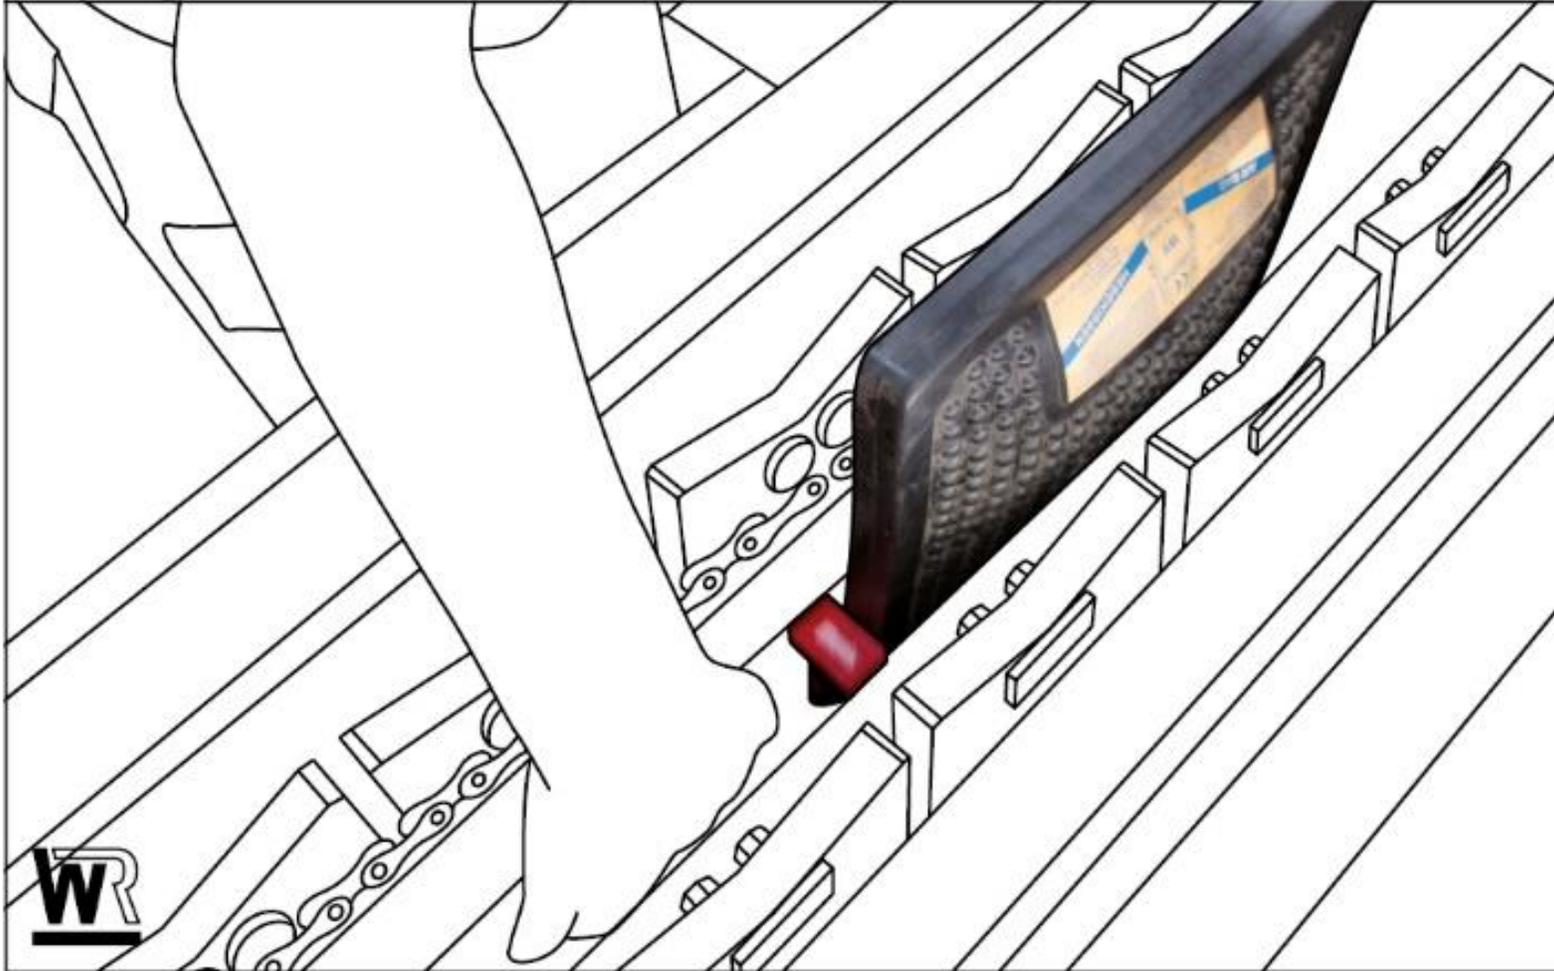

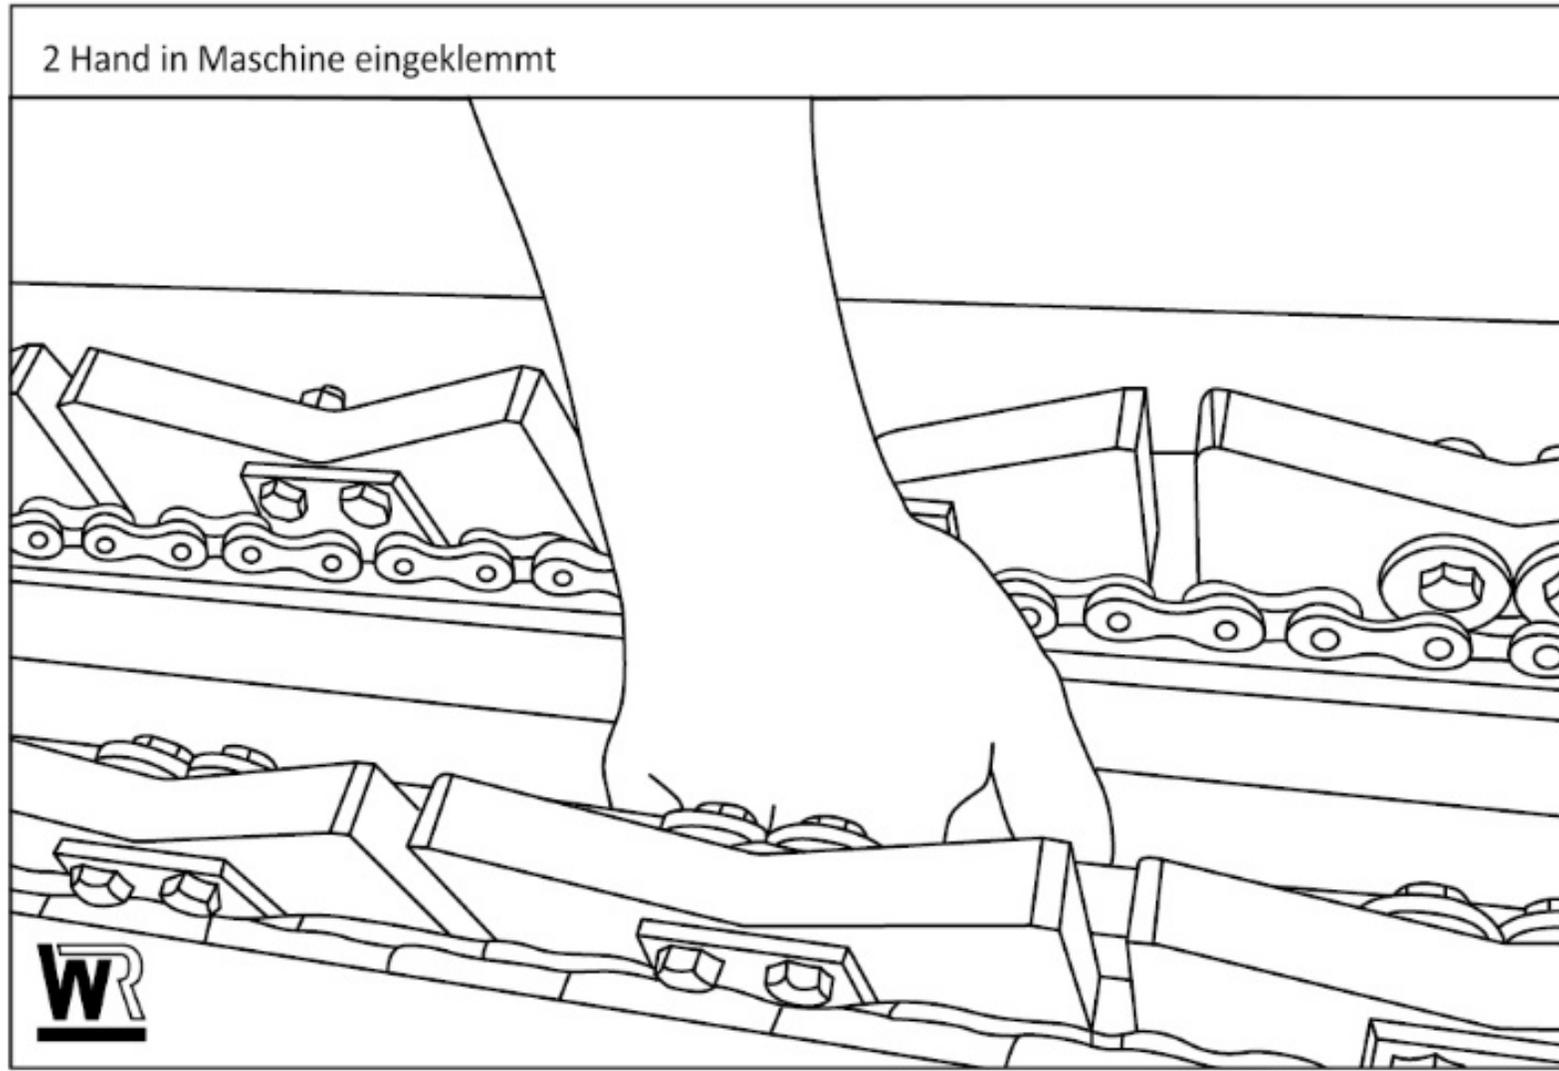

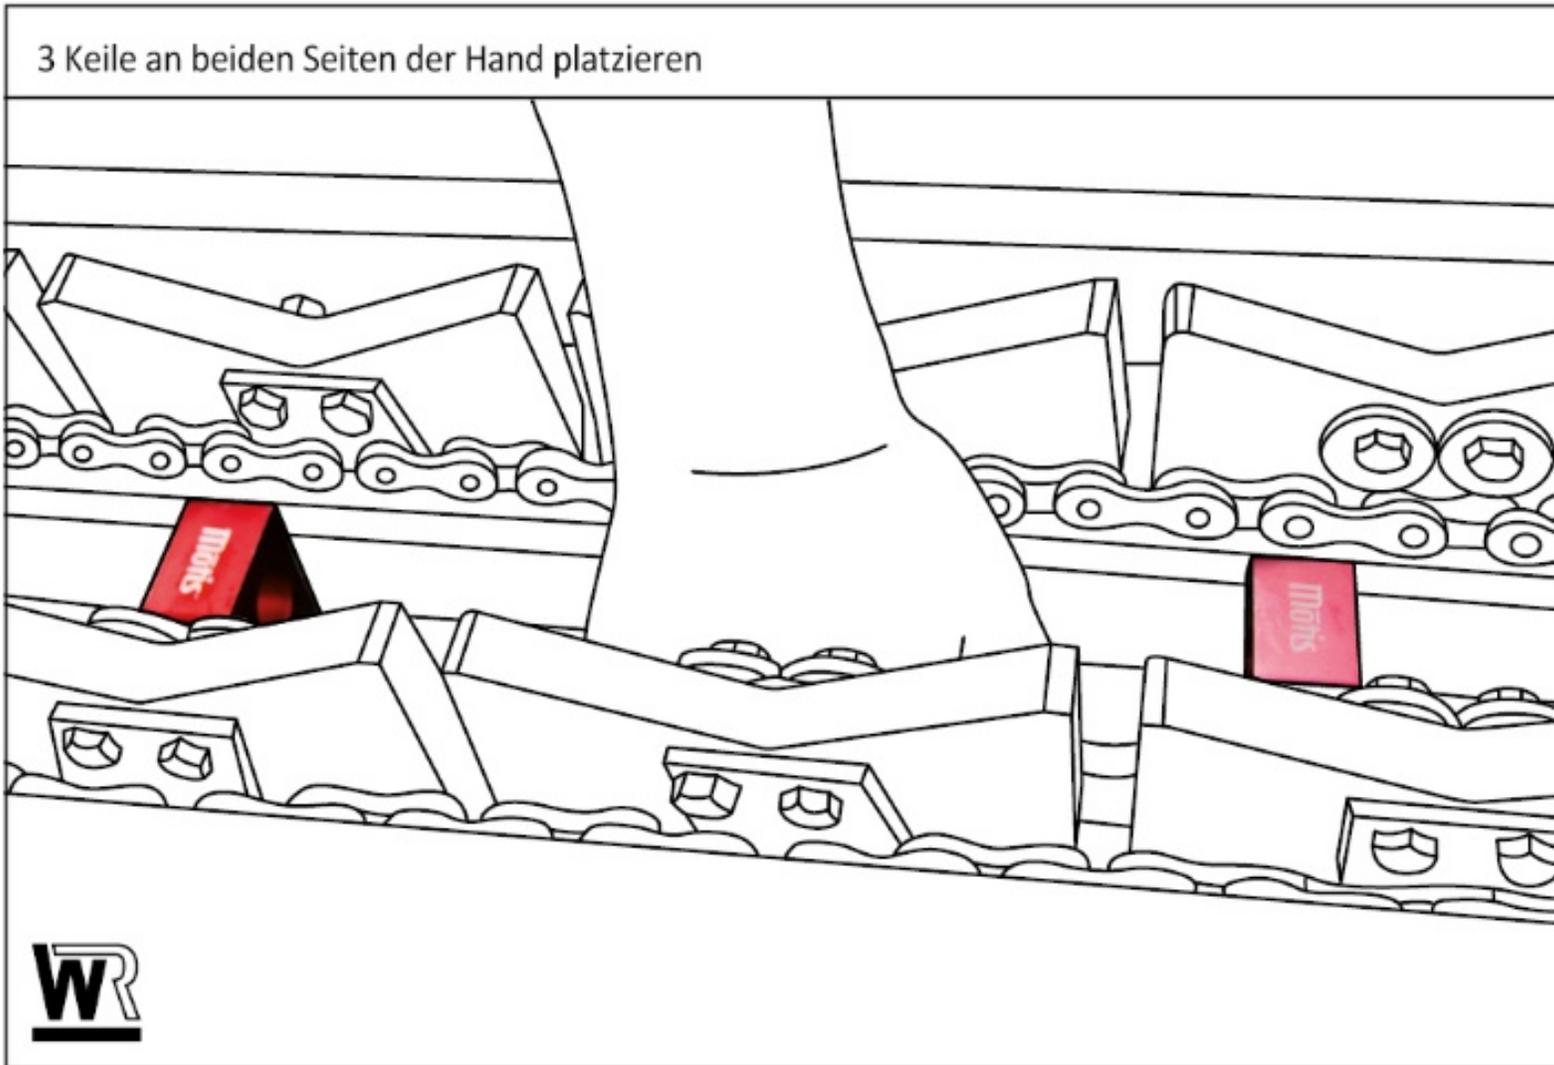

5 Hebekissen aufpumpen und Hand entklemmen

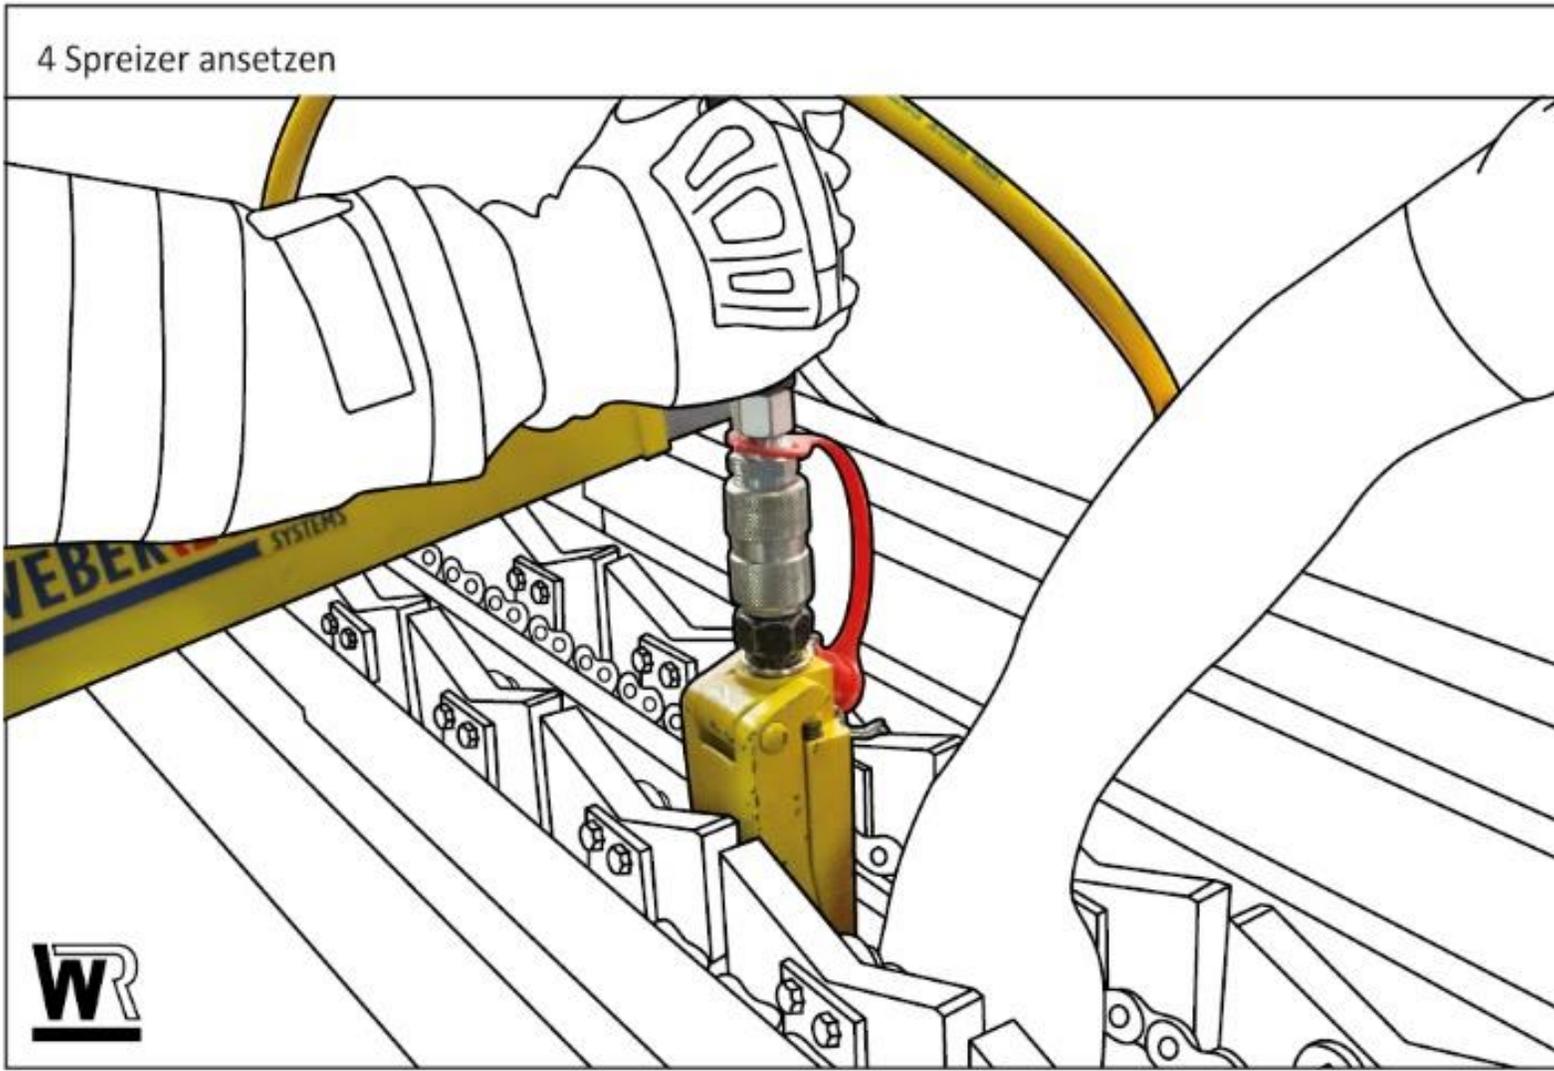

1 Equipment: Spreizer SP 1, Handpumpe und Keile

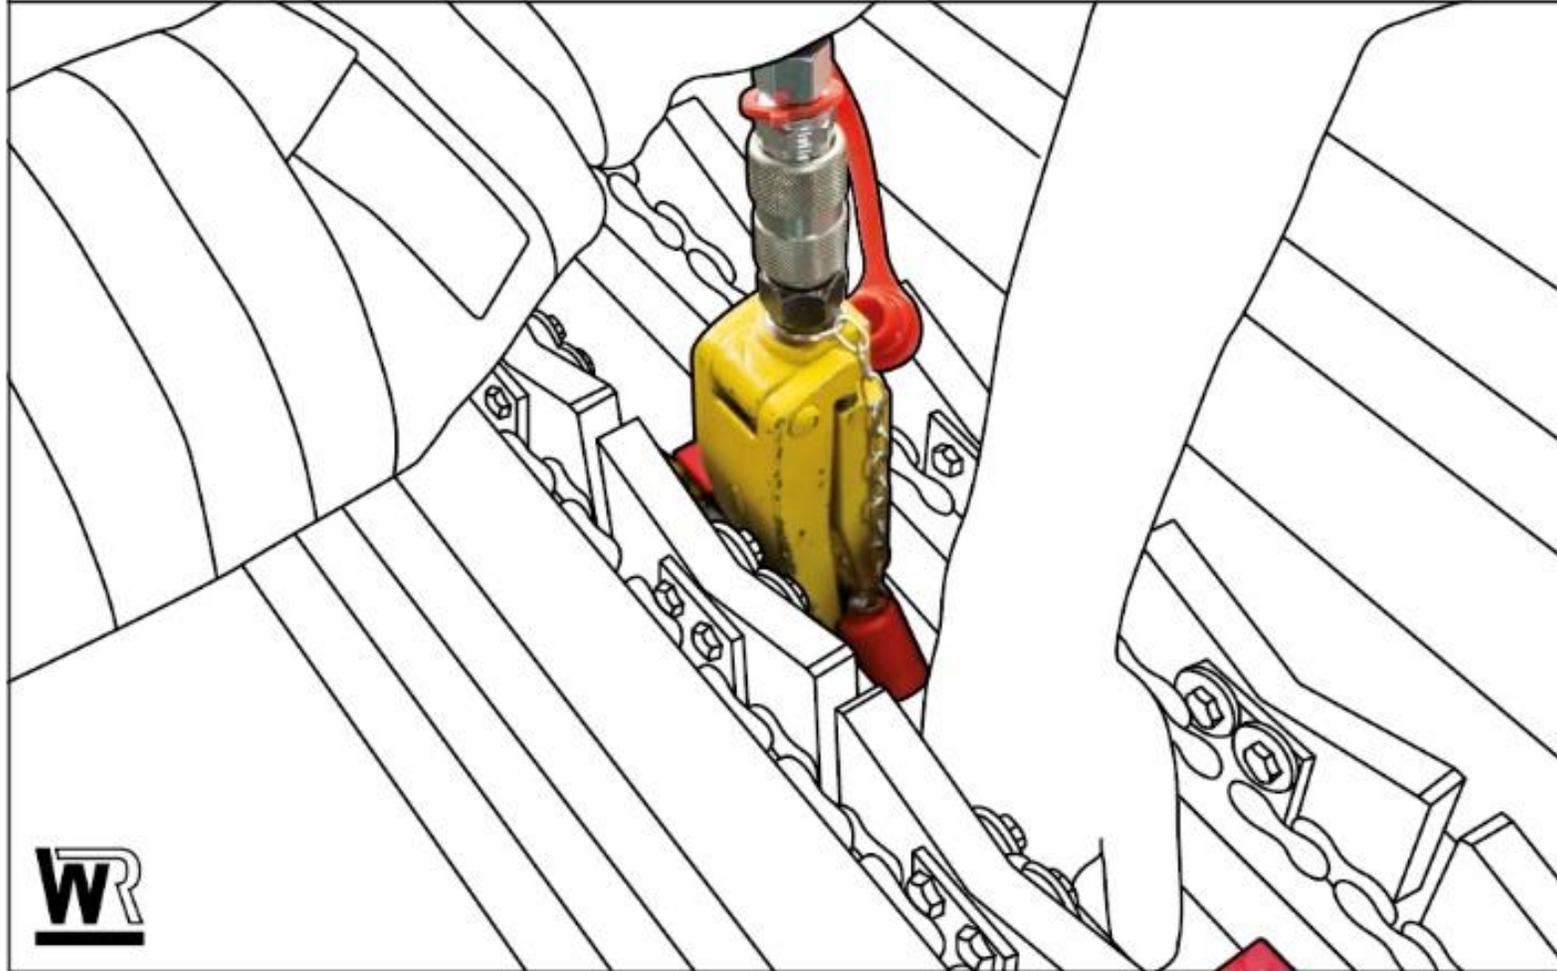

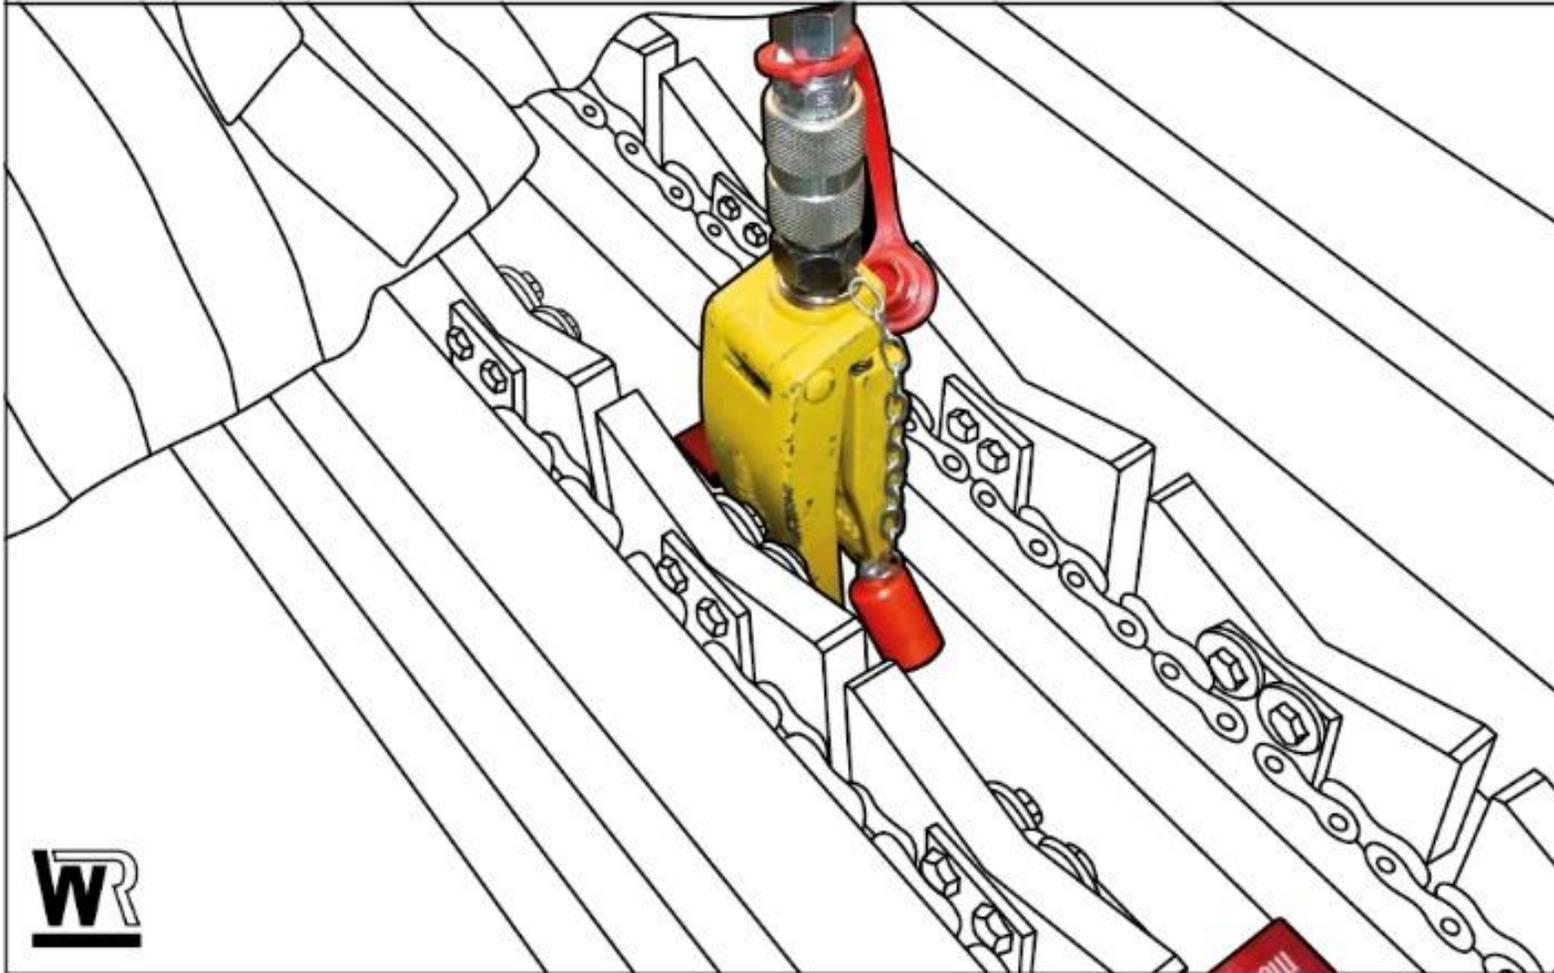

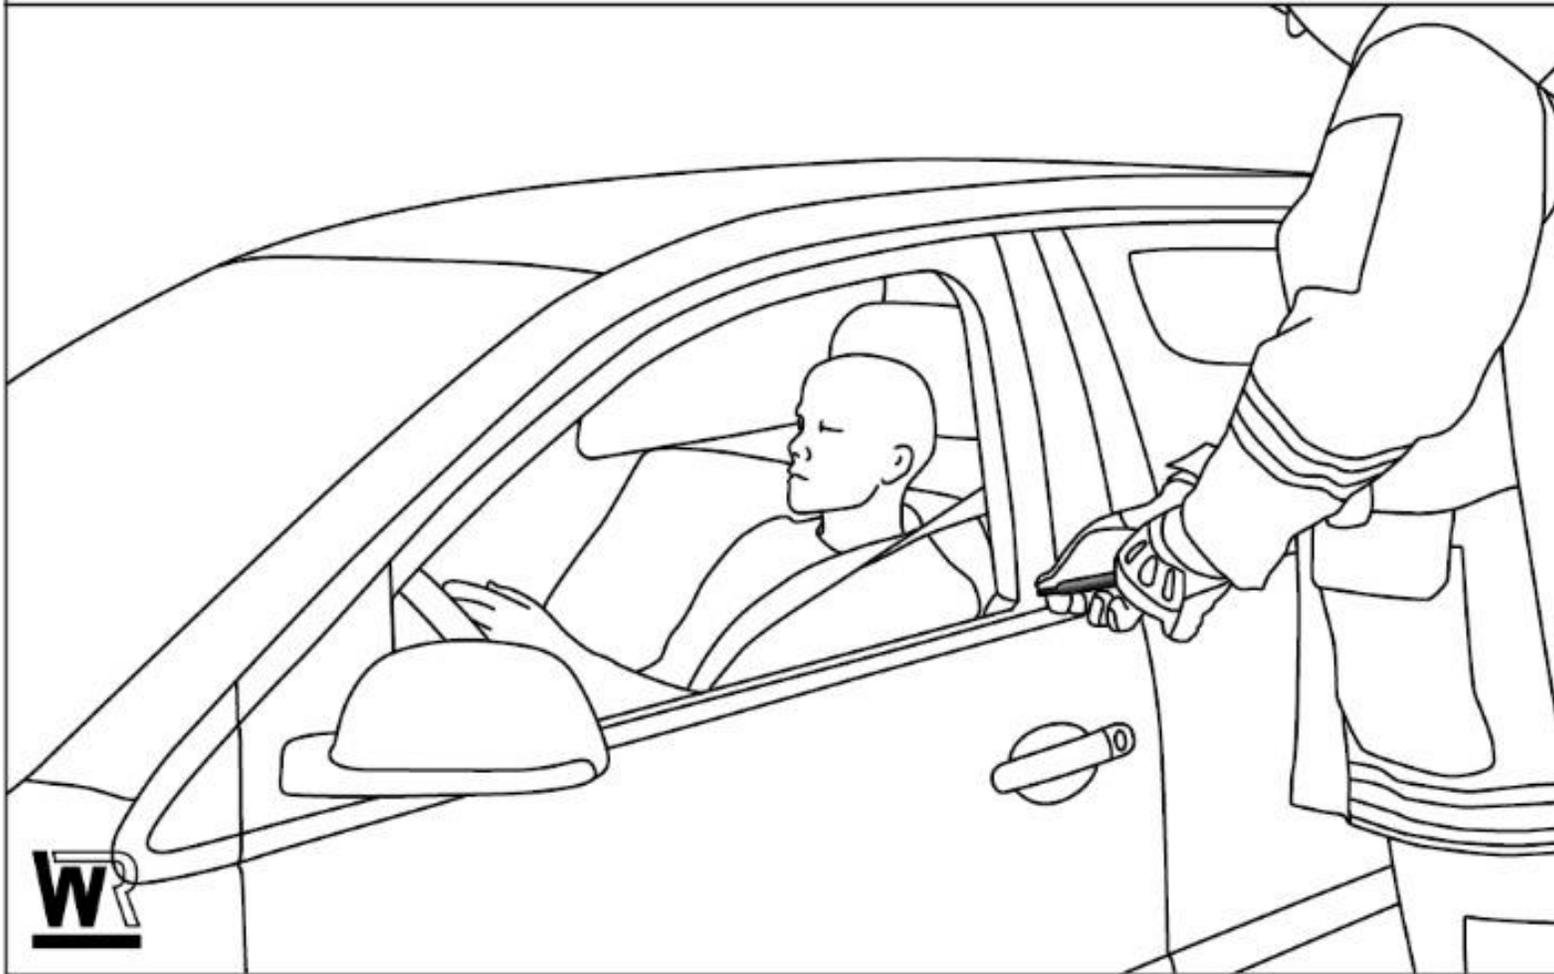

5 Spreizer öffnen und Spalt erweitern

6 Keile rutschen nach zur Sicherung, Hand befreit

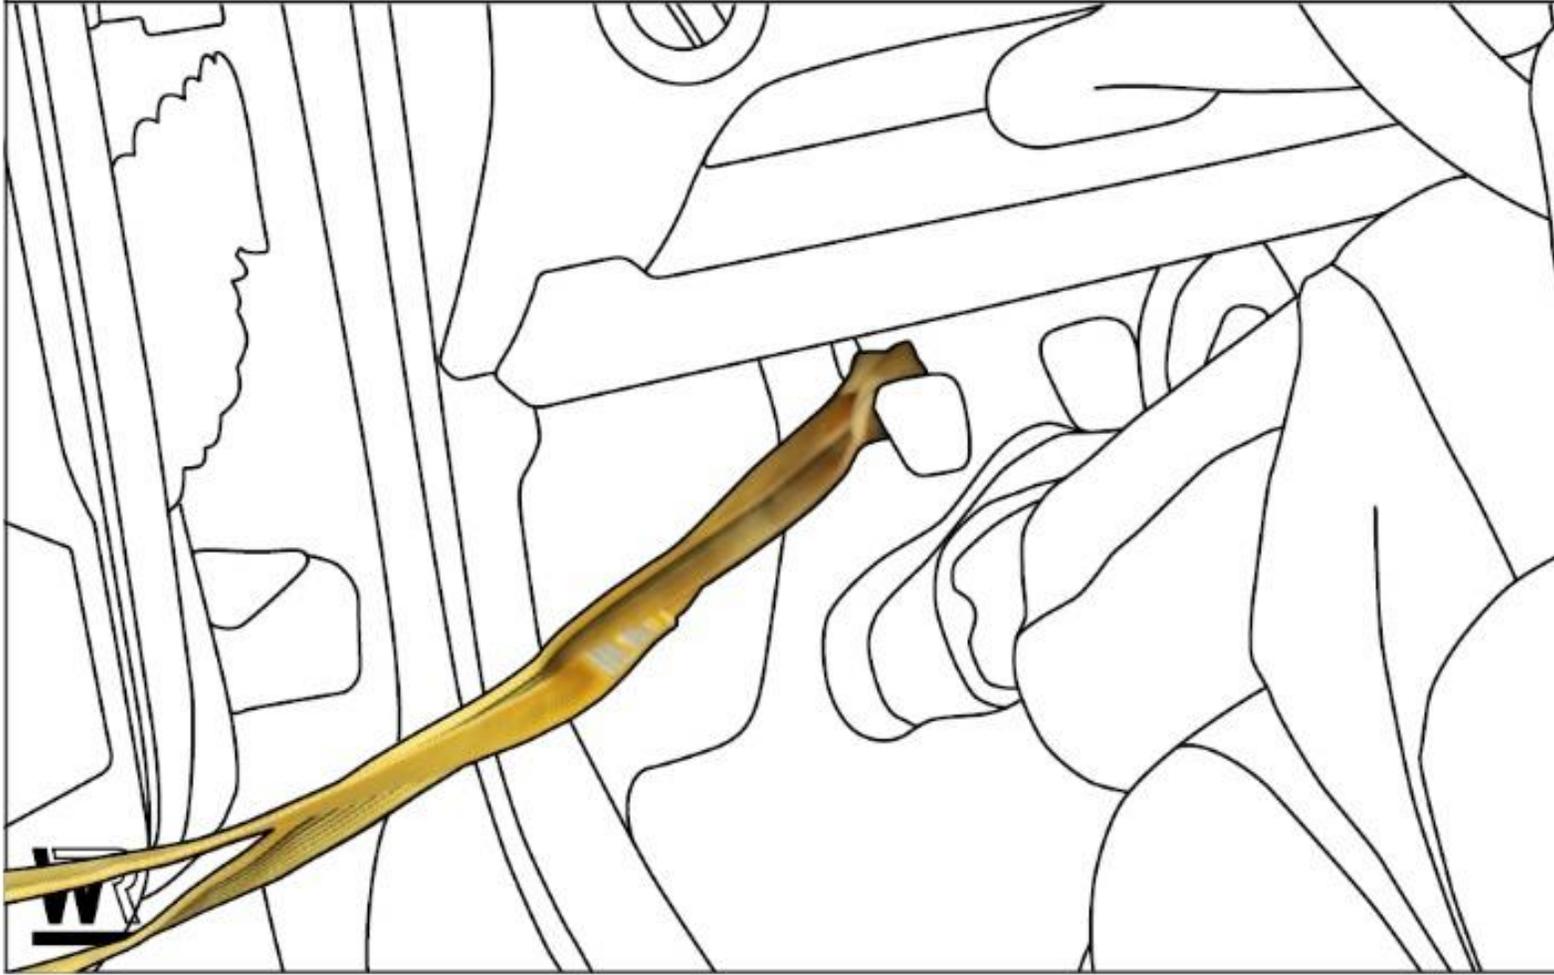

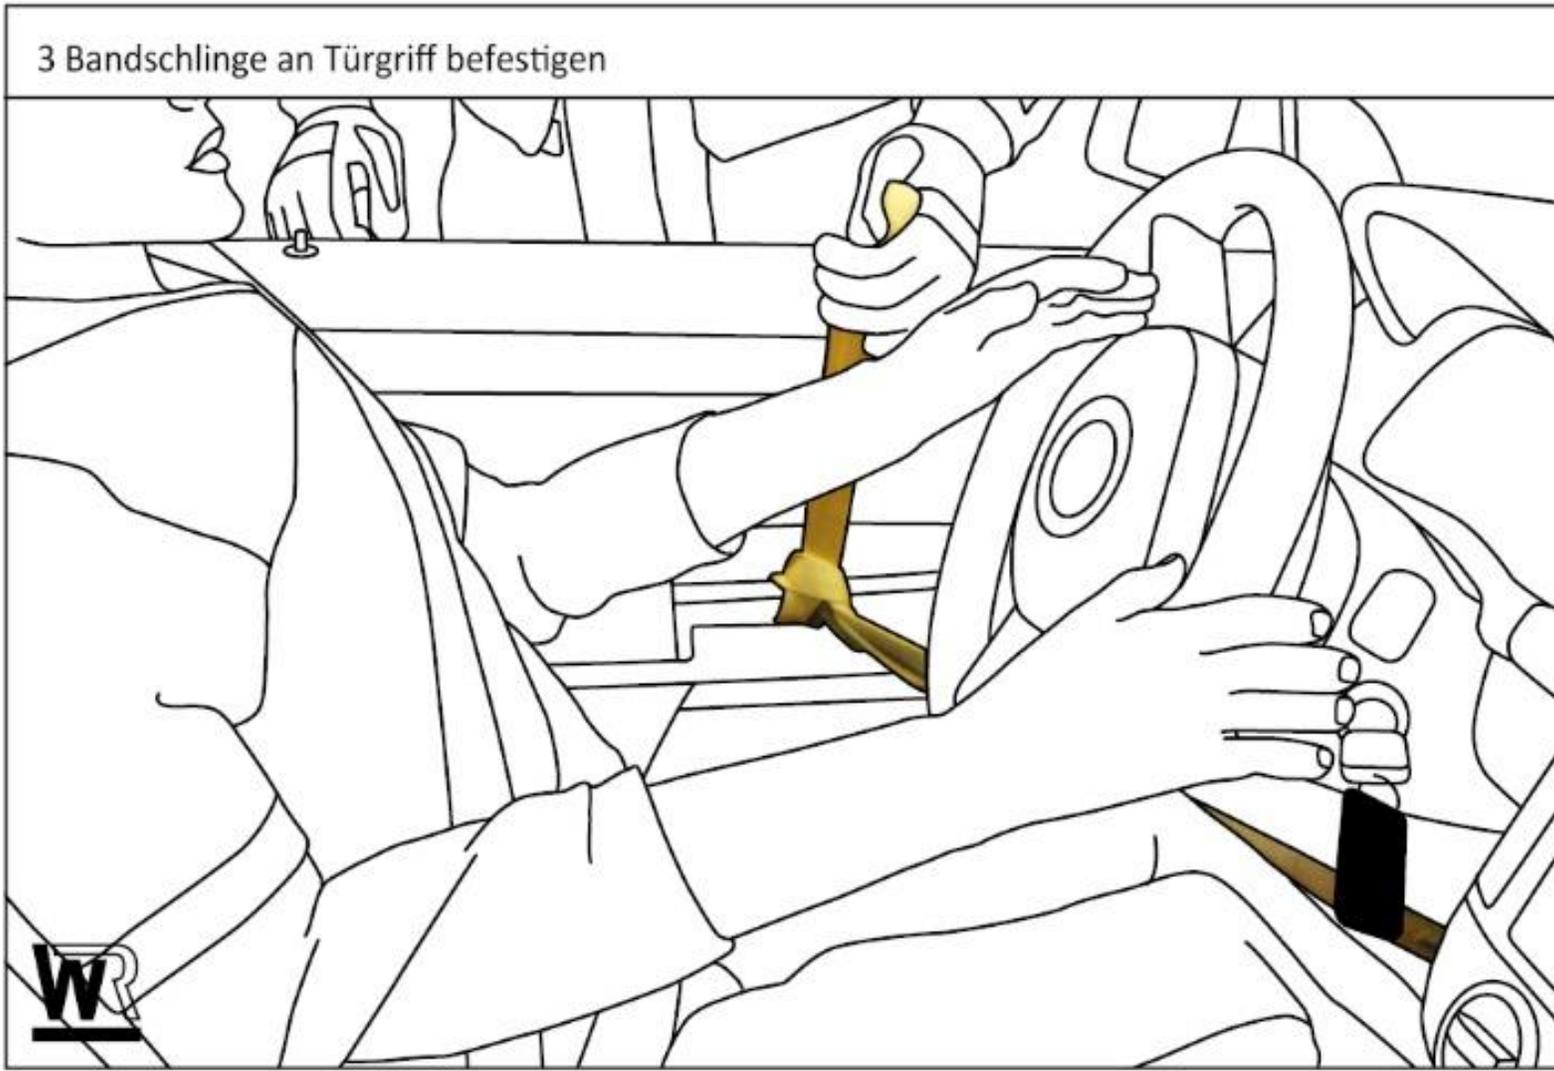

1 Scheibe Fahrerseite entfernen

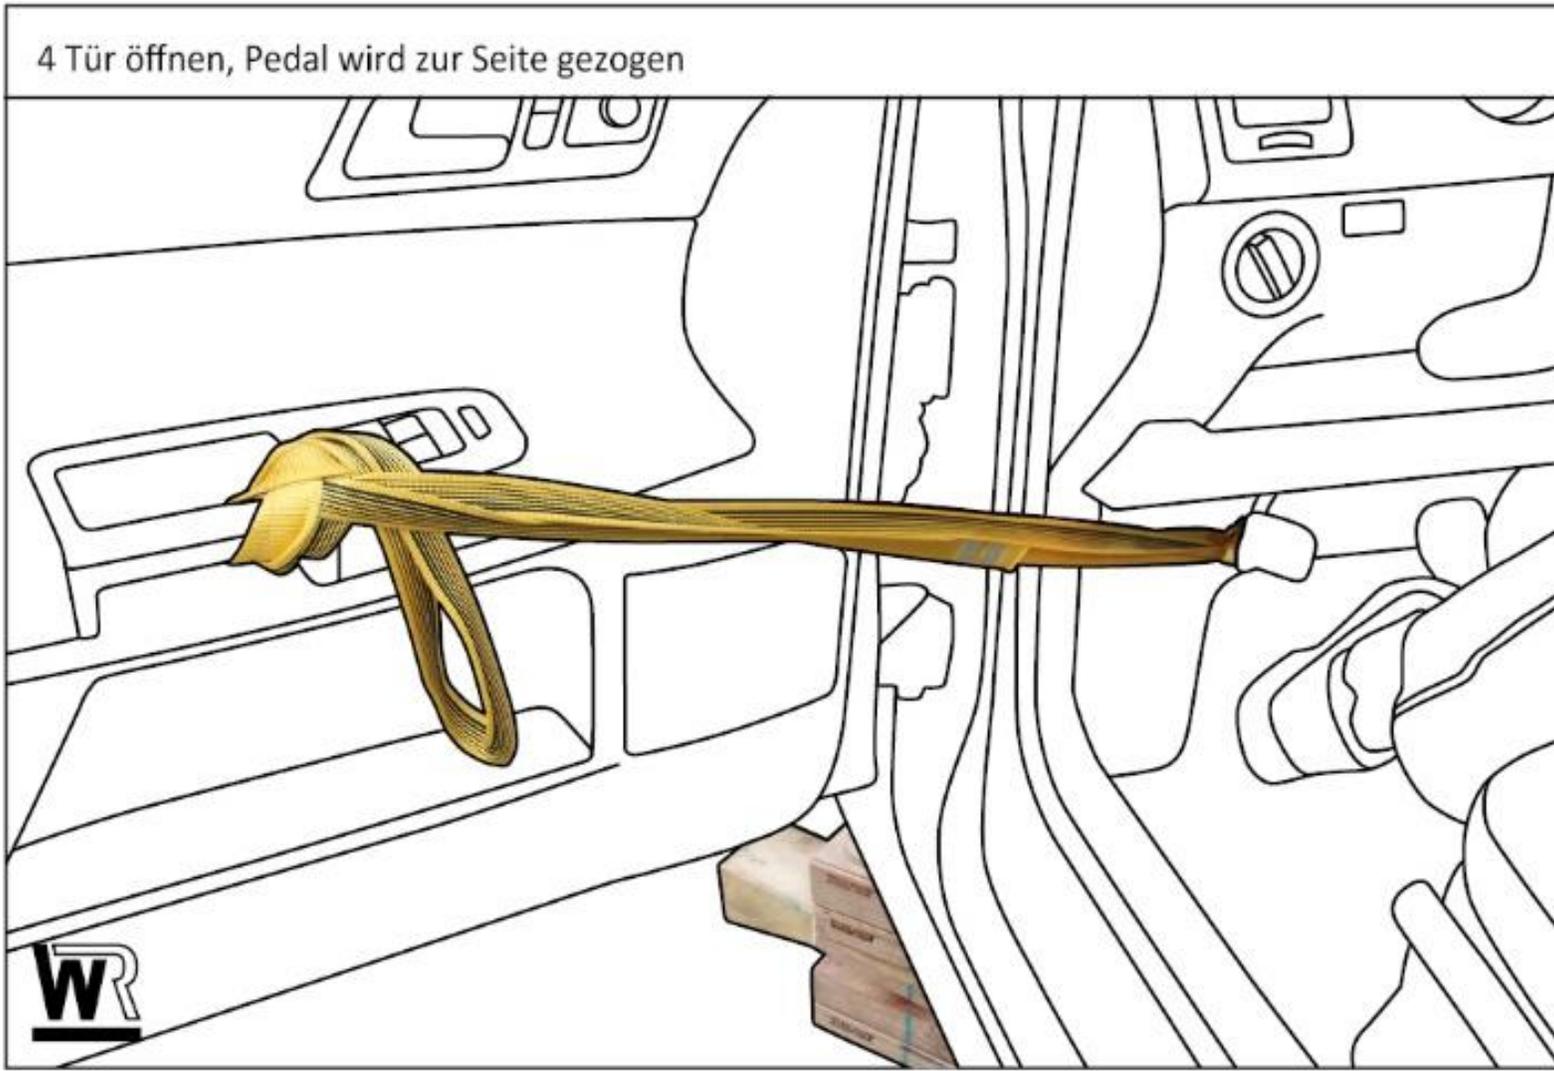

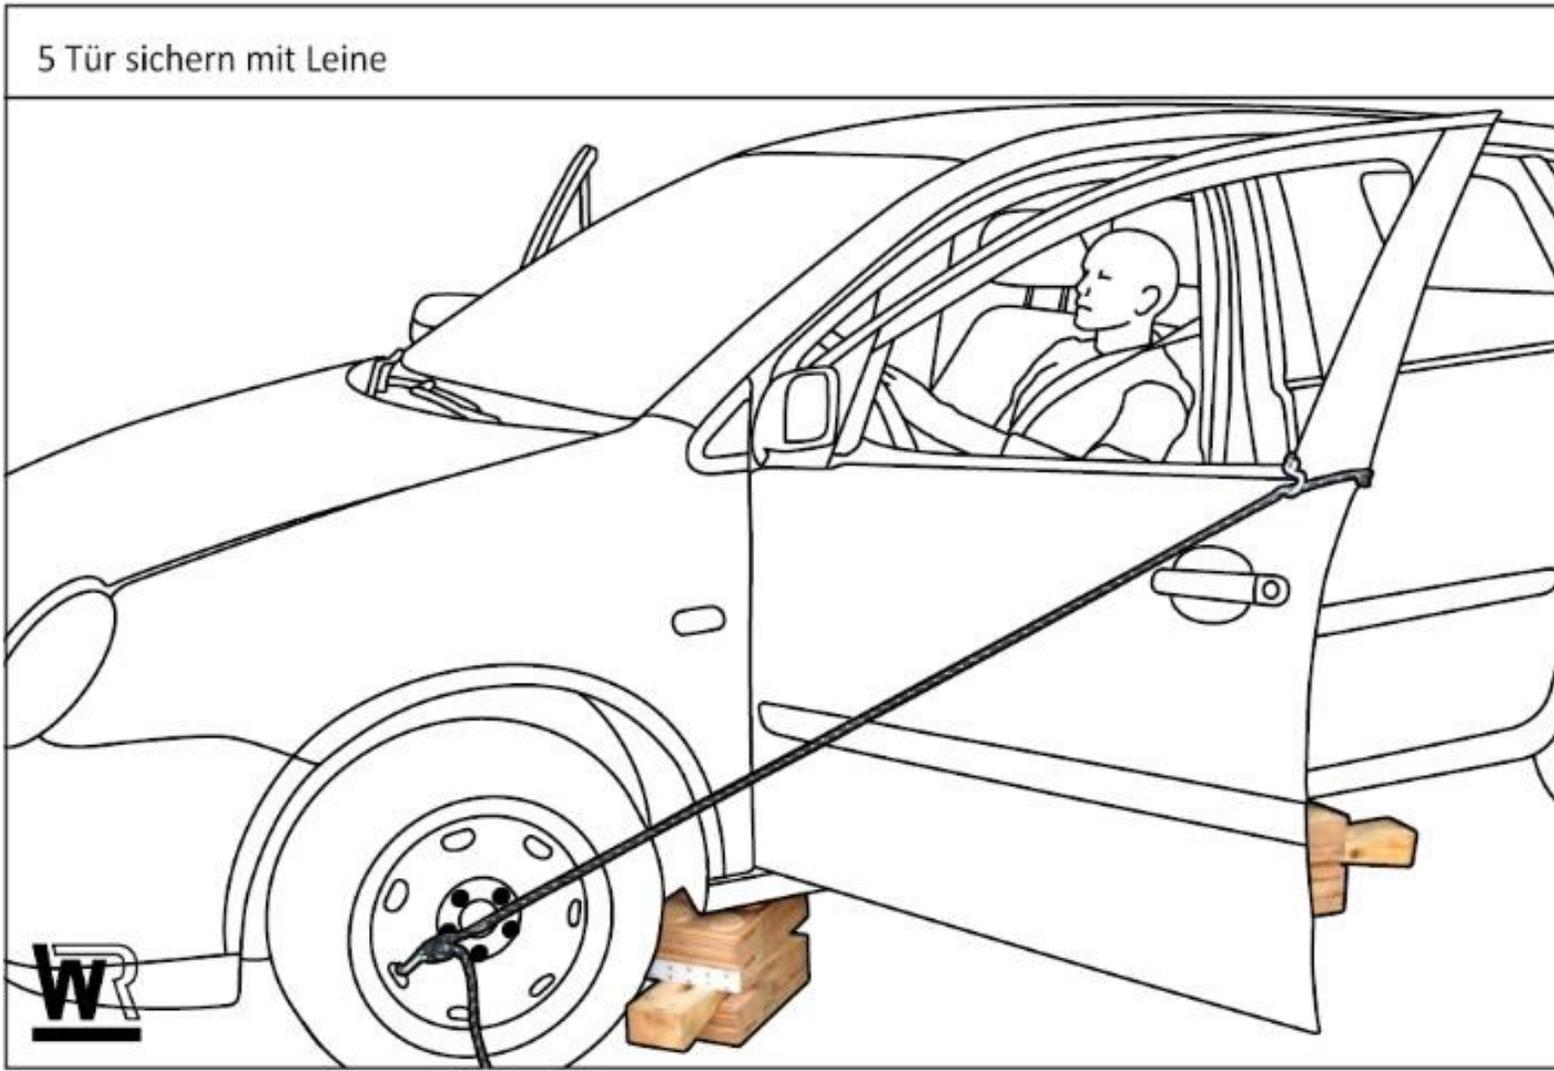

WR

2 Bandschlinge an Pedal befestigen

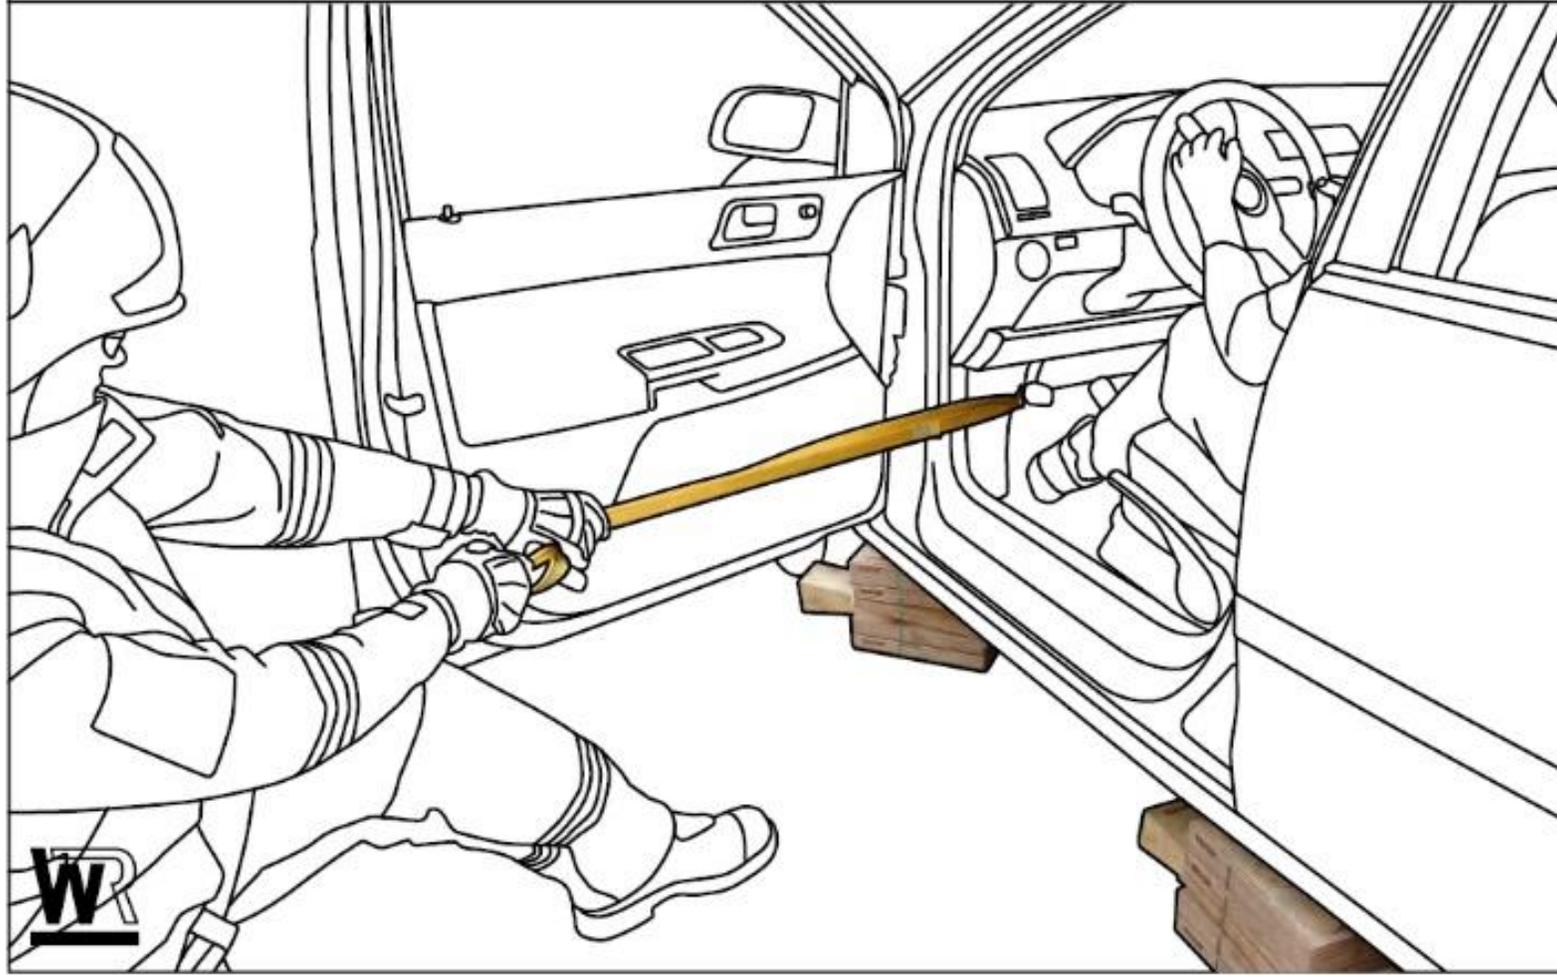

6 Alternativ: Bandschlinge von Hand ziehen

1 Equipment: RIT-Tool mit Türöffnerspitzen

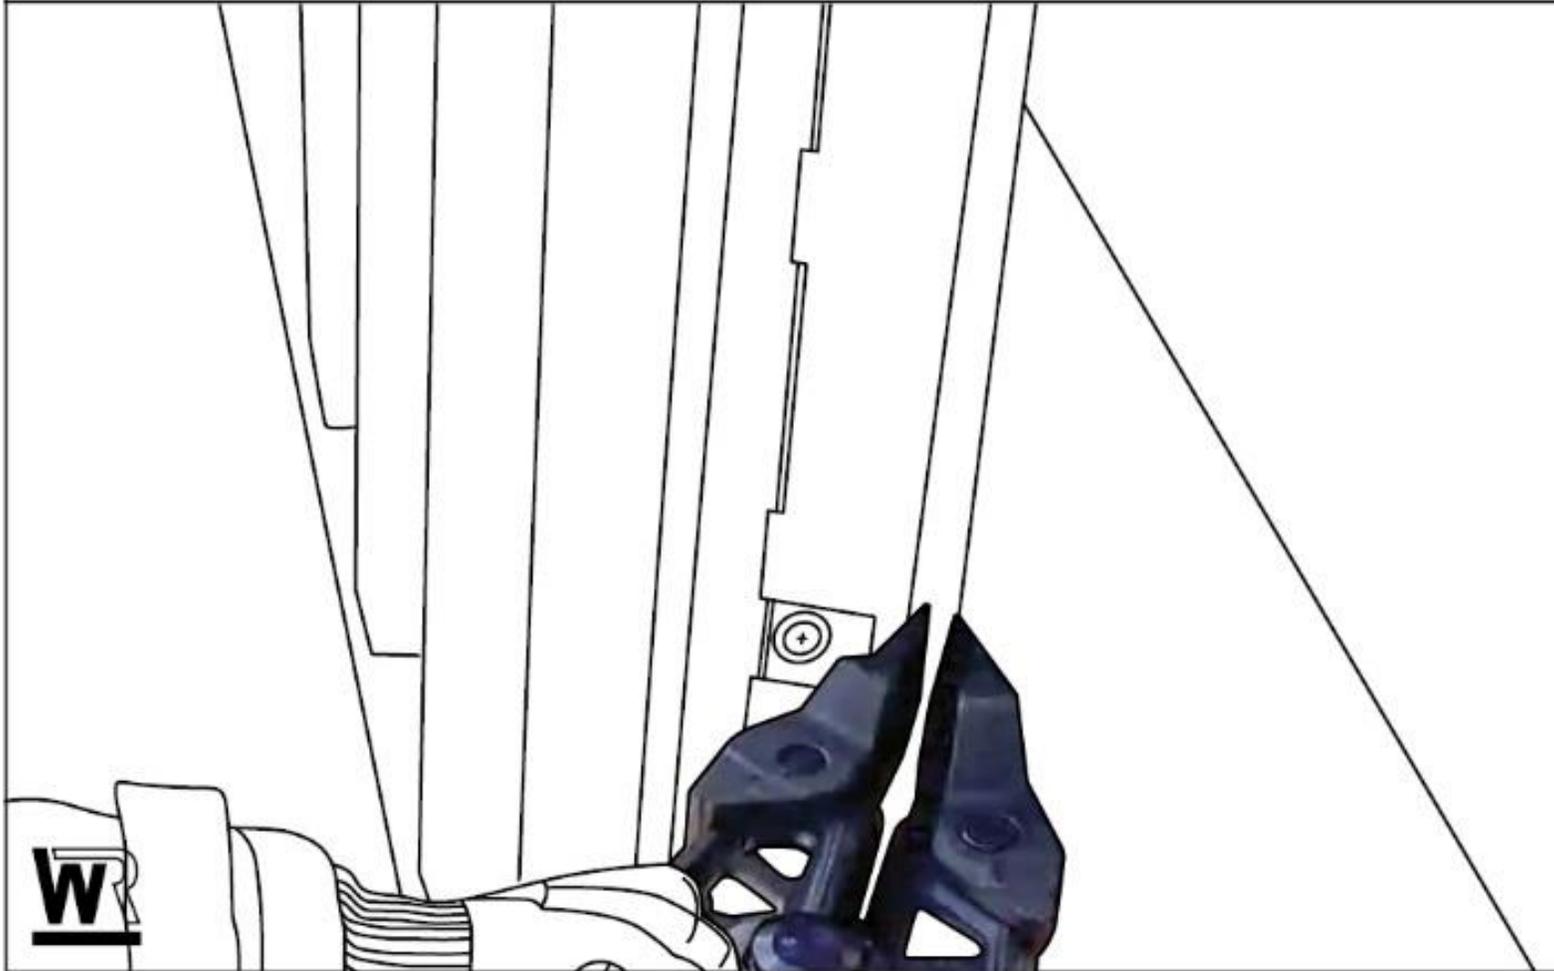

2 Ansetzen an nach innen öffnender Tür

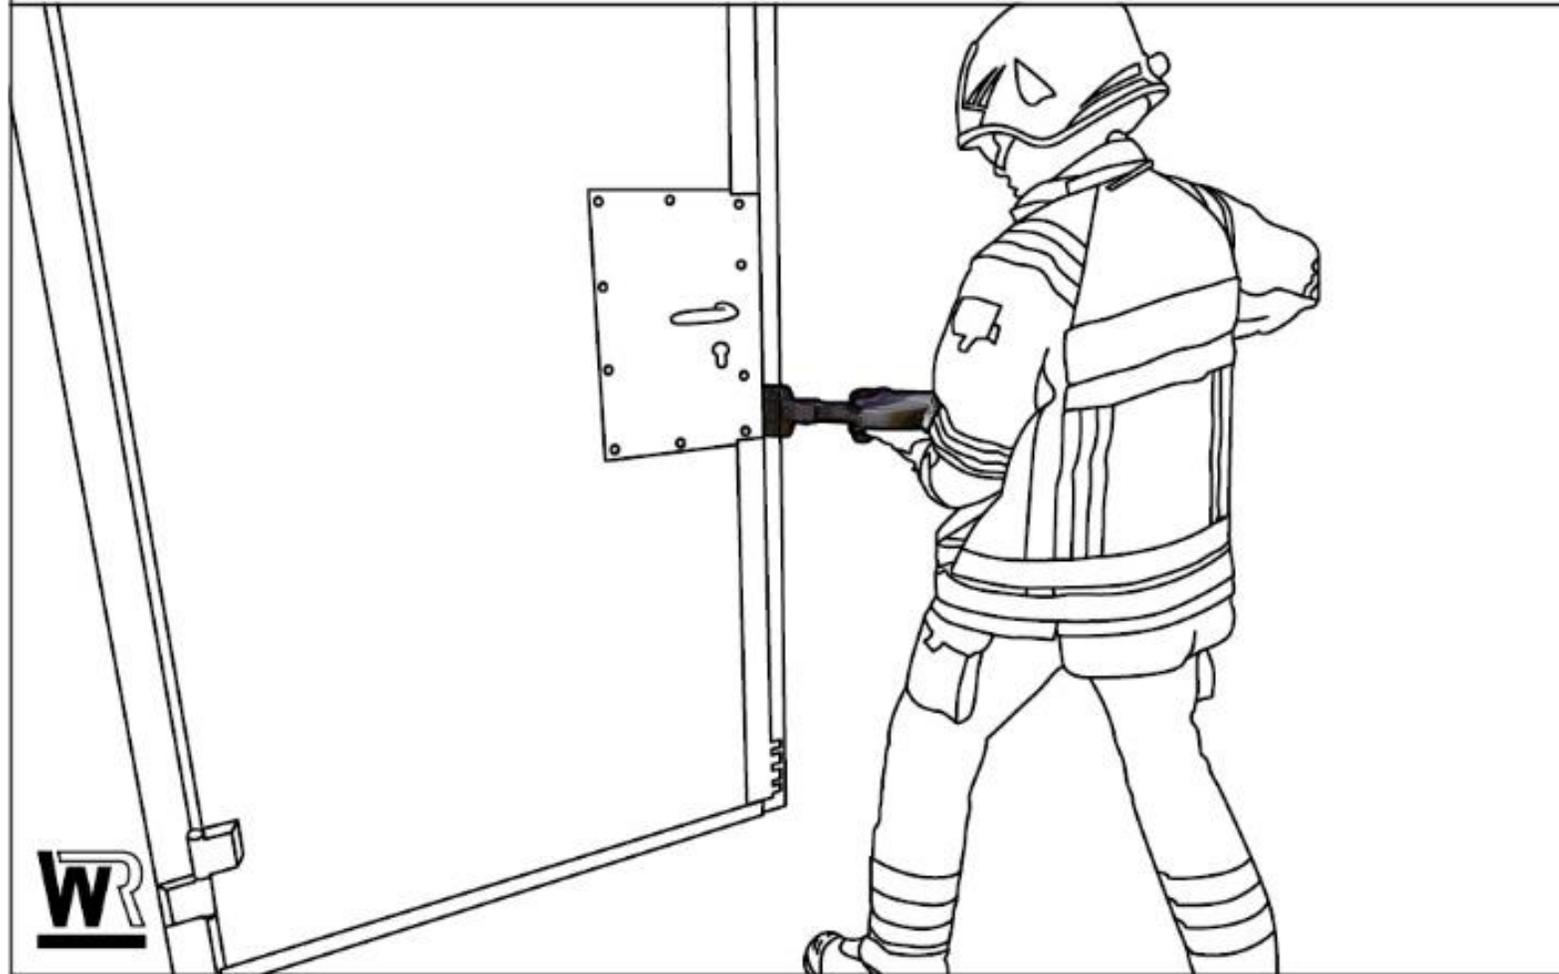

3 Türöffnerspitzen so tief wie möglich in den Türspalt drücken

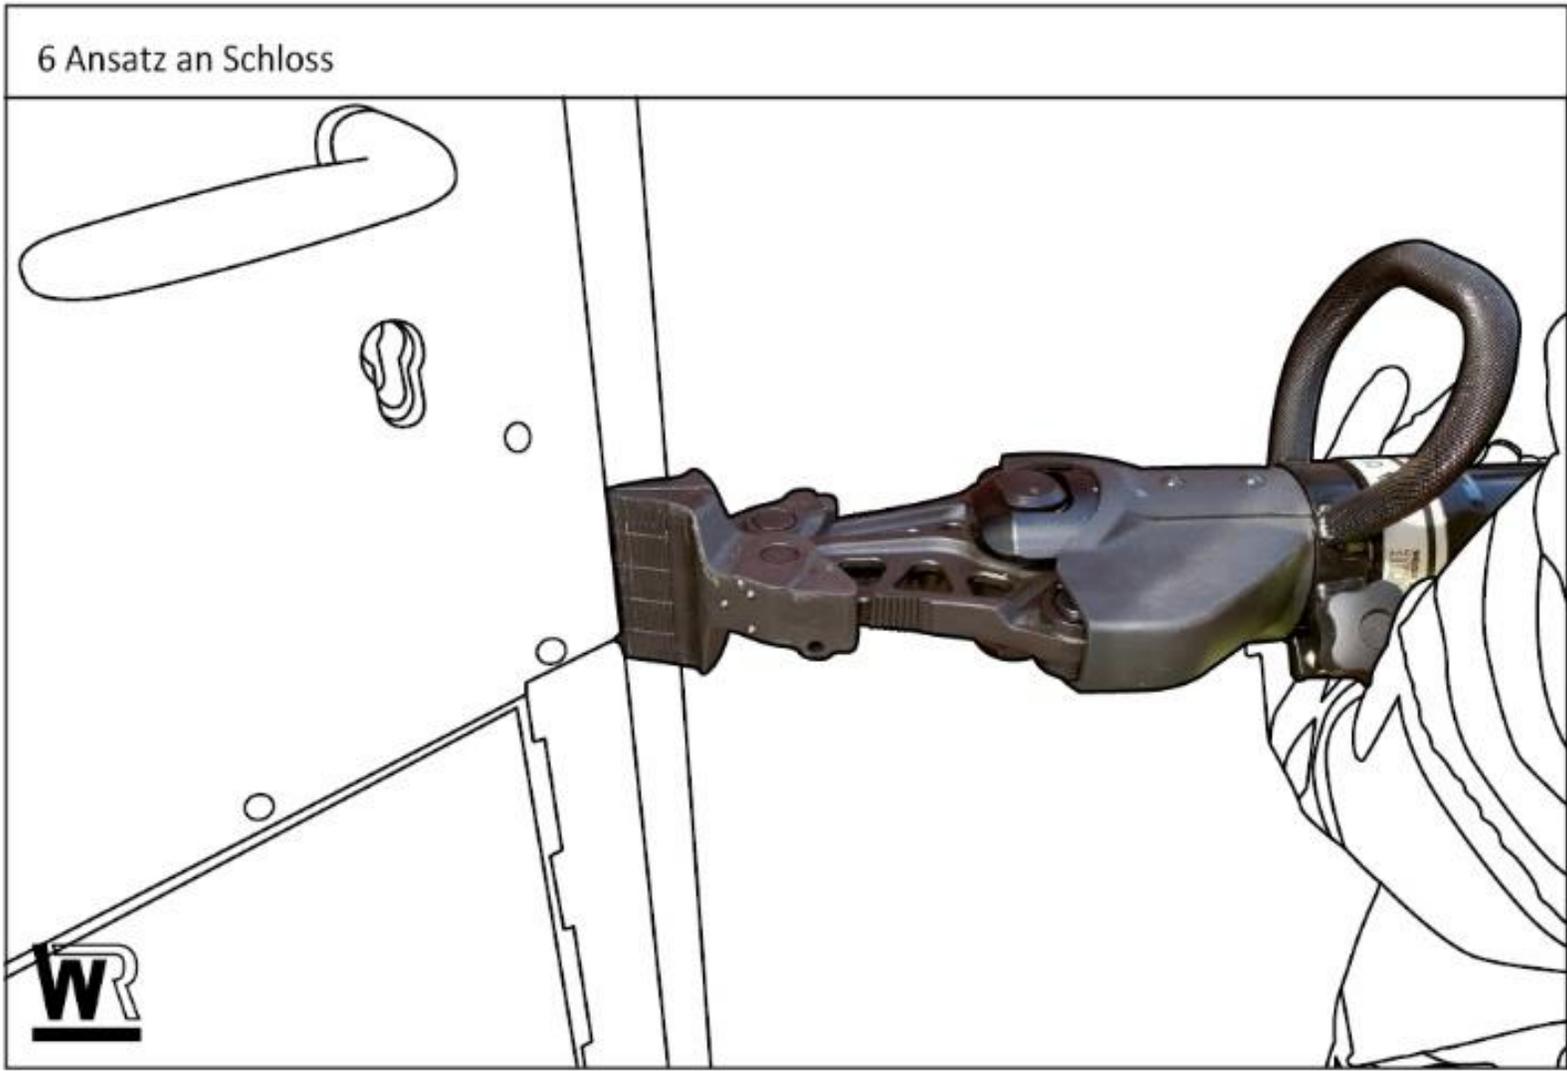

4 Gegebenenfalls nachsetzen und Tür öffnen

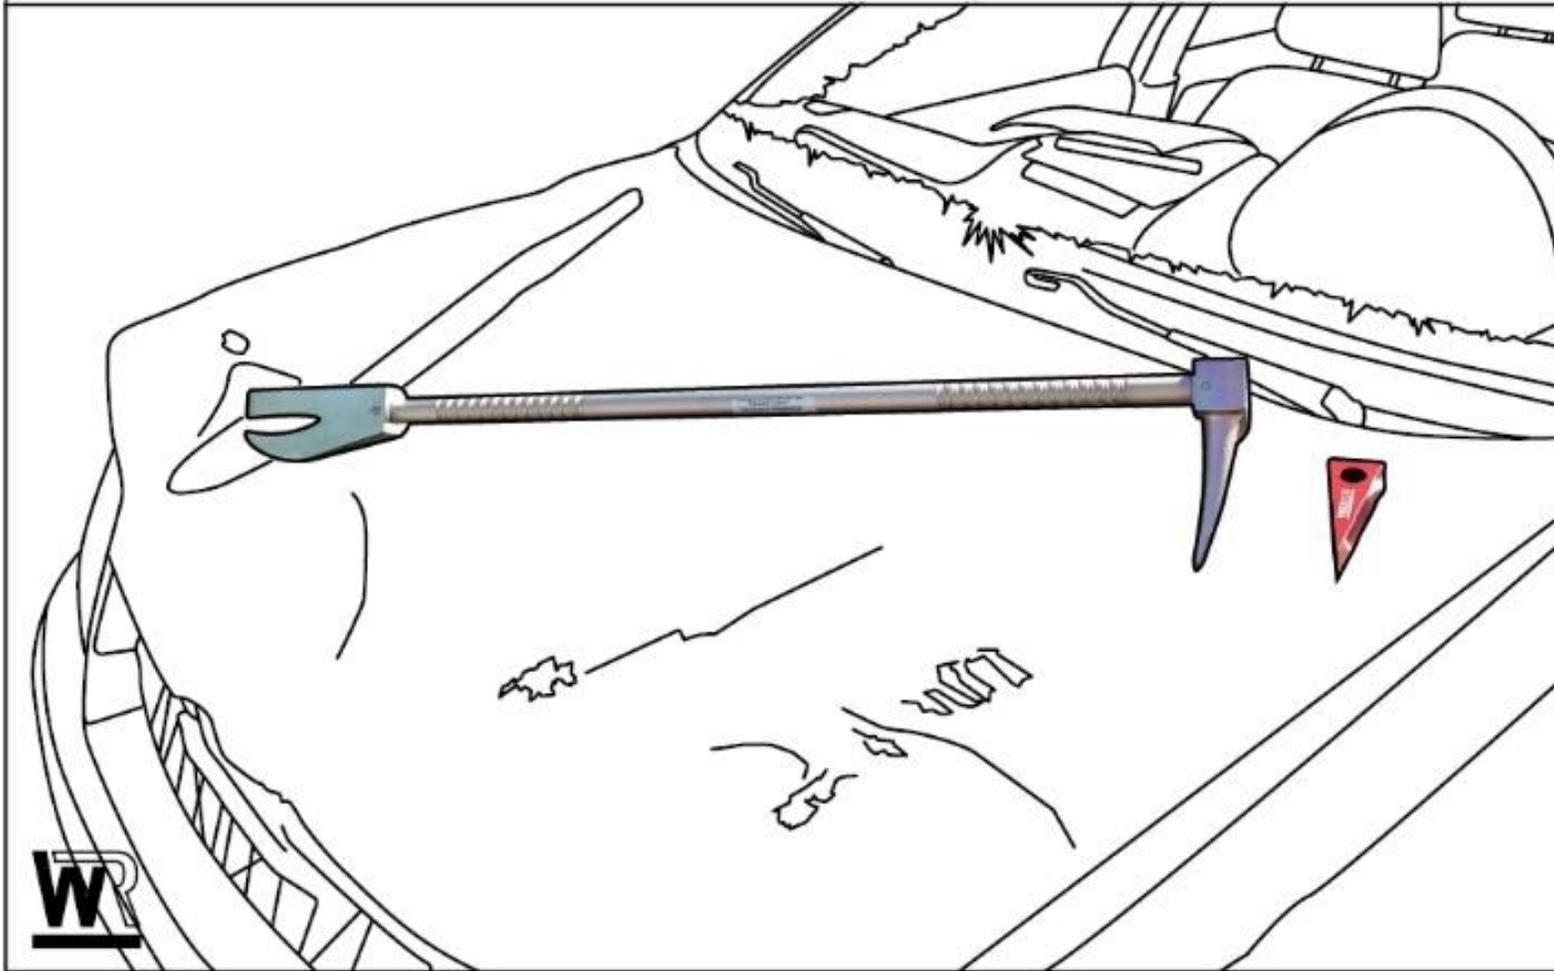

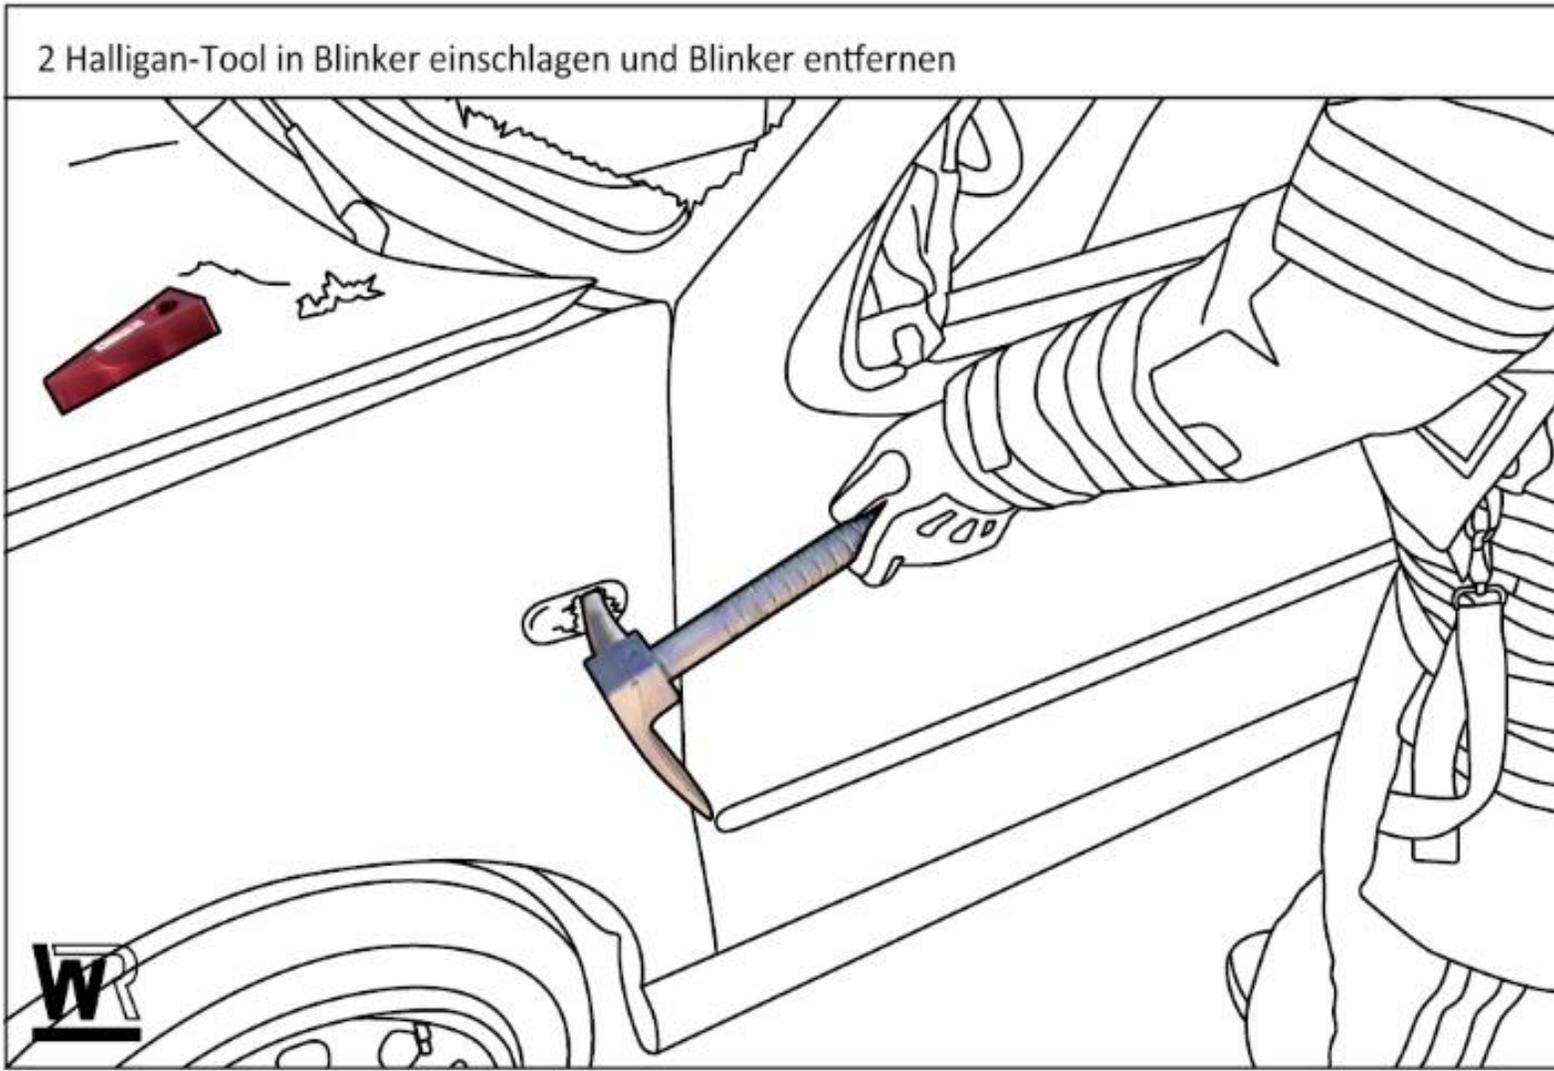

5 Ansetzen an nach außen öffnender Tür

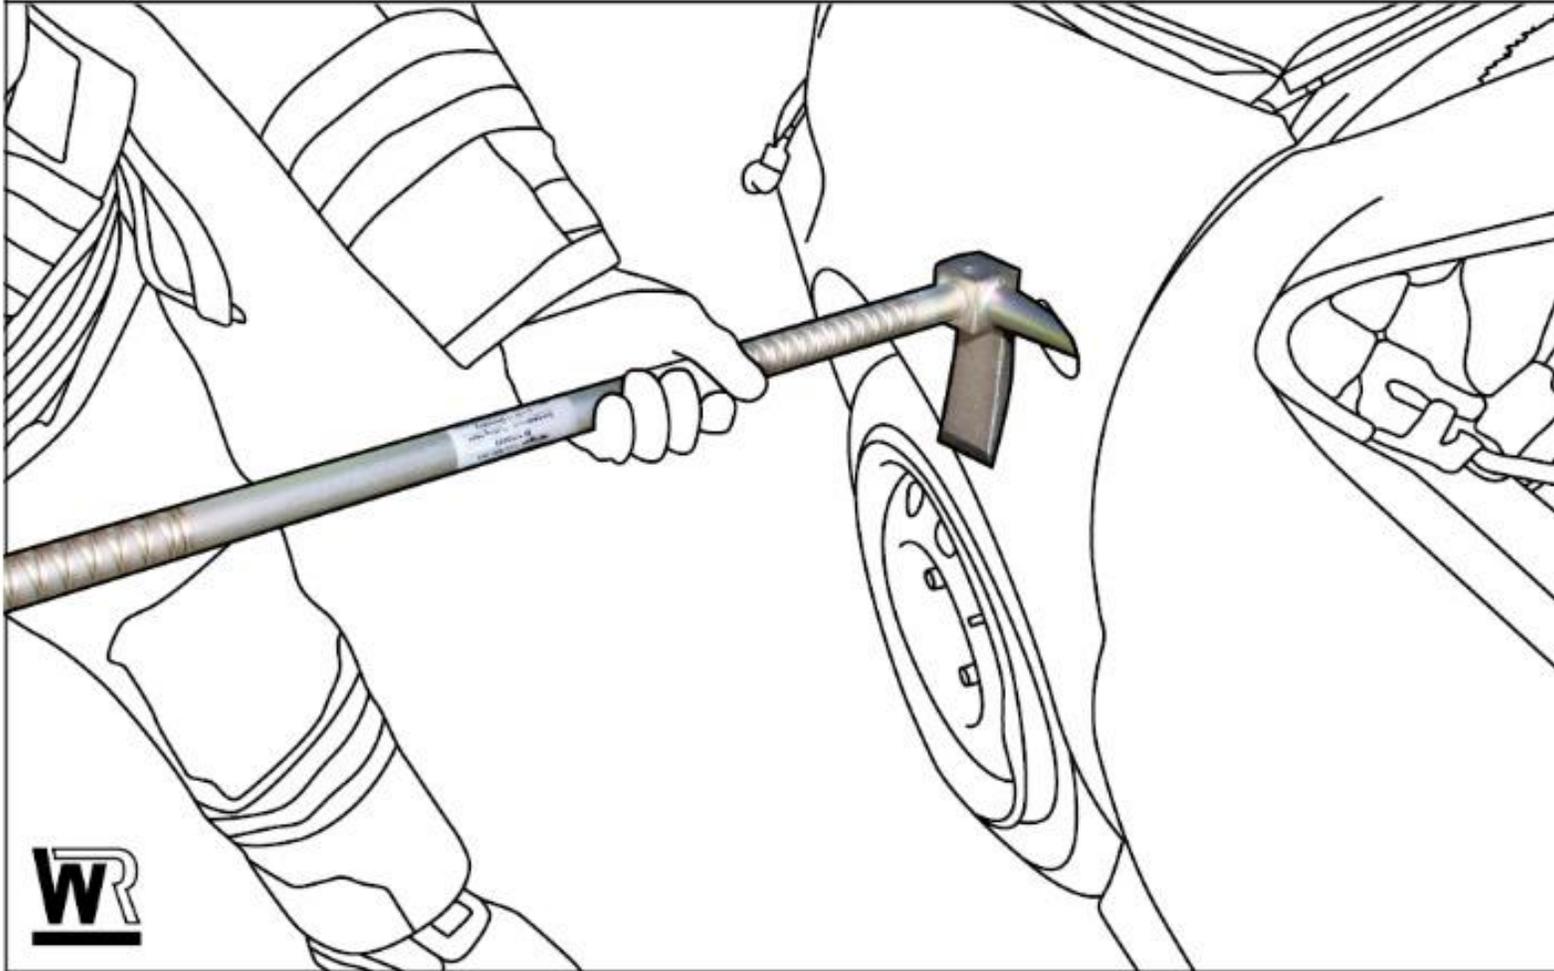

1 Equipment: Halligan-Tool und Keil

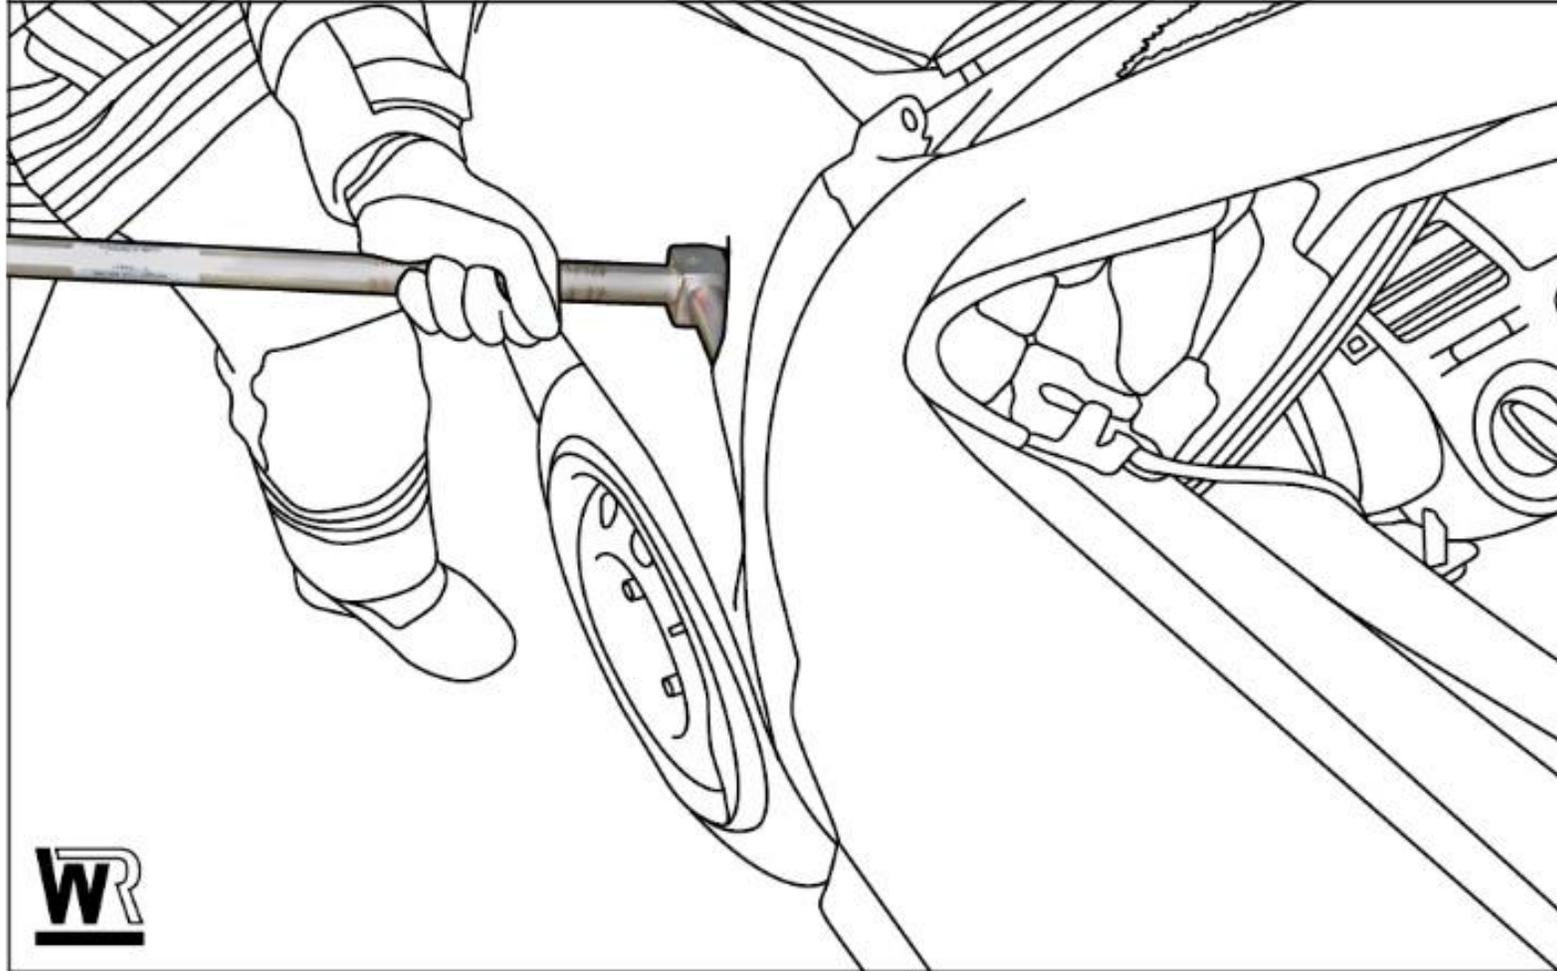

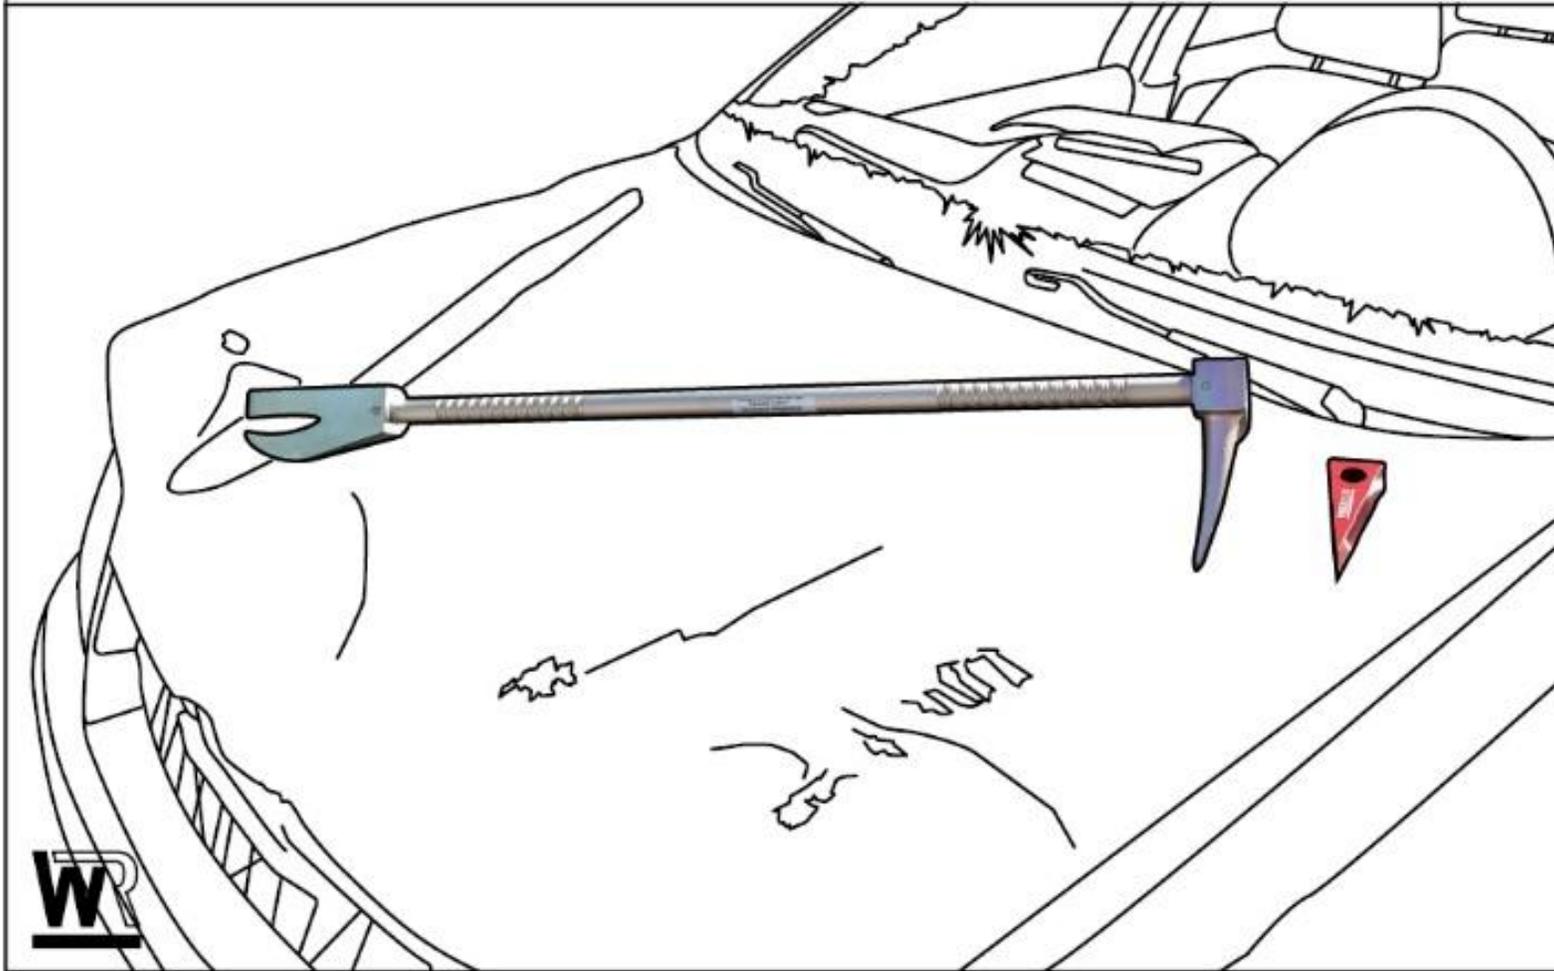

3 Halligan-Tool in Blinkeröffnung ansetzen

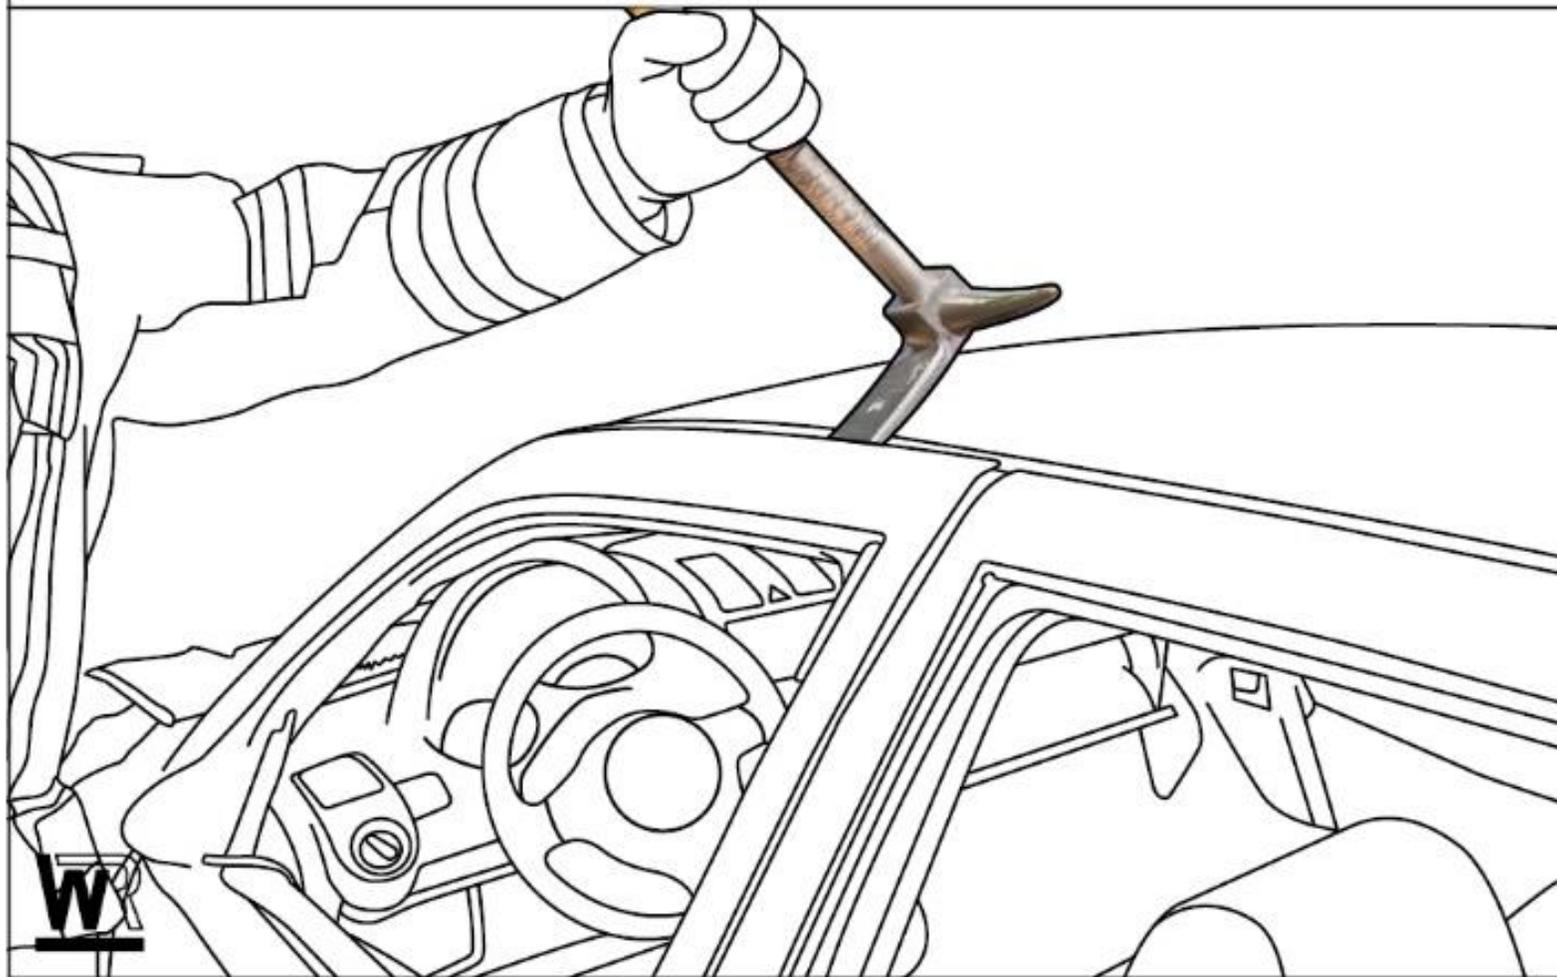

4 Halligantool abkippen und Spalt für Ansatz des Spreizers schaffen

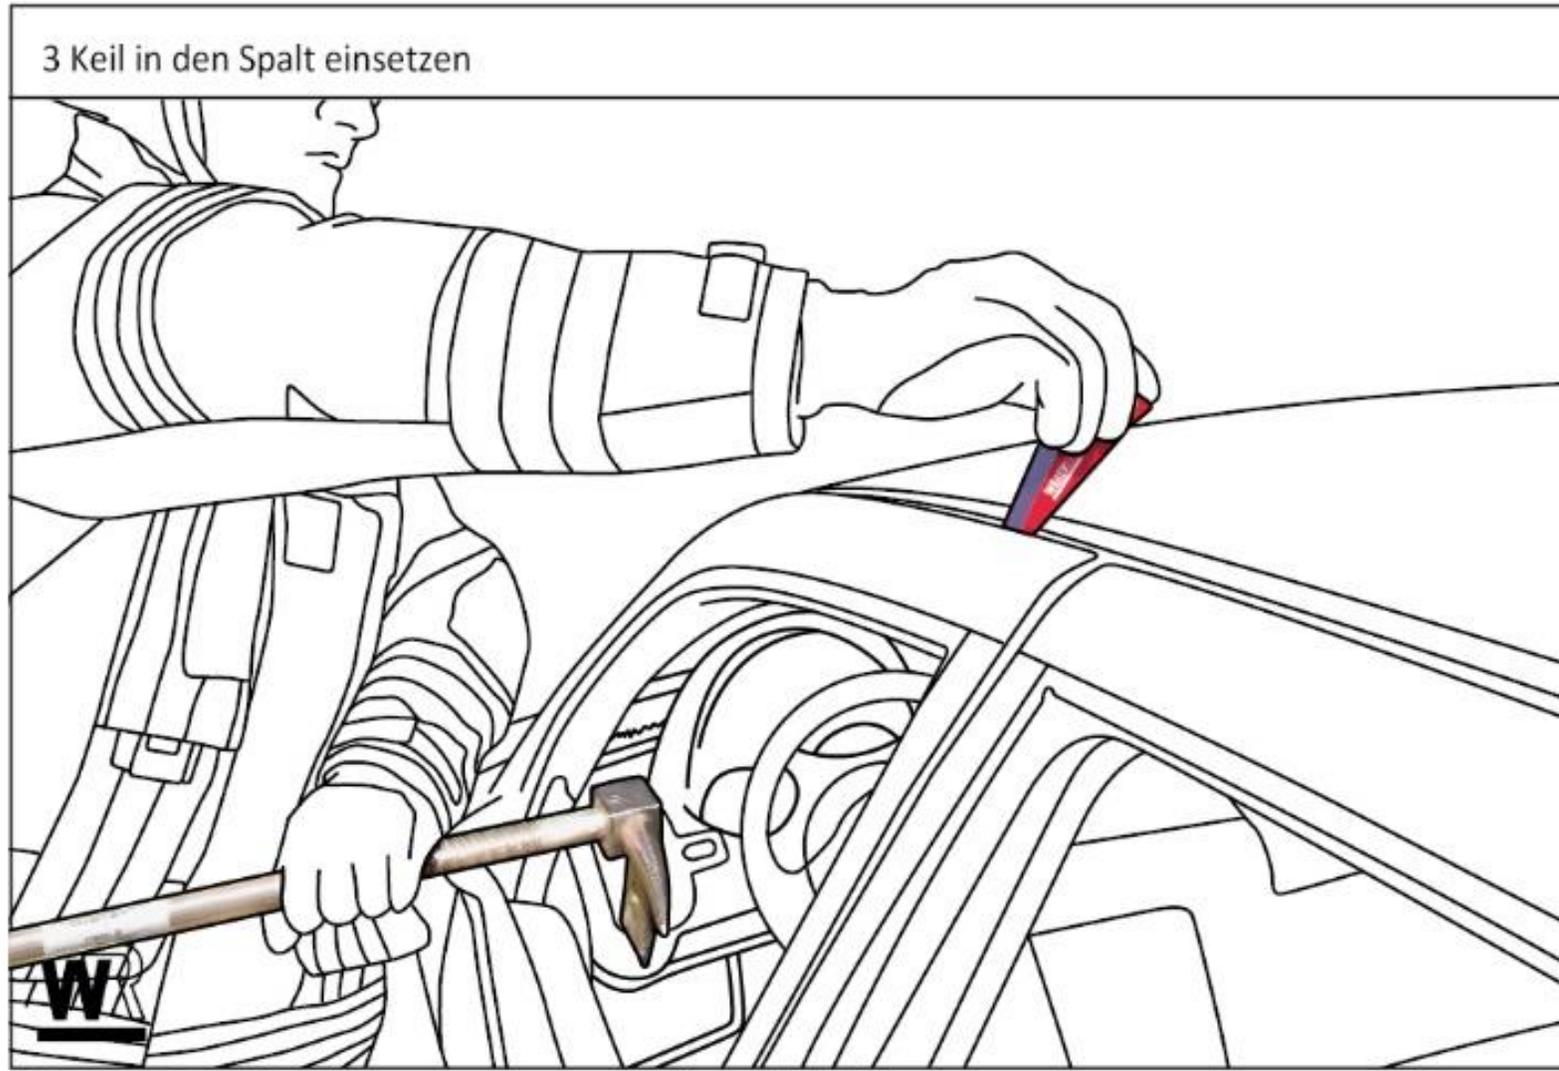

1 Equipment: Halligan-Tool und Keil

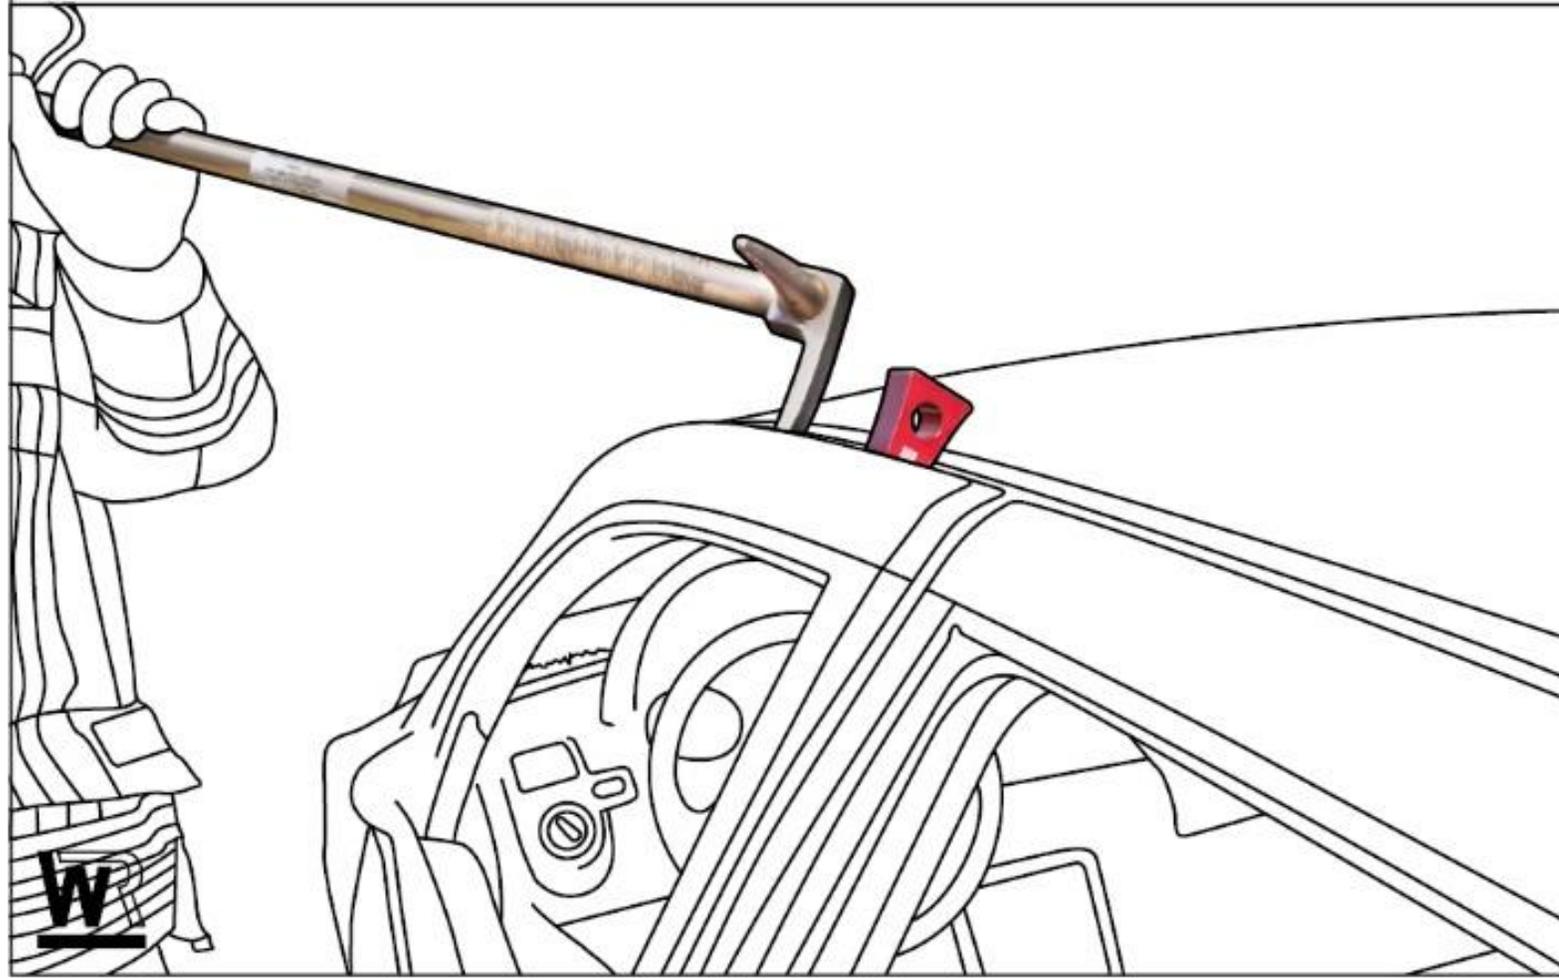

2 Halligan-Tool an Oberkante der Tür ansetzen und nach hinten kippen

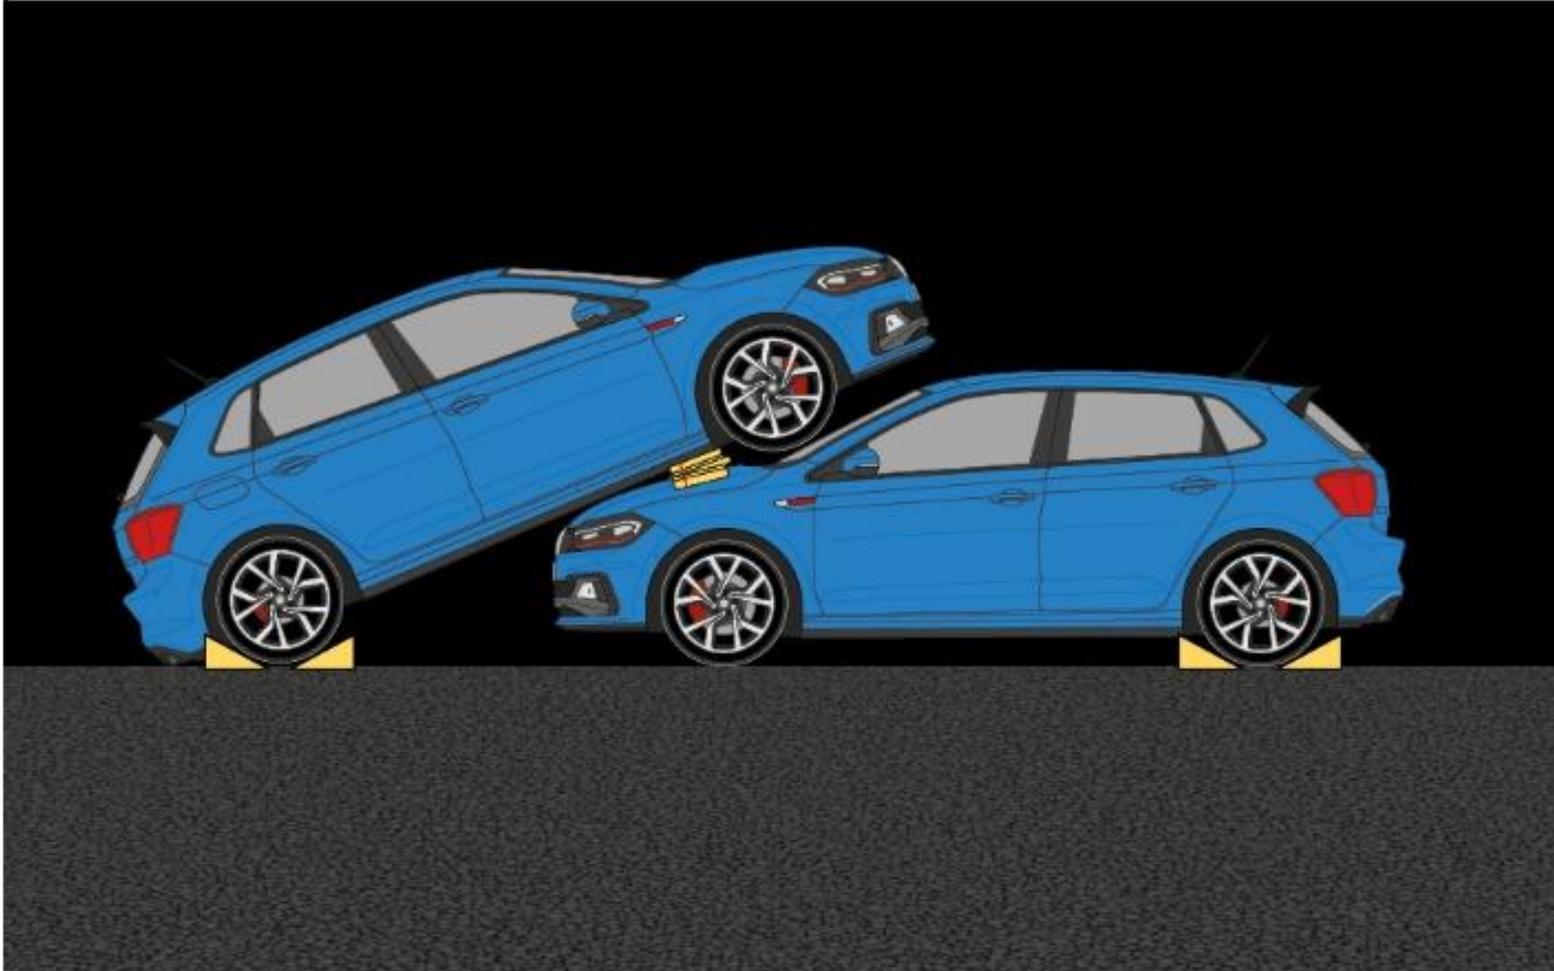

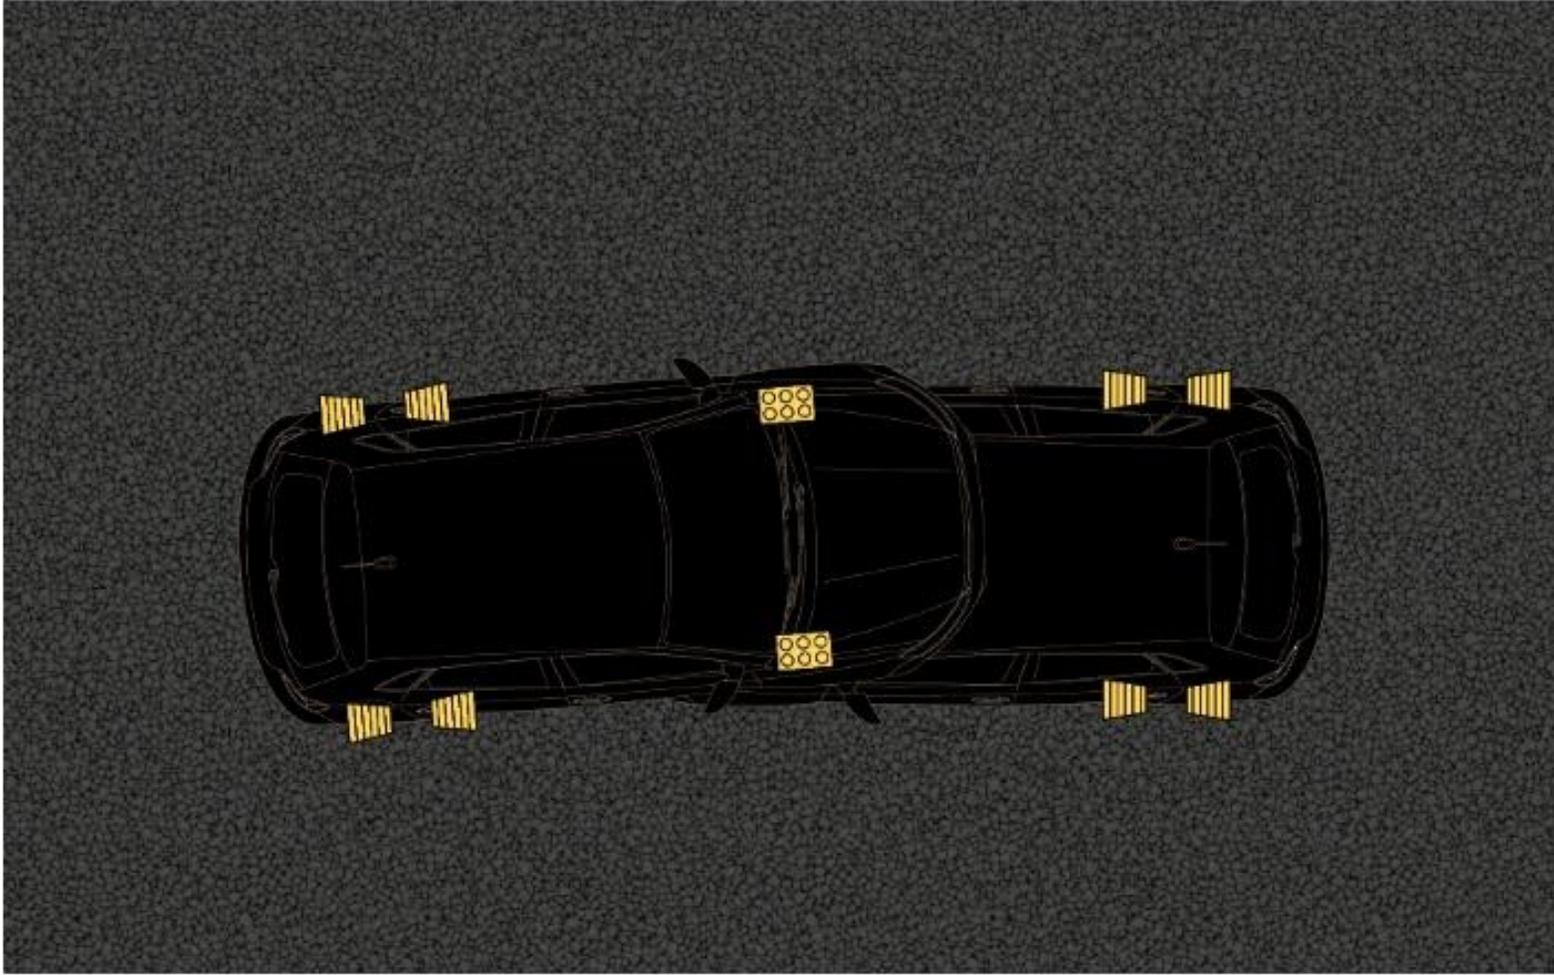

4 Spalt vergrößern, Keil rutscht nach und hält den Spalt für das Ansetzen des Spreizers offen

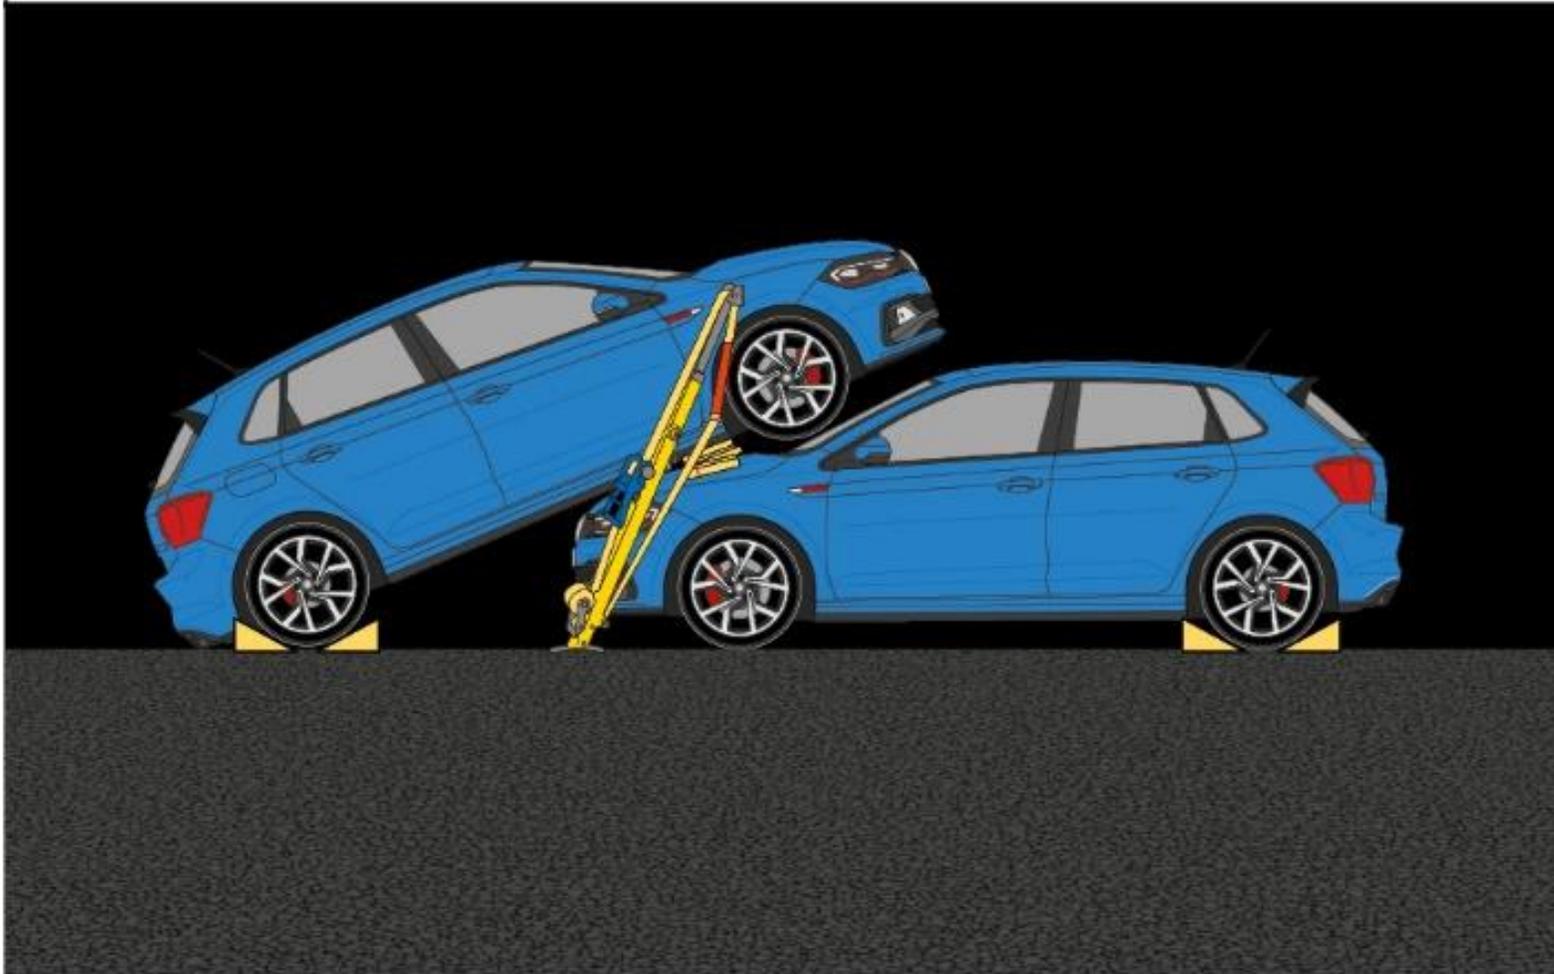

1 Räder mit Keilen und STAB-PACK gegen Wegrollen sichern

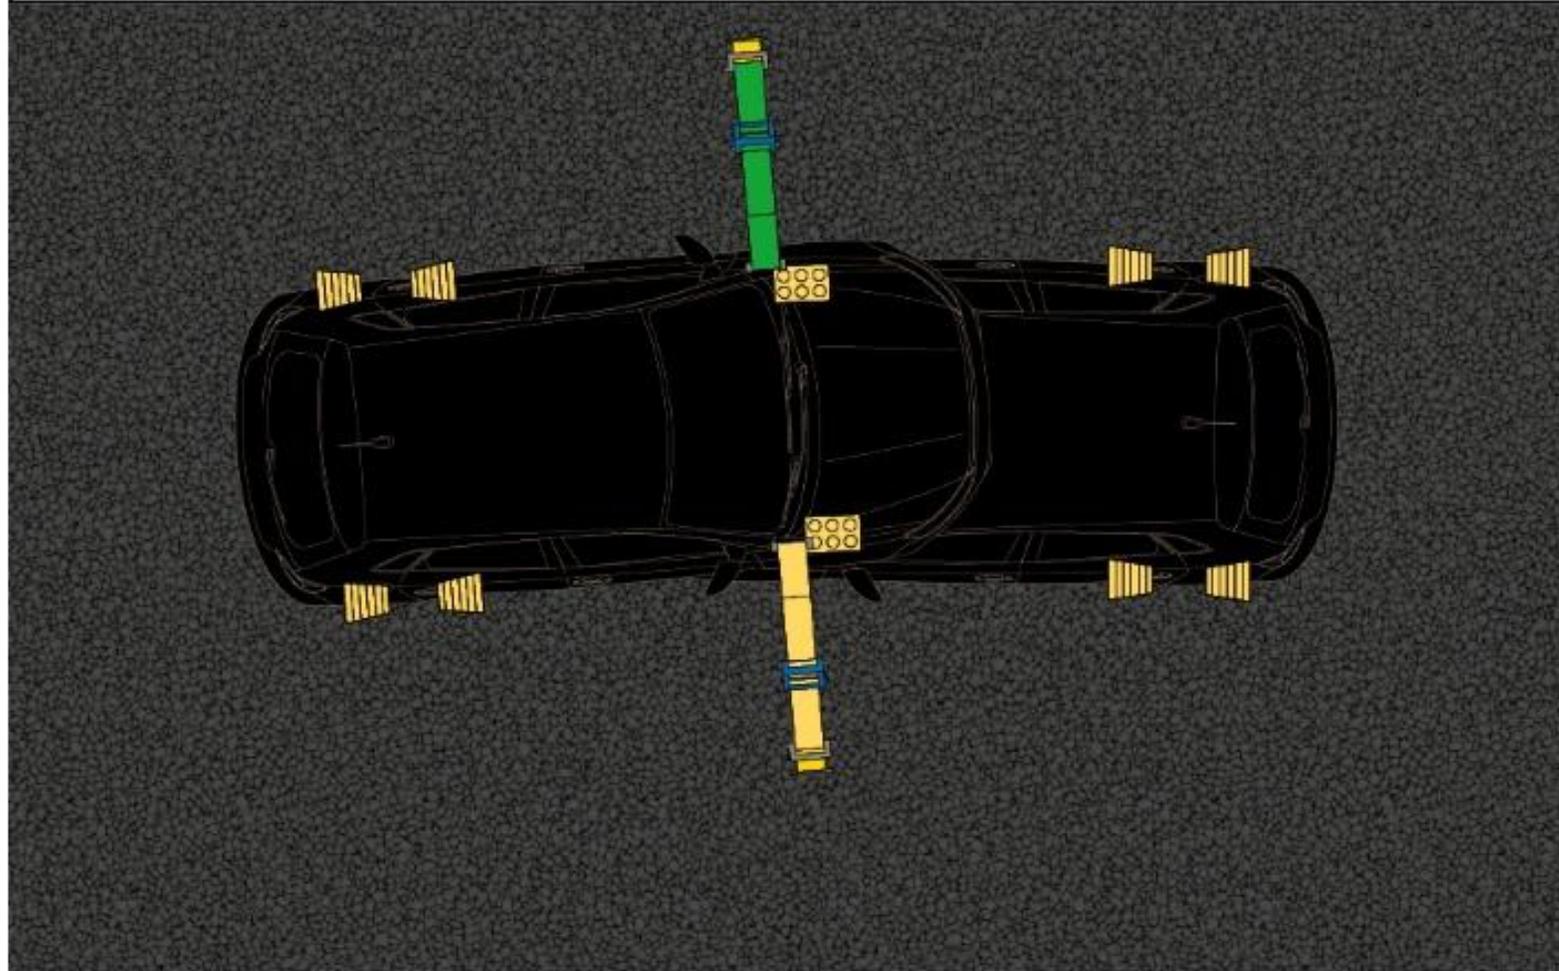

2 Sicherung an beiden Fahrzeugseiten

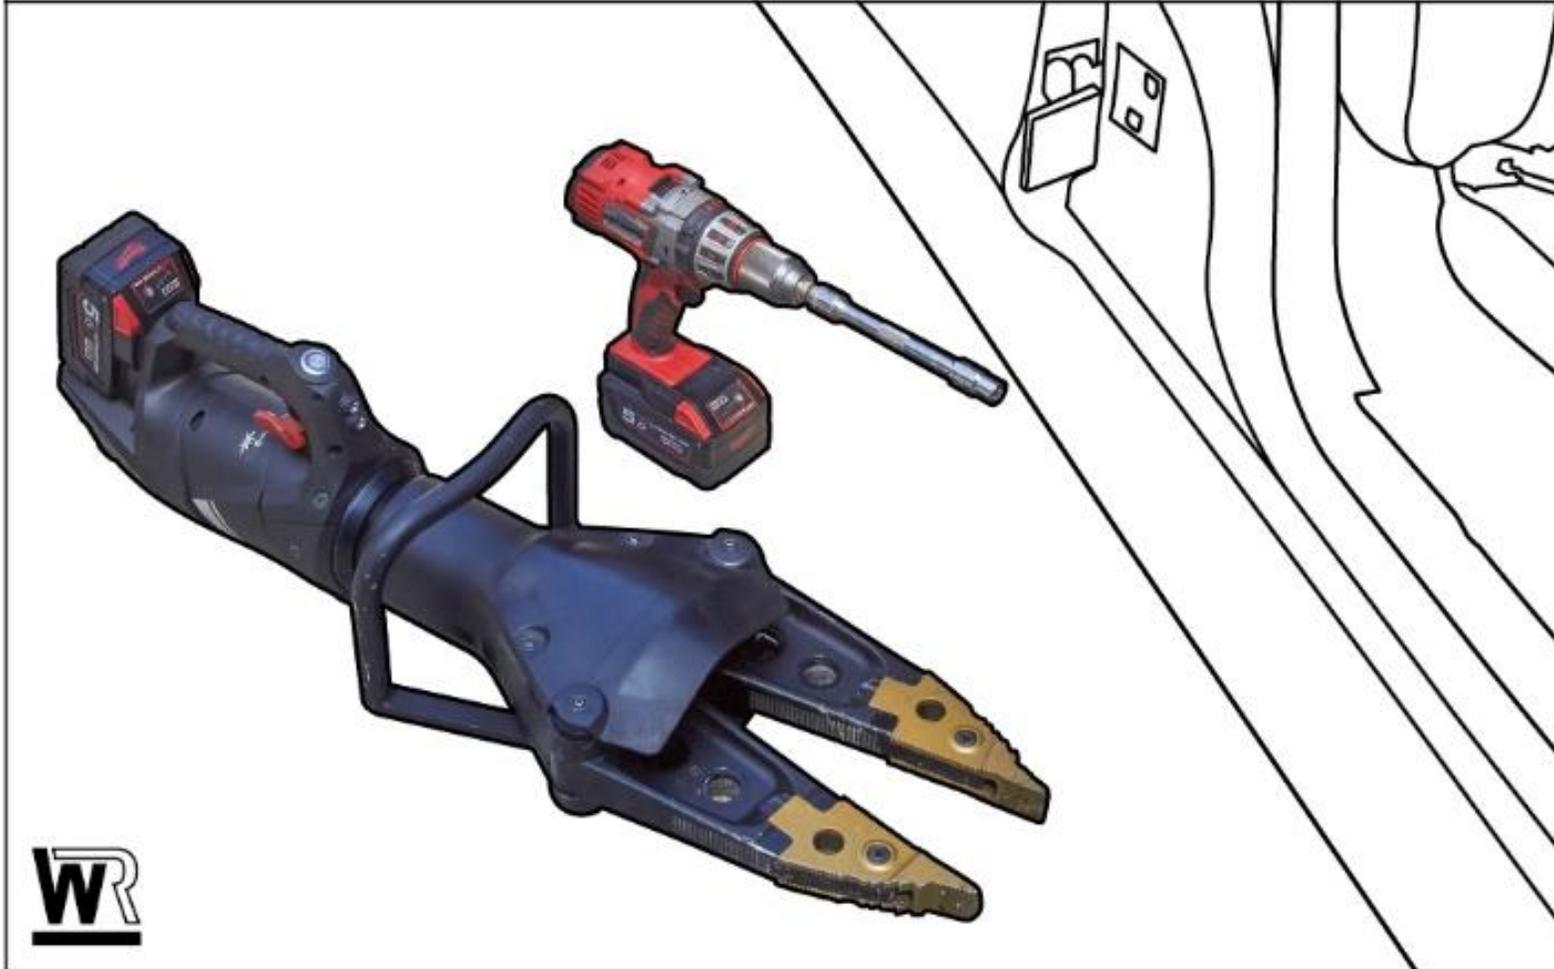

3 Oberes Fahrzeug seitlich gegen Kippen mit STAB-FAST stabilisieren

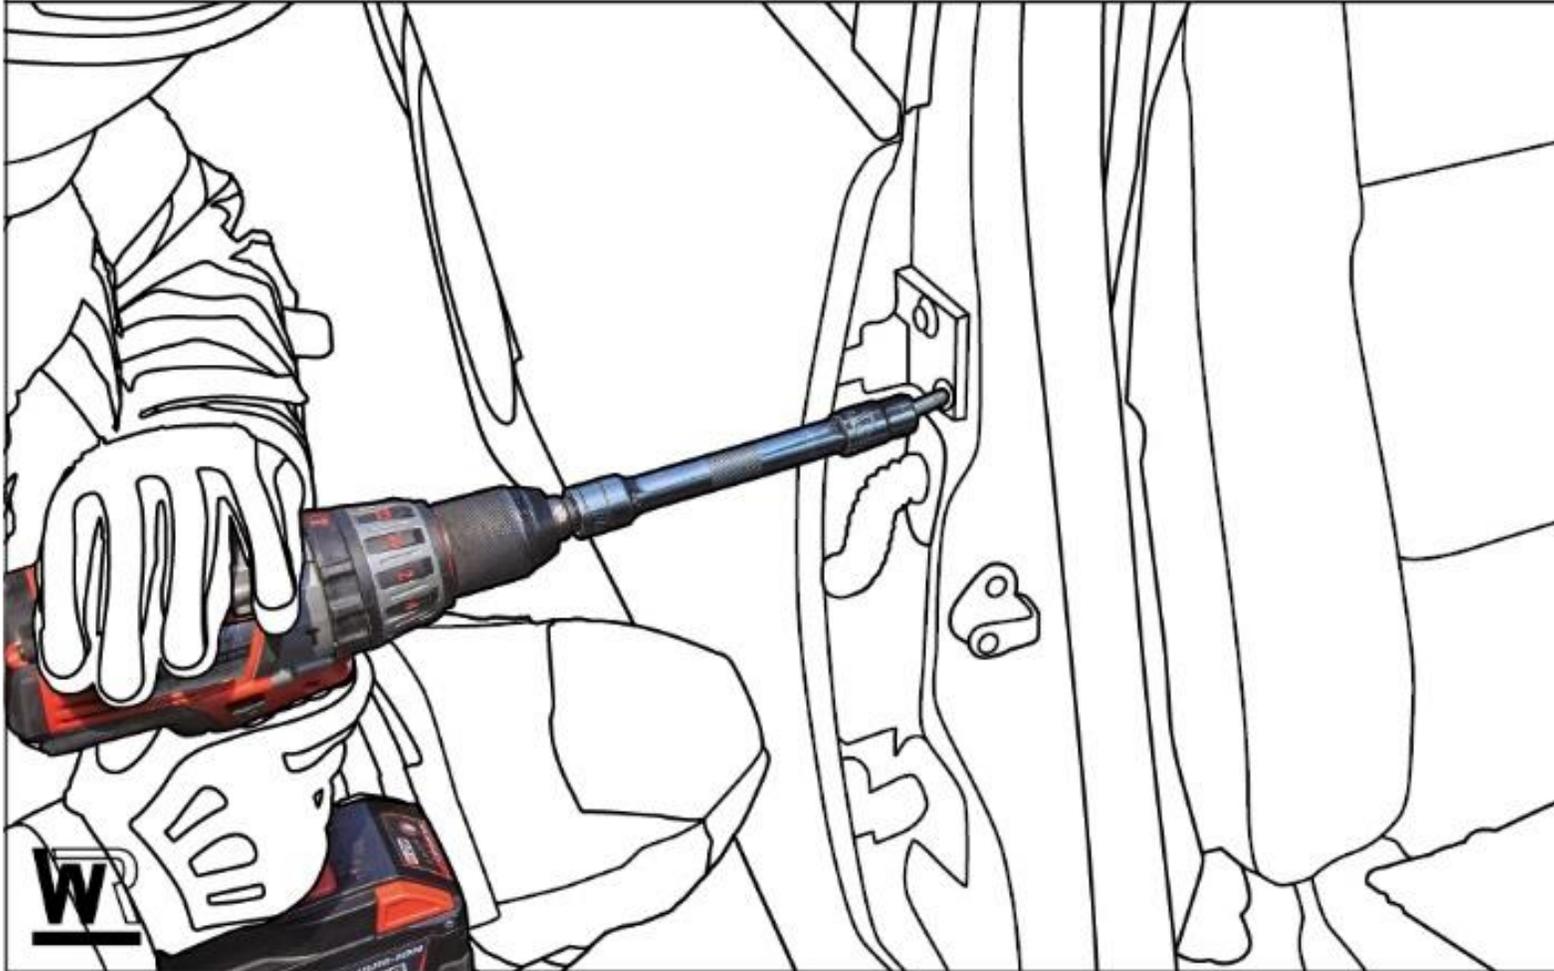

4 Sicherung mit STAB-FAST an beiden Fahrzeugseiten

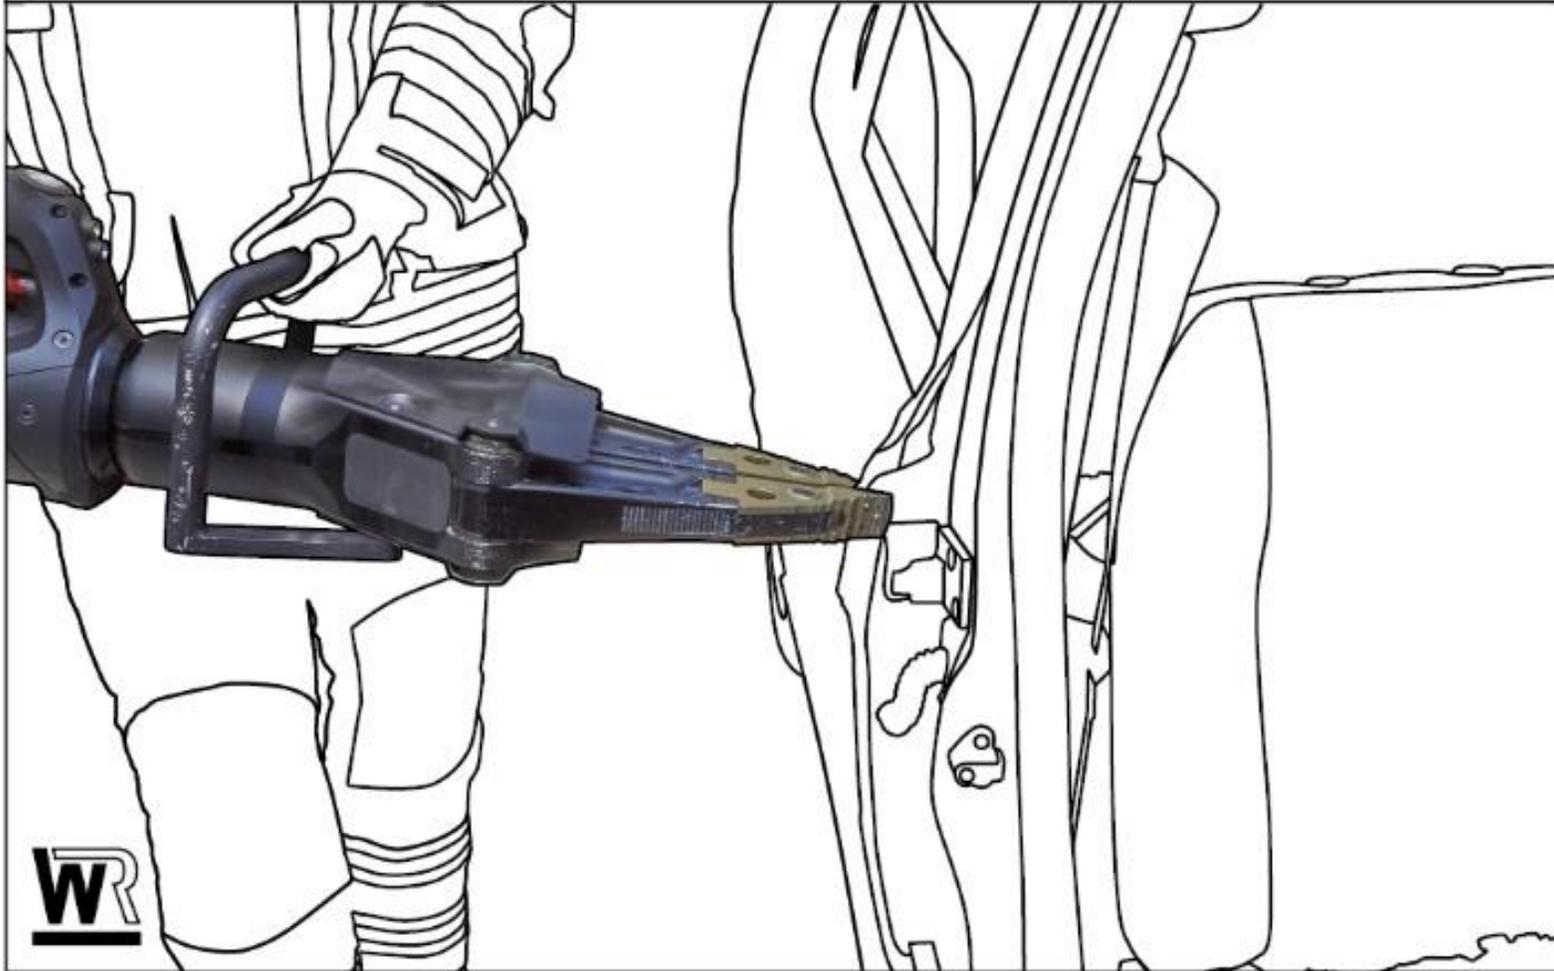

1 Equipment: Schlagschrauber, Bits, Spreizer

2 Mit Schlagschrauber alle erreichbaren Schrauben herausdrehen

3 Mit Spreizer Zugang zu restlichen Schrauben erweitern

4 Restliche Schrauben entfernen und Tür herausheben
